—WALL PAPER 25 per cent. off.

FAIR VIEW.

The crops are looking fine. The farmers are almost through planting. Mr. and Mrs. Allison were guests at Mr. Cadman's last week.

Mrs. W. T. Garratt, of Vancouver, B. C., spent Thursday at John Bennett's.

Thomas Bennett spent Sunday at T. Bennett's.

When it is anything in "drugs" you get the right thing, and the right price, at The Medical Hall. If you think it is not right, come back and get your money. Fred L. Hooper.

MARYSVILLE.

Mrs. J. Corrigan and Miss M. Whyte spent Sunday with Mrs. J. Traynor.

A few from here attended the evening devotions held in Napanee at the time of the Mission.

Miss Kate Fields spent Sunday with her sister, Mrs. W. O'Sullivan, jr.

Miss Agnes McGurn spent a few days with Miss A. White.

Miss Rose O'Sullivan, Lonsdale, was at home to a few Marysville friends on Sunday.

Messrs. A. McGuinness and A. Dafee attended the baptismal service in Deseronto on Sunday.

Messrs. John and James Killorin spent Sunday with their uncle, Mr. P. McAlphine and during the service at St. Mary's church they sang some beautiful solos which were greatly appreciated.

Miss A. Meagher visited Mrs. A. Auderson recently.

CASTORIA.

Bears the Signature of *Chas. H. Fletcher* The Kind You Have Always Bought

SELBY.

Mr. W. L. Peters has his new silo well under way and Mr. David Sexsmith is contemplating building one also.

We are glad to see Miss Freda Jackson out again.

Miss Alma Wood has been spending a few days in town.

Miss Rebecca Peters, Kingston, spent a few days last week at the home of Mr. W. L. Peters.

Mr. Irvin Jackson had a raising last week. He is building an addition to his barn.

Miss Carrie Knapp is visiting relatives in Dorland.

We are sorry to hear Miss Mabel Balance is ill and we hope for a speedy recovery.

A sock social will be given by the Epworth League of Selby Methodist church on Friday evening, June 25th, at 8 o'clock. Refreshments will be served and a good programme of songs, recitations, etc., is being prepared. Music will be furnished by Selby's "New Orchestra." All are welcome. The admission for those who have not received any sock will be double the fee of their shoe. People with big feet especially welcome. Children 5c.

Making people "see" correctly, is an important part of our business, carry the very best in spectacleware. Your eyes tested free and satisfaction guaranteed at The Medical Hall—Fred L. Hooper.

ERNESTTOWN.

The funeral of G. Lucas, sr., which was held at the Lutheran church on Saturday, was largely attended. Mr. Lucas will be greatly missed by a large circle of friends. Mr. and Mrs. George Miller, of Millhaven, and Mr. and Mrs. Vinwinckle were the guests of Mr. and Mrs. Hinch on Sunday.

For a wedding present, a birthday gift to your wife, or a casual donation to the home, there is nothing more acceptable than a properly decorated hanging or stand lamp. The finest assortment of oil and electric lamps we have ever displayed, at prices to suit all purchasers. The Medical Hall—Fred L. Hooper.

TAMWORTH.

The boys left on Tuesday morning for Barriefield to camp, accompanied by Rev. J. Jones.

Mr. and Mrs. Fitzgerald, who have been visiting their daughter, Lizzie, at Muskegon, Mich., returned home on Saturday.

Miss Bernice Saul and Miss Fanny Coxall returned home on Friday, after a pleasant visit at Camden East.

Mrs. Robertson and little son, of Trenton, are the guests of Mrs. Richardson, Pleasant Villa.

Mrs. J. Jones and family are visiting in Kingston.

Mrs. L. P. Wells arrived home on Monday evening after spending a few days at Lindsay and Belleville.

Miss Grace Pringle returned to her home in Marlbank on Thursday evening.

Mr. and Mrs. Wm. Perry left on Friday morning to visit their son, Marshall, at Watertown.

Mr. Wm. Wilson, of Marlbank, spent Friday evening in town.

Mr. Walter Coxall and his friend, Walter Ferguson, of Kingston, spent Sunday at C. G. Coxall's.

Miss Addie Close, of the Pines, is spending a couple of weeks near Napanee.

Tamworth Epworth League will visit Marlbank League on Thursday evening of this week.

Good Paris Green.

Lewis Bergrers' English Paris Green put up in 1lb tin cans is the highest grade Paris Green in the world. It dissolves more readily than any other, and one teaspoonful is nearly as good as two teaspoonful of any other. Sold in Napanee at Wallace's Red Cross Drug Store.

YARKER.

Pastures are now luxuriant.

F. E. Benjamin has purchased a handsome automobile. Yarker has three now.

Egerton Vanluven has moved back here from Napanee.

Mrs. H. Cambridge has returned to Yarker. She has been for some time with her daughter, Mrs. M. Lake.

Yarker and Glenvale played a game of baseball here, Saturday. The score was seventeen to four, in favor of Yarker. There was quite a large crowd to witness the game.

H. McCarthy left here for Belleville, where he enters the employment of the Massey Harris company.

An adult Bible class has been organized in connection with the Methodist Sabbath school here.

Mrs. Connors and Miss Ethel Hart were the two to receive the prize in the Colebrook contest.

Mr. Holland and family spent Sunday in Verona.

MOSCOW.

We are glad to hear that our much esteemed pastor, Rev. J. Baistone, has been left with us for another year.

The Ladies' Aid of the Methodist church here served ice cream on Mr. Vanluven's lawn on Friday evening last. A display of fireworks during the evening was the chief amusement.

F. F. Storms, Warton, is spending the holidays at his home here.

A few from this locality attended camp meeting at Wilton last Sunday.

Jas. Kerr is rebuilding his residence. When completed it will be most modern and convenient.

Mrs. Jas. Foster is visiting her sister in Kingston.

The rural mail delivery on Huffman street is working most satisfactory now.

Wm. Goudy left on Thursday for a trip to Chicago, and on his return will visit friends in Michigan for a few days.

D. C. Pipe, Toronto, visited a couple of days at Manly Foster's.

Quite a large number of people from here attended the funeral of Mrs. Bell, Desmond, on Thursday afternoon last.

On June 26th a picnic will be held in Mr. H. A. Baker's grove. In the afternoon contests, games, and various sports will be the amusements. A good band will be in attendance. Come and enjoy the treat of the season.

STELLA.

The death took place on Wednesday morning, of last week, of an old and much respected resident of the island, in the person of Mrs. Adam Miller. Deceased had only been ill a few days, and her sudden death came as a great shock to her many friends. Her husband passed away five years ago. Deceased leaves to mourn her loss, five sons and two daughters, Mrs. R. Filson and Mrs. R. J. Marshall, Adam, in the west, and Samuel and John, of this place. The funeral was held on Friday to Glenwood cemetery and was conducted by Rev. James Cumberland.

Quite a number attended the jury at Napanee.

The grand lodge, P. A. P. B. at Belleville, and the grand lodge, C. O. F., at London, this week.

The campers are now beginning to arrive, and are taking up their abode on Stella Point.

J. A. McMillen has improved the appearance of the Royal hotel, with a fresh coat of paint.

D. Caughney, Sr., has moved into S. L. Pringle's house, in the village.

Corn, potato and root planting is the order of the day.

Miss Katie Kilpatrick, who has been seriously ill, is improving.

Mrs. Dorian and Mrs. Gilroy, Belleville, and D. T. Findlay, Collins Bay, attended the funeral of the late Mrs. Miller.

The ladies of the English church held an ice cream social on W. H. Monray's lawn, Saturday evening, June 5th.

Visitors: Mrs. Keil, Mrs. C. E. Gibson, Miss Ida Reid, Mr. and Mrs. J. McQueen, Mrs. Pollie and Miss Pollie, Kingston, visiting friends here: H. Allen, Tweed, at W. Allen's: Mrs. McPhail, Niagara, at Mrs. Girvin's; John Fleming has returned home from Buffalo.

Henry Filson has returned home, after spending a few days in Hamilton.

H. McCarthy left here for Belleville, where he enters the employment of the Massey Harris company.

An adult Bible class has been organized in connection with the Methodist Sabbath school here.

Mrs. Connors and Miss Ethel Hart were the two to receive the prize in the Colebrook contest.

Mr. Holland and family spent Sunday in Verona.

Allen Silver has gone into the manufacture of neck yokes and whiffletrees, using wind mill power.

Mrs. F. Raper has gone to Deseronto. George Snare is sailing the rest of the season from Deseronto to Sault Ste. Marie.

The Moscow stage to Kingston is doing a fine trade. Passenger traffic is on the increase.

Napanee Lodge No. 86 I.O.O.F.

Annual EXCURSION

—to—

OTTAWA

(Civic Holiday)

Wed. Aug. 11th

Special attractions this year at Ottawa. The Grand Lodge, I.O.O.F. will be in session, and Wednesday is the Grand Lodge field day when Cantons from all over Ontario and the Eastern States will compete. There will also be a programme of sports. The Belleville Canton and Oddfellows' Band have arranged to accompany the excursion.

DESERONTO ROAD.

Mrs. Manley Conger is improving the looks of her house by a coat of paint, which adds greatly to its appearance. Mr. Gilbert McGreer is the painter.

Mr. John Todd left this week with the soldiers who are camping this year at Cataract.

Mr. L. V. Storms, of Selby, is busily engaged working for John Wood Thompson finishing off the barn which he recently moved and joined to his other barn.

George Holland, who spent the winter and most of the spring working for Fred Bowen is now engaged for the summer with Wm. Joyce.

We understand that Miss Maud Gordon, teacher of the Upper School, S. S. No. 1, has tendered her resignation to the trustees, the same to take effect at the close of the school for the summer holidays. We hear she has secured a position in Deseronto.

Mr. Arthur Reed is away with the soldiers this week.

Mr. Wm. Joyce is contemplating the erection of a new silo the coming summer.

Mr. William Oliver, milkdrawer for Mr. Gerow, who met with a rather painful accident some time ago at the factory is slowly improving, and will be able to resume drawing in a short time. In the meantime Mr. Frank Reed is drawing in his place.

Working on the road seems to be the order of the day just now. The stone crusher owned by the Township of Richmond was crushing stone for this road a few days last week.

The Nox Tasteless Liquor, Drug and Tobacco Cure.

We have yet to hear of one failure to cure where a fair trial has been given. Can be given without the person knowing it, is harmless and absolutely without taste. Mother, sister or wife, you would be doing a great work by giving this remedy to some members of your family. We will mail a full month's treatment for five dollars. The Seabell Drug Co., St. Catharines, Ont.

J. L. BOYES,

ADDINGTON FARMERS' INSTITUTE

MR. EDITOR—If you can spare space in your popular paper to give a short account of an association that has had an existence in Addington County for twenty-one years, and which is now quite able to stand alone, I am sure that we who cheerfully take the time every week to read the news in the Express, will be gratified with the information.

The Association is called Farmers' Institute. The annual meeting was held at Centreville, on Saturday, June 12th. The attendance was not large, but all who were present seemed willing to do all they could for the success of the Institute.

The Auditors, Mr. Nesbit and Mr. Winter, of Newburgh, made report of the Finances. Accounts all paid, leaving a balance in hand.

Officers were elected—President, M. Shannon; Vice Presidents, R. Nugent, C. D. Wagar; Sec-Treas. J. B. Aylesworth; Directors, Smith Gilmore, David Brandon, Wm. Nugent, Wm. M. Paul, W. J. McGill, H. F. Bell, J. M. Lochhead.

Places were named where public meetings will be held during the year, and other business transacted.

J. B. AYLESWORTH.

A. S. Kimmery will sell choice Alfalfa Seed \$10.00 bush., choice stock of garden seed, Timothy and Red Clover seed on hand. Plenty of Bran and Shorts and all kinds of cracked feed in stock. Try five Roses Flour, Salada Tea 25¢ off. Try our 25c Tea, good

DESERONTO.

A successful lawn social was held on the grounds of Mrs. F. S. Rathbun's home on Friday evening, when the sum of \$40 was added to the treasury of the Ladies' Aid of the Presbyterian church. The grounds presented a very pleasing appearance and in the evening the booths were lighted up with Japanese lanterns. A canopy was over the home-made cakes, ice cream, candy and flower stands. The following ladies had charge of the different stands and deserved great credit for their ardent endeavours to make it a success: Mrs. F. McMaster, Mrs. F. J. Frost, Mrs. J. Gammon, Mrs. W. Russell, Mrs. W. Mitchell, Mrs. D. Thompson, Mrs. R. Miller, and Mrs. (Dr.) Pasmore; the home-made cake table and five o'clock tea, Mrs. Jos. Hegarty, Mrs. W. J. McMicking, Mrs. J. Alton, Miss Lizzie Smith; the flower table Misses Maud Gordon and Agnes Thompson; the candy table, Misses Annie Dalton, Lottie Cronk, Lena Warren and Laura Gowan. A few members of the band came out for the occasion under the leadership of Tom Maxwell and rendered several selections which were enjoyed by all as they have not been out before this season.

A large crowd could be seen Sunday afternoon wending their way to the water from above the smelter between twelve o'clock and one, when the Bible Christians held a baptismal service. The services consisted on reading scripture and singing. Then the minister led the applicants out in the water one by one and had them immersed. They were eleven in number.

Many expressed sympathy on Saturday when the news was received in town from Kingston of the death of Mrs. R. J. Craig. Rev. R. J. Craig was the first pastor of the Church of the Redeemer and his wife was always so kind and good in dealings with her people and endeared herself to many of the congregation. Much sympathy is expressed to Rev. R. J. Craig and family in this their sad bereavement.

On Sunday at her residence on St. George Street there passed away Mrs. Thomas Black, aged 55 years, beloved wife of Mr. Thomas Black, after an illness extended over four years. She was a great sufferer and the sleep of death was to her a sweet repose. Through all her suffering she never murmured, having her confidence placed in her Saviour, whose arm was her stay in life. She was a member of the Presbyterian Church and was already to help in the cause of her church and welfare of humanity. She is survived by her husband, four daughters, Mrs. Herbert Everson, of Brantford, Miss Pearl Black, of Toronto, Mrs. Robert Bromley, of Toronto, and Miss Lela, at home and one son, Clinton, bookkeeper for the Watrous Engine Works, Brantford.

Mrs. Cross, of Toronto, is the guest of Miss Jennie Dryden.

Miss Nellie Stanhope, of Rochester, N. Y., is spending a few weeks in town with relatives.

Paris Green, pure, in tin cans. Sprayers, Scythes, Snaths, Mowers. BOYLE & SON.

The people of Natal have voted by 11,121 against 3,071 to join the South African Union.

The Victoria Post, the new Conservative Pacific coast paper, says: "In Mr. Mackenzie King Sir Wilfrid Laurier has secured a brilliant colleague, one who possesses all the elements of a successful Minister, and who, with youth, enthusiasm, and lofty ideals, should qualify for the highest positions in public life."

Great Britain now has 444 fighting ships under twenty years old, against the 200 of Germany and the 233 of France. The English battleship fleet numbers 59, against the 42 of Germany and the 24 of France, while the armored cruisers number, respectively 30 12 and 92. England has

TELFORD, 131 Shuter street, Toronto, Main 3 66. 25-d

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Supplying Coal for the Dominion Buildings," will be received at this office until 4 30 P. M., on Thursday, July 15th, 1909, for the Supply of Coal for the Public Buildings throughout the Dominion.

Combined specification and form of tender can be obtained on application at this office.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their usual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to ten per cent (10%) of the amount of the tender, which will be forfeited if the person tendering declines to enter into a contract when called upon to do so or fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,

NAPOLEON TESSIER,

Department of Public Works,
Ottawa, June 4, 1909.

Secretary.

EXECUTOR'S NOTICE TO CREDITORS.

In the Estate of Clarissa McMichael, deceased.

Notice is hereby given pursuant to Chapter 129, of the Revised Statutes of Ontario, section 35, and amending acts, that all persons having any claims or demands against the estate of Clarissa McMichael, late of the town of Napanee, in the County of Lennox and Addington, spinster, deceased, who died on or about the 19th day of April, A. D. 1909, are required to deliver or send by post prepaid to Hammel Madden Deroche, Napanee, Ontario, Solicitor for Nathan Fellows, Executor of the last will and testament of the said Clarissa McMichael, deceased, on or before the 15th day of June, A. D. 1909, their christian and surnames, addresses and descriptions, with full particulars of their claims and demands duly verified, and the nature of the security (if any) held by them.

And further take notice that after the said 15th day of June, A. D. 1909, the said executor will proceed to distribute the assets of the said estate amongst the parties entitled thereto having regard only to the claims or demands of which they shall then have received notice, and will not be responsible for the said assets or any part thereof to any person or persons of whose claims or demands they have not received notice at the time of the distribution thereof.

H. M. DEROCHE,

Solicitor for the said executor,

Dated the 10th day of May, 1909.

THE DOMINION BANK

of the meetings will be held during the year, and other business transacted.

ROD AND GUN FOR JUNE.

The winter campaign against the wolves in Northern Ontario, suggestions for thinning out these pests in the Algonquin National Park and the need for some further action in that portion of the Province bordering on Manitoba, are prominent features of the June number of Rod and Gun in Canada, published by W. J. Taylor, Woodstock, Ont. Sportsmen everywhere are deeply interested in this wolf campaign because it is felt that the future of our big game depends, to a considerable extent, upon keeping down the numbers of their relentless and ever vigorous foes. What has been done and what is proposed applies to a much wider field than Ontario and the lessons learned will no doubt be put to use in several of the other provinces. Even where the wolf is not a pest and a trouble sportsmen will read with sympathetic interest of the good work done and of the proposals for renewing it with increased zest next winter. Fishing, including a fine illustrated paper showing how anglers may, with much pleasure and profit to themselves, mount the best of their specimens, occupies the next place, seven stories being given up to topics of which the fisherman is never weary. As a change, one paper descriptive of fishing in the West Indies, will show Canadians that they have no need to envy their fellows elsewhere. A fine dog article by Mr. R. Chapman, "Dogs as Companions at Home and Afield," a paper on "Grouse in Alberta," a description of a new British Columbia Canoe trip, a couple of big game hunting stories, fish and game protective topics, a summary of the report on the Canadian National Park, and a paper on Physical Culture, are representative of the wealth of other good things appearing in the number.

Corns are Worse in Hot Weather.
Get rid of them now, 15 cents will do it. To be had at Wallace's Drug Store. Sent by mail on receipt of 18 cents in stamps. For sweaty feet just procure a 25c tin of our Foot Easern.

MARLBANK.

Mrs. David Cook, who has been seriously ill with typhoid fever, we are pleased to say is improving nicely under the skillful treatment of Dr. Burrows.

Mrs. Wm. O'Keefe and son, who have been stopping for some time at the Hotel Dieu, Kingston, undergoing treatment, returned home on Saturday evening greatly improved.

Quite a number of our young men took the train on Tuesday morning for Kingston, where they will spend a few days soldiering.

Mr. Joe Brown and wife spent Sunday last visiting friends at Bath.

The members of the Epworth League are looking forward to Thursday evening when an enjoyable time is anticipated by a return visit of the Tamworth Epworth League.

FIG PILLS

Restore Failing Energy.

They make well and healthy the diseased liver and kidneys, making them perform their functions. Besides this, they purify your blood and make the run-down ailing ones feel like new again. Try a box—25c, and see how quickly you note the change. For Sale at Hooper's Drug Store.

...who will possess...the elements of a successful Minister, and who, with youth, enthusiasm, and lofty ideals, should qualify for the highest positions in public life."

Great Britain now has 444 fighting ships under twenty years old, against the 200 of Germany and the 233 of France. The English battleship fleet numbers 59, against the 42 of Germany and the 24 of France, while the armored cruisers number, respectively, 39, 12 and 22. England has now 68 submarines and 171 destroyers, against the eight submarines and 97 destroyers of Germany. So it still seems fairly safe to say that Britannia rules the waves.

The Picton Gazette says: The "Blue Streak," a very fast motor boat of Toronto, has been in the harbor for the past few days cutting circles at a fast clip. She made the run from Toronto to Trenton, a distance of 112 miles, in five hours and thirty minutes. She and Mr. J. H. Gilbert's "Jusnita" have had several brushes together, and are very equally matched in speed. Capt. Vesells believes that he can trim the Blue Streak when the Jusnita's engine gets limbered up a little more.

CLERK'S NOTICE OF FIRST POSTING OF VOTERS' LIST.

Municipality of the Village of Bath, County of Lennox and Addington.

Notice is hereby given that I have transmitted or delivered to the persons mentioned in sections eight and nine of The Voters' List Act, the copies required by said sections to be so transmitted or delivered of the list, made pursuant to said Act, of all persons appearing by the last revised Assessment Roll of the said municipality to be entitled to vote in the said municipality at elections for members of the Legislative Assembly and at municipal elections; and that said list was first posted up at my office, at Bath, on the 16th day of June, 1909, and remains there for inspection. Electors are called upon to examine the said list, and if any omissions or any other errors are found therein, to take immediate proceedings to have the said errors corrected according to law.

MAX ROBINSON,
Clerk of the said Municipality.
Dated this 16th day of June, 1909.

Excursion to Toronto

Under auspices of Ladies' Aid, of Queen Street Methodist Church, Kingston.

TUESDAY, JULY 6th, '09
Via G. T. R.

ANTHEMS OF THE NATIONS.

British National Song Inspired
Those of Other Countries.

It is no new thing for lament to be expressed that the United States has no good and distinctive nation-

It is no new thing for lament to be expressed that the United States has no good and distinctive nation-

Money to get things on. **MAKE A NOTE** when you are leaving home to buy "The D. & L." Menthol Plaster. Guaranteed to cure the worst case of backache, headache, stitches. Avoid the "just as good" goods. Get the genuine.

HORSE SENSE.

"Why don't you go to the doctor."

"I don't have any faith in these modern physicians."

"Neither had my jackass any faith in the vet. But he cured him of glanders."

Dr. J. D. Kellogg's Dysentery Cordial is compounded specially to combat dysentery, cholera morbus and all inflammatory disorders that change of food or water may set up in the stomach and intestines. These complaints are more common in summer than in winter, but they are not confined to the warm months, as undue laxness of the bowels may seize a man at any time. Such a sufferer will find speedy relief in this Cordial.

Dividing with love is always doubling.

She—"I knew you were an idiot before I married you!" He—"I presume my proposing to you satisfied you on that point."

Never Vary in Quality or Taste

because the utmost care is taken by **Libby's Chefs** to select only the choicest materials, and put these up in the same careful manner every time. You are thus assured of uniform goodness, and this is the reason that the use of Libby's gives such general satisfaction to every housewife.

- Try these **Libby's Foods**:
- Dried Beef
 - Mexican Tamale
 - Ham Loaf
 - Chili Con Carne
 - Vienna Sausage
 - Evaporated Milk

For luncheon, spreads or every day meals, they are just the thing.

Keep a supply in the house. You never can tell when they will come in handy. Ask for **Libby's** and be sure you get **Libby's**.

Libby, McNeill & Libby

least. Gerald was greatly interested in the story; but, after discussing it for a while, they drifted back to his own interests and plans, which absorbed their thoughts almost to the exclusion of all else. The next morning Lady Bromley took Allison's picture down-town, and had it fitted to a costly and beautiful frame, which added greatly to its attractiveness, and, upon her return, she placed it upon an easel, where the light would fall upon it, and bring out its beauty to the best advantage.

"Ellen," she said, as the girl appeared in the doorway, "I would like you to bring me a glass of water."

Ellen made no reply, and, hearing no movement, her ladyship turned to ascertain the reason of her silence. She found her standing upon the threshold, transfixed, a rapt expression on her face, her eyes fastened with an adoring look upon the picture of Allison. Presently she tiptoed across the room, and stood before it, her hands clasped upon her breast, which was heaving with mingled surprise and delight.

"It's her," she murmured reverently; "it's her, and prettier than ever!"

"Why, Ellen, did you ever see that lady?" questioned Lady Bromley, astonished.

Ellen started violently at the sound of her voice, and instantly came out of her trance of admiration.

"See her? Of course I've seen her, and talked with her, and loved her with all my heart," said the girl, under her breath; adding, with more animation; "Twas she who gave me those ten dollars, and took me to Doctor Ashmore to have my arm set. Oh, where did you get such a beautiful picture of her?"

"A friend gave it to me last evening," her mistress replied, repressing a heavy sigh.

"Where is she now?" Ellen inquired, still feasting her eyes upon the lovely face, which she had never seen, except in her mind's eye and her dreams, since that day which to her, had been the most momentous of her life.

But Lady Bromley did not reply directly to her question. She evaded it by asking another:

"Did I understand you to say that this is a picture of the lady who helped you the day you met with your accident? Are you sure?"

"Sure!" repeated Ellen positively. "Why, I couldn't forget her if I should live to be a thousand years old! She was so pretty, I couldn't take my eyes off of her while we were in Doctor Ashmore's office together, and I've dreamed of her no end of times since."

"Come here and sit down, Ellen," commanded Lady Bromley, indicating a chair opposite her. "I want you to tell me all about that mishap; I did not suspect yesterday, when you spoke of the lady who was so kind to you, that I had any knowledge of, or interest in, her."

The girl sat down, as directed, and went through with the whole story, describing how kindly Allison had spoken to her on the street; how, when she had fainted, she had insisted upon having her carried into the office of the noted surgeon, instead of allowing her to be jolted over the pavements to a hospital in her suffering condition; how she had remained with her during the operation of setting the broken bone; then made up the loss of her aunt's money, and also presented her with ten dollars; then

erring face, a sudden gleam in her dark eyes. "Yes, Miss Allison Brewster," said her companion, regarding her curiously. "What is there about the latter name that affects you so peculiarly?" "Nothing," said Ellen, springing to her feet, and with a quick indrawn breath. "I—I will bring you that glass of water now," and she hastened from the room, as if anxious to escape further questioning. But, once outside the room, she stopped, and, putting her hand to her head, stood gazing upon the floor in deep perplexity.

"I wonder—No, I don't believe it can be true," she breathed, after thinking deeply for a moment or two.

When she returned to Lady Bromley's presence with the water, she waited until she had quenched her thirst; then, as she took the empty glass from her, she asked again:

"Where is she now?" with a backward glance at Allison's picture; "you did not tell me."

"Oh, Ellen, she is—dead!" sadly replied her ladyship.

Crash! went the glass upon the floor, and the girl sank upon her knees beside it.

"No—no, not dead!" she gasped wildly.

"My poor child, I did not mean to shock you so," said her mistress regretfully; "but it is true."

"Oh, it can't be true! I cannot bear it! And she was so rich and beautiful! Now I shall never see her again!" and Ellen, utterly overcome, burst into violent weeping.

Lady Bromley allowed her grief to have its way for a while; indeed, she herself was deeply moved, in view of the unassumed love and sorrow which the girl evinced for one in whom she herself had been so interested.

But when she began to recover herself somewhat, she quietly observed:

"Yes, Miss Brewster died more than three months ago, and she was not rich at that time—her fortune had been stolen from her, and she was actually driven from her beautiful home."

"Stolen! Who stole her money from her! You don't mean that she was poor like me!"

"Yes; every dollar was taken from her."

"Who stole it? Who dared to drive her from her home?" cried the girl, springing excitedly to her feet, her cheeks aflame, her eyes literally blazing with an angry, vengeful light.

"Her guardian—the man whom her father had appointed to manage her affairs," replied Lady Bromley; but mentally wondering why she allowed herself to be drawn into these explanations to this poor, ignorant girl, who was almost a stranger to her.

"His name! What was his name?" demanded Ellen, in a scarcely audible voice.

"John Hubbard."

"Ah, that's it! Now I know all about it; and I'm going to tell—I'm going to tell! I don't care if they kill me for it!" panted the excited girl, as she again sank, almost exhausted from mental excitement, upon the spot from which she had but a moment before arisen.

(To be continued.)

They who think there is only one road to heaven usually want to put a toll gate at their station.

ville, Ont.

ANTHEMS OF THE NATIONS.

British National Song Inspired Those of Other Countries.

It is no new thing for lament to be expressed that the United States has no good and distinctive national anthem. Prof. William M. Sloane does not like "The Star-Spangled Banner," because it is not simple, although it is strong. He realizes the difficulty of making a song to order, even though the Austrian and Russian hymns were written that way.

Russia is a pretty old nation, but it used the music of "God Save the King" as its national hymn till 1830, when Lwoff wrote the present national song, "God Protect the Tsar," as a setting for the words of a patriotic poem. The Austrian hymn is about thirty years older, and is a product of the patriotic enthusiasm that covered Europe at the time of the French Revolution. Haydn had visited England, and returned to Vienna much impressed with the British national anthem and he suggested that Austria should have such a hymn. He was accordingly commissioned to write it, and the new song was first sung in 1797. The English hymn, "God Save the King," appeared in its present form in 1740, and made its way by its merits until it became officially recognized.

Although Germany has a patriotic song to the same air, "The Watch on the Rhine," now known abroad as the great national song, did not appear till 1870. It sprang into popularity during the war with France. The French hymn of "The Marseillaise" was produced during the excitement of the Revolution, as "The Star-Spangled Banner" was inspired by an incident of the War of 1812.

PLOWS WITH KEROSENE ENGINE.

Capt. M. B. Rowe is having a large portion of his land at Fredericksburg, Va., plowed with a kerosene engine that draws six three horse plows, with harrows following. The work, which would ordinarily require 21 horses and seven men, can now be done by two men. The plowing and harrowing is proceeding at the rate of from 15 to 18 acres a day.

BABY'S OWN TABLETS CURE ALL MINOR TROUBLES

The stomach, the bowels, cutting teeth is responsible for most of the ills and suffering that afflicts babyhood. Baby's Own Tablets will keep your child well because it is the best medicine in the world for these troubles, and at the same time it is the safest. The mother has the guarantee of a Government analyst that this medicine contains no opiate or poisonous "soothing" stuff. Mrs. Jos. Bernard, St. Emile, Que., says: "Baby's Own Tablets are really a marvellous medicine. My baby was thin, peevish and sickly until I began giving him this medicine. Since then he has thrived and grown splendidly." Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

On the Farm

QUALITY DEMANDED IN EGGS.

In discussing the quality of eggs, A. G. Gilbert, before the Select Standing Committee on Agriculture, in 1908, said that, for storage, the best eggs could be collected from November to March, because, as a rule, the fowls were better handled, and more carefully fed. As the birds got outside, they picked up decayed vegetable matter or animal matter, and the quality of the eggs is deteriorated.

If you can be sure that the eggs put into storage, or into preservative liquid, are fresh, said Mr. Gilbert, I think the summer months are the best time to buy for storing. In order to secure reliable eggs during the summer season, there should be a guarantee not only that the eggs are strictly fresh, but that the hens which laid them were cleanly fed. It takes effort and care to place guaranteed eggs on sale. This is an age where people demand pure food. There is a call for strictly new-laid eggs of good flavor and quality, by people who must have them, even at increased cost. Let me cite an instance. One early summer day, about two years ago, I was met by a junior partner of a grocery firm. He said: "Can you give me a regular supply of strictly new-laid eggs of good flavor. We have a class of customers who will have no other kind of article, and we are bound to get such for them, if at all possible." I replied: "I can give you a limited number, but you will not pay me what they are worth."

"What are they worth?" he asked. "Twenty cents per dozen," I answered. He at once said: "I will give you twenty-five cents for all the guaranteed eggs of the freshness and quality I mentioned that you can give me." I explained that we might not be able to give him many eggs from the farm, as we usually induced our hens to moult early, but that I might be able to procure the quality of goods he desired from people I could trust. He said: "As long as you can guarantee the eggs, I am satisfied." I certainly got the quality of eggs he desired, and in some cases had them put up in cardboard boxes holding one dozen, with a printed guarantee on the box cover: "Strictly New-laid Eggs. These eggs are guaranteed to be non-fertilized, and to have been laid by cleanly-fed and well-kept hens."

Summer market eggs should be non-fertilized. There is not the slightest doubt that, if the egg is fertilized, and put away in a warm place during a warm month in summer, the germ is likely to make such progress that, when its development is arrested, a certain amount of decomposition is liable to occur.

The quality of the feed is doubtless a factor in obtaining flavor. Our only safeguard is really to find the man who feeds his hens properly, and takes precautions to secure the flavor of the eggs. He should certainly be encouraged by getting a high price. The bad fellow is encouraged, as well as the good fellow, under ordinary conditions.

THE DOSE IN TIME THAT SAVED NINE

DODD'S KIDNEY PILLS CURED DAN. MCGEE'S BACKACHE.

He Used the Old Reliable Kidney Remedy and Found a Speedy and Complete Cure for His Trouble.

James River, Antigonish Co., N. S., June 7. (Special).—It has again been proven in the case of Mr. Dan. McGee, a well-known farmer living near here, that backache is only a symptom of Kidney trouble, and that Dodd's Kidney Pills cure it quickly and completely.

"I suffered from Backache for two months," Mr. McGee states. "It started from a strain and grew steadily worse. I also had occasional attacks of Lumbago. I was always tired and at times my eyes were puffed and swollen. In the mornings I had a bitter taste in my mouth."

"Then I decided to try Dodd's Kidney Pills and the result is that to-day I am a well man. I advise all persons suffering from Backache or Lumbago to use Dodd's Kidney Pills."

Mr. McGee caught his Kidney Disease in its early stages, and Dodd's Kidney Pills cured it almost at once. Neglected Kidney Disease develops into Rheumatism, Dropsy, Bright's Disease or Heart Disease. Dodd's Kidney Pills will cure any and all of these.

BEAUTIFUL INDIAN BELIEF.

Among the superstitions of the Seneca Indians is one of singular beauty. When a maiden dies, they imprison a young bird until it begins to try its power of song, and then, loading it with caresses, they loose it over her grave, in the belief that it will not fold its wings nor close its eyes until it has flown to the spirit land and delivered its previous burden of affection to the loved and lost.

PIELOGY.

"Promises like pie-crusts, are easily broken," said a philosopher. But he said it before the railway lunch-counter pie was invented.

You cannot be happy while you have corns. Then do not delay in getting a bottle of Holloway's Corn Cure. It removes all kinds of corns without pain. Failure with it is unknown.

THE ART OF PERSUASION.

Possible Employer—"But we are slack ourselves. If I found you anything to do, it would be taking work from my own men."

Applicant—"The little I should do wouldn't harm nobody guv'nor."

Clean Stomach, Clear Mind.—The stomach is the workshop of the vital functions and when it goes out of order the whole system clogs in sympathy. The spirits flag, the mind droops and work becomes impossible. The first care should be to restore healthful action of the stomach and the best preparation for that purpose is Parmelee's Vegetable Pills. General use for years has won them a leading place in medicine. A trial will attest their

SENTENCE SERMONS.

All great facts are due to some great faith.

Tact without love is only a form of diplomacy.

Men who give up nothing give up everything.

It is better to blurt out truth than to set a lie to soft music.

There is no blessing to any bread until it is broken and shared.

Only the doctrines that make deeds are worth working over.

Preaching dietetics is always the forte of those who are out of bread.

The child who gives all gives more than the riches who gives only a part.

The most desolate lives are those that are lived for life's furniture only.

Many a man feels that his indorsement of a religion gives it its pre-eminence.

It's better being a hand car on the right road than a private one on the wrong.

When a man really gets a truth he ceases to be afraid either of hell or of heaven.

It were better to suffer from eternal justice than to enjoy unending bliss on a crooked deal.

The Pill That Leads Them All.—Pills are the most portable and compact of all medicines, and when easy to take are the most acceptable of preparations. But they must attest their power to be popular. As Parmelee's Vegetable Pills are the most popular of all pills they must fully meet all requirements. Accurately compounded and composed of ingredients proven to be effective in regulating the digestive organs, there is no surer medicine to be had anywhere.

Father: "And how are you getting on at school, Johnny?" Johnny: "Oh, I have learnt to say, 'Thank you' and 'If you please' in French." Father: "That's more than you ever learnt in English."

Housekeepers are strongly advised to commence the use of Wilson's Fly Pads early, because a few flies killed in June would otherwise become a host by August.

"Kitty," said her mother, rebukingly, "you must sit still when you are at the table." "I can't, mamma," protested the little girl. "I'm a fidgetarian."

CONVICTS FEAR GHOST.

Murdered Woman's Apparition Said to Visit Prison.

The convicts in the Maryboro (Ireland) convict prison have been thrown into a panic by the ghost of a murdered woman which is alleged to have visited her murderer, who is serving a life sentence in the prison.

The man is a Scotchman named Grant, who was sentenced to death a few months ago in Dublin for the murder of a woman at the docks. His sentence was commuted by the Lord Lieutenant to penal servitude for life, and since then he has been in Maryborough Prison.

On Sunday the wardens were startled by terrible shrieks from Grant's cell, and when they rushed to see what had happened they found the man bathed in perspiration, and in a state of abject terror.

He declared that the ghost of the murdered woman had appeared in his cell, and had danced and gesticulated before him. He clung to the wardens, and implored them not

Ladies, Do You Know

WHY NOT?

"Say, paw," queried little Tommy Toddles, "what is a lambkin?" "A lambkin, my boy," answered Toddles, sen., "is a little lamb." "Then, paw," continued Tommy, "I s'pose the little nap you take after dinner is a napkin, ain't it?"

A Woman's Sympathy.

Are you discouraged? Is your doctor's bill a heavy financial load? Is your pain a heavy physical burden? I know what these mean to delicate women—I have been discouraged, too; but learned how to cure myself. I want to relieve your burdens. Why not end the pain and stop the doctor's bill? I can do this for you and will if you will assist me. All you need do is to write for a free box of the remedy which has been placed in my hands to be given away. Perhaps this one box will cure you—it has done so for others. If so, I shall be happy and you will be cured for 2c (the cost of a postage stamp). Your letters held confidentially. Write today for my free treatment. MRS. F. E. CURRAH, Windsor, Ont.

Mrs. Howard—"The walls of your apartment are very thin, aren't they?" Mrs. Coward—"Oh, very! We could actually hear our neighbors having celery for dinner last night."

Help your children to grow strong and robust by counteracting anything that causes ill-health. One great cause of disease in children is worms. Remove them with Mother Graves' Worm Exterminator. It never fails.

She—"I think it very strange that man was made first." He—"Quite the natural order. Money has to be made before a woman can spend it."

Don't ignore the few house flies you see in June. Unless you commence using Wilson's Fly Pads early your house will be overrun by them in midsummer.

If wishes were horses there wouldn't be any room in the world for automobiles.

RICH AND POOR ALIKE use Painkiller. Taken internally for cramps, colics and diarrhoea. Applied externally cures sprains and swollen muscles, etc. Avoid substitutes, there is but one "Painkiller"—Perry Davis—25c and 50c.

SLIGHTLY MIXED.

It was the final day of school. And the friends of Willie Wise Were out in force expecting to See Willie swipe the prize.

When Willie stood up to recite: He said, with outstretched hands: "Under the spreading blacksmith tree The village chestnut stands."

A Medicine for the Miner's Pack.—Prospectors and others going into the mining regions where doctors are few and drug stores not at all, should provide themselves with a supply of Dr. Thomas' Electric Oil. It will offset the effects of exposure, reduce sprains, and when taken internally will prevent and cure colds and sore throat, and as

the question,

Bobby?"

His brother Tommy

Our only safeguard is really to find the man who feeds his hens properly, and takes precautions to secure the flavor of the eggs. He should certainly be encouraged by getting a high price. The bad fellow is encouraged, as well as the good fellow, under ordinary conditions.

CROP BETWEEN TREES.

Dealing with the treatment of a peach orchard for the first season, a New Jersey bulletin, No. 219, says that most any vegetable crop may be grown between the trees the first summer, without damage to the orchard, and it usually proves to be of indirect benefit. The truck crop is likely to receive attention in the form of good cultivation, and this is of much value to the trees. When the orchard is not planted with some marketable crop, the cultivation is seldom as well done.

Such crops as tomatoes, melons, sweet corn or beans may be grown successfully in the young peach orchard, and, under average conditions, will at least pay the cost of the cultivation of the orchard for that season. Upon soils which have received good treatment in the form of fertilization and cultivation, previous to the setting of the trees, the truck crop will often pay the expense of putting out the orchard, in addition to the cost of the summer cultivation.

In the northern part of the State, it is stated, peaches are often grown upon stony soils, and under conditions which do not encourage the growing of truck crops, and the young orchard is often planted to the common dent corn, which will also pay for the expense of the summer cultivation, under average conditions. There is one precaution to be kept in mind in this practice, and that is not to plant the corn too close to the trees, as it shades them, and encourages too upright a growth.

FEEDING YOUNG CHICKS.

Rations for young chicks, from the time they come from the shell, are given by A. G. Gilbert, C.E.F., Ottawa, as follows:

First Day.—Little or no food is required. Towards end of day, a few stale breadcrumbs may be fed.

Second Day.—Stale bread soaked in milk and squeezed dry, may be given in small quantity. Feed a little at a time, and leave none on the platform. A little hard-boiled egg, finely cut up, may be added, with benefit. Continue this for a day or two, and add granulated oatmeal; finely-crushed wheat may be added to the foregoing with advantage. After 14 days, give whole wheat, in small quantity at first.

As the chicks grow older, they should be given a mash composed of stale bread, shorts, corn meal, ground meat, etc. Finely-cut bone or meat will be found a great incentive to growth at this stage. On the chickens becoming eight weeks of age, their rations may be dropped to three per day. Care should be taken that they are generously fed at last ration. For drink, give skimmed milk and water.

The wisdom of the world has always come from the people who did not fear being called fools. Teacher (angrily): "Why don't you answer the question, Bobby?" His brother Tommy (answering for him): "Please, sir, he's got a permit in his speech."

tal functions and when it goes out of order the whole system clogs in sympathy. The spirits flag, the mind droops and work becomes impossible. The first care should be to restore healthful action of the stomach and the best preparation for that purpose is Parmelee's Vegetable Pills. General use for years has won them a leading place in medicine. A trial will attest their value.

ILLICIT DIAMOND BUYING.

Buyer Deals in Stolen Gems—Fascination of Game.

A good deal was heard during a recent prominent criminal prosecution about illicit diamond buying in South Africa. The illicit diamond buyer deals in what are called "gonivahs," or stones which are known to have been stolen or otherwise dishonestly come by. Between him and the actual thief, the raw Kaffir working in the mines, there may be as many as three or four intermediaries, each of whom, under the Diamond Acts, is guilty of the whole crime, and liable to penal servitude up to fifteen years, but the stones must be found on the person or in the possession of the suspect before a conviction can be obtained. It is here where the most exciting and fascinating part of the whole business comes in, but, as the profit is fairly commensurate with the risk, few are found to resist the temptation when it comes their way. Many, indeed, are those who have found fortune in South Africa and honor and dignity elsewhere who can look back without a shudder to their early days, when perhaps a matter of minutes has made all the difference to them between the broadcloth of the millionaire and the canvas of the convict. Nay, those few moments have often decided who should wear the broadcloth and who the canvas, and many are the cases of blackmail and numerous intrigues that have arisen therefrom, more than once resulting in murder.

A stitch in time saves nine, and every house fly killed early saves a thousand at least later on. Wilson's Fly Pads will kill many times more flies than any other article.

HIS TROUBLE.

Bing: "Yes, that's old Spriggings. Half-a-dozen doctors have given him up at various times during his life."

Wing: "What was the matter with him?"

Bing: "He wouldn't pay his bills."

ISSUE NO. 24-09.

On Sunday the wardens were startled by terrible shrieks from Grant's cell, and when they rushed to see what had happened they found the man bathed in perspiration, and in a state of abject terror.

He declared that the ghost of the murdered woman had appeared in his cell, and had danced and gesticulated before him. He clung to the wardens, and implored them not to leave him.

He has had similar attacks of terror twice since then, and the panic is spreading to the other convicts.

Only those who suffer from Piles can know the agony, the burning, throbbing, shooting, stabbing pains which the ailment causes, and the way it wrecks the sufferer's life.

Zam-Buk is blessed by thousands who used to suffer from piles, but whom it has cured. One such grateful person is Mrs. Elizabeth Taylor, of Greenwood Avenue, Toronto. She says:—"For four long years I suffered acutely from bleeding piles. During that time I spent an immense amount of money on 'remedies' and doctor's prescriptions but got no case. Zam-Buk was different to everything else I had tried, and it cured me. I am grateful for the cure, and as I have never had piles since, I know the cure is permanent."

Another thankful woman is Mrs. E. A. Gardiner, of Catalina, Trinity Bay. She says:—"In my case Zam-Buk effected a wonderful cure. For twelve years I had been troubled with blind, bleeding, and protruding piles. I had been using various kinds of ointments, etc., but never came across anything to do me good until I tried Zam-Buk, which cured me. That this may be the means of helping some sufferers from piles to try Zam-Buk, is the wish of one who has found great relief."

Zam-Buk is a purely herbal balm and should be in every home. Cures cuts, burns, bruises, eczema, ulcers, blood-poisoning, prairie itch, sunburn, blisters, sore feet, summer sores, and all diseases and injuries of the skin, etc. All druggists and stores at 50c. box, or from Zam-Buk Co., Toronto, for price.

A Medicine for the Miner's Pack.—Prospectors and others going into the mining regions where doctors are few and drug stores not at all, should provide themselves with a supply of Dr. Thomas' Electric Oil. It will offset the effects of exposure, reduce sprains, and when taken internally will prevent and cure colds and sore throat, and as a lubricant will keep the muscles in good condition.

WANTED.

PANTRY WOMAN, liberal wages, and girls for dining-room work, wages \$15.00 per month. Apply "The Welland," St. Catharines.

AGENTS WANTED: You can make more money selling our perfumes, Toilet Requisites, Teas, Coffees, Spices, Etc., than in any other legitimate way. Excellent opportunity for energetic men and women. THE HOME SPESIALTIES CO., Toronto, Canada.

Wanted. Write me for prices and market conditions. WM. GRAHAM, Dealer in Wool only, 120 George St., Toronto.

Dyeing! Cleaning!

For the very best send your work to the "BRITISH AMERICAN DYEING CO." Look for agent in your town, or send direct. Montreal, Toronto, Ottawa, Quebec.

Saskatchewan Farm Lands

I have open prairie lands suitable for grain growing, none better in America. Also tracts in bluff country for grazing or mixed farming. The richest soil on earth. These lands are on a new branch line and very low in price. Write for particulars.

THE GATES CARRIED AWAY

Three Boats Swept Down and Badly Damaged at Sault Ste. Marie.

A despatch from Sault Ste. Marie, Ont., says: On Wednesday afternoon the Canadian Soo locks were practically put out of commission by one of the worst accidents that ever happened in marine circles in the Soo or vicinity. At present the water from Lake Superior is pouring through in a torrent, and it will probably be a month before the locks are again available for marine trade. Three boats, the Assiniboia of the C. P. R. Line; the Perry G. Walker of the Gilchrist fleet, and the Crescent City all figured in the accident. The overflow of water threatens to wash out the piers at the foot of the locks. At 2 on Wednesday afternoon the Assiniboia was in the locks, bound down; she was followed by the Crescent City. The Walker was coming up the river, presumably to lock through on an up trip. Just as the Crescent was entering the canal, and before the gates could be closed at the upper end, the Walker crashed into the lower gates, breaking them and allowing the Assiniboia and Crescent to rush down with the overflow of water.

The Assiniboia missed the Walker, barely grazing her side, but the Crescent dashed into her and received a hole in her side six feet square. The Walker was also considerably damaged. The Crescent and the Assiniboia proceeded to the Michigan side, where both now lie. The Assiniboia seems to have suffered minor injuries, while the Crescent is now lying on the bottom. The Walker reached the centre of the river and grounded, and was later towed to the Michigan

side by two tugs. Her injuries are not yet known.

Passengers on the Assiniboia are not yet aware how close they came to death. Had the boat turned turtle in the locks not a soul would have escaped.

A movable dam at the head of the locks is being placed in position at the present time in an endeavor to have the locks repaired, but since it has not yet been tried there is some doubt as to its effectiveness. The four large gates have been swept away, and there remain only the frail emergency gates, which are not of much use, providing the dam refuses to work.

The accident will not, of course, seriously delay navigation as the United States and Canadian canals are open to ships of either nation, and the business will be done entirely through the United States locks till repairs are made.

NOT SO SERIOUS.

A despatch from Ottawa says: A telegram received at the Department of Railways and Canals on Thursday evening from Mr. J. W. L. B. Ross, superintending engineer at Sault Ste. Marie, would indicate that the damage to the canal is not quite so serious as at first estimated. The auxiliary gates and the pair of guard gates were found to be safe, and this no doubt accounts for the engineer's expectation that repairs will be effected within a short time. Mr. Ross wired to the Acting Deputy Minister, Mr. L. K. Jones, "The lock may be ready by Monday night, but further delay is possible."

Hon. Mr. Graham accordingly left for the "Soo" at 1.10 Friday morning.

eyes, and where Roy had the figure eight, Peter had a nine.

Roy went over his own work again and saw that it ought to be a nine, so without thinking much more about it, he changed his own work and put down the nine where he had had the eight.

Being in a hurry, he did not make a very good nine. It was hunch-backed and stooped over, with a big head, that seemed to be hanging down. But he turned in his paper, and hurried out and played marbles till dark.

After supper that evening he began to think about the examples again, and he remembered the figure nine that he had put down in place of the eight. He remembered how it looked—how it was bent over, and how it hung its head, as if it was ashamed of something. He kept thinking about it, and even after he had gone to bed the figure stood there before his eyes, looking mean and sorry.

The more he thought about it the more it seemed to him that he had made the figure lie, when it did not want to, and had not meant to. That was why it looked so mean and ashamed.

The first thing the next morning Roy went straight to his teacher. "Please may I change one of the answers in my examination paper?" he asked.

THE WORLD'S MARKETS

REPORTS FROM THE LEADING TRADE CENTRES.

Prices of Cattle, Grain, Cheese and Other Dairy Produce at Home and Abroad.

BREADSTUFFS.

Toronto, June 15.—Flour—Ontario wheat 90 per cent. patents, \$5.50 to \$5.60 to-day in buyers' sacks outside for export; on track, Toronto, \$5.75 to \$5.80; Manitoba flour; first patents, \$6.20 to \$6.40 on track, Toronto; second patents, \$5.80 to \$6, and strong bakers', \$5.65 to \$5.70 on track, Toronto.

Manitoba wheat—No. 1 Northern \$1.34, Georgian Bay ports; No. 2 at \$1.31½ and No. 3 at \$1.30.

Ontario wheat—No. 2, \$1.35 to \$1.40 outside.

Barley—Feed, 62 to 63c outside. Oats—No. 2 Ontario white 60 to 61c on track, Toronto, and 58 to 58½c outside. No. 2 Western Canada oats 61½c, and No. 3 60½c, Bay ports.

Peas—Prices nominal. Rye—No. 2, 74 to 75c outside. Buckwheat—No. 2, 70c outside. Corn—No. 2 American yellow, 83c on track, Toronto; No. 3 82½c on track, Toronto; Canadian yellow, 78½ to 77½c on track, Toronto. Bran—Manitoba, \$23.50 to \$24 in sacks, Toronto freights; shorts, \$24.50 to \$25, Toronto freights.

COUNTRY PRODUCE.

Apples \$4 to \$5 for choice qualities, and \$3 to \$3.50 for seconds.

Beans—prime, \$2, and hand-picked, \$2.15 to \$2.20 per bushel. Maple syrup—95c to \$1 a gallon. Hay—No. 1 timothy \$13 to \$13.50 a ton on track here, and lower grades \$11 to \$11.50 a ton.

Straw—\$7.50 to \$8 on track. Potatoes—Car lots, 90 to 95c per bag on track.

Poultry—Chickens, yearlings, dressed, 16 to 17c per lb; fowl, 12 to 14c; turkeys, 16 to 18c per lb.

THE DAIRY MARKETS.

Butter—Pound-prints, 18 to 19c; tubs and large rolls, 15 to 16½c; inferior, 14 to 15c. Creamery rolls, 21 to 22c, and solids, 18 to 19c.

Eggs—Case lots, 18½ to 19c per dozen.

Cheese—Large cheese, old, 14 to 14½c per lb. and twins 14½ to 14½c. New quoted at 12½c for large and 13c for twins.

HOG PRODUCTS.

Bacon, long clear, 13¼ to 13½c per lb in case lots; mess pork, \$23; short cut, \$25 to \$25.50.

Hams—Light to medium, 15½ to 16c; do., heavy, 14 to 14½c; rolls, 12½ to 12½c; shoulders, 11½ to 12c; backs, 17½ to 18c; breakfast bacon, 16½ to 17c.

Lard—Tierces, 14c; tubs, 14½c; rolls, 14½c.

BUSINESS AT MONTREAL.

Montreal, June 15.—Oats—No. 2 Canadian Western, 62c; extra No. 1, 61½c; No. 1 feed, 61½c; No. 3 Canadian Western, 61c. Barley—No. 2, 72½ to 74c; Manitoba feed barley, 67½ to 68c; buckwheat, 68½ to 70c. Flour—Manitoba Spring wheat patents, firsts, \$6.50 to \$6.50; do., seconds, \$5.80 to \$6; Manitoba strong bakers', \$5.60 to \$5.80; Winter wheat patents, \$6.

A BANK CLERK SHOT.

Serious Outcome of Practical Joking at Saskatoon.

A despatch from Saskatoon, Sask., says: An accident which may have a fatal ending, and which was the result of a practical joke, happened on Thursday night. Walter A. Sherwood, teller in the Bank of Nova Scotia, with a party of friends, went across the river to have some fun with a party of other banks clerks who are camped there. Sherwood and his companions began playing pranks around the tents, letting down the ropes and similar things. A few minutes later a shot was fired from inside one of the tents, and Sherwood dropped, terribly wounded in the stomach. R. C. Lane, a particular friend of his, fired the bullet with the intention simply of frightening the party away. He has been placed under arrest, and Sherwood is in the hospital in a very dangerous condition.

BANK MANAGER DISAPPEARS.

Mystery Shrouds Fate of Saskatchewan Man.

A despatch from Grenfell, Sask., says: Excitement has been caused in the town by the mysterious disappearance of James Young Thompson, manager of the Grenfell Investment Company, bankers. Sunday, June 6, Thompson engaged a horse and buggy to drive to the home of Skilliter, a farmer living seven miles south-east of this town. But about five o'clock he turned up at the residence of Mr. Thornton, Indian agent, living about seventeen miles north-east of Grenfell. Thomson informed Thornton that he had driven out to get a bath in Crooked Lake, which is three-quarters of a mile from Thornton's. He left the horse and buggy with Thornton, and walked to the lake, and disappeared. Sergt. Besonge and W. Peel made a thorough examination of the bank, and report that everything is in its usual shape.

ONTARIO BONDS SELL WELL.

Treasurer Received Subscription for \$100,000 Block.

A despatch from Toronto says: Ontario's latest issue of bonds is selling like the proverbial hot cakes. Hon. A. G. Matheson, the Provincial Treasurer, who is the chief salesman of the securities, announces that on Wednesday a block of \$100,000 worth was subscribed by one private individual. There were also a number of subscriptions for smaller amounts. The Government is, indeed, receiving more applications for small blocks of this loan than it did for the earlier issue placed on the market in the same manner. There have been a number of enquiries regarding the loan from persons in Boston, New York and elsewhere. Hon. Mr. Matheson is well pleased with the progress made toward raising the \$3,500,000 required by the province.

\$125,000 FIRE IN QUEBEC.

Mills and a Number of Dwelling Houses Destroyed.

A despatch from Quebec says: A serious fire broke out shortly after noon on Wednesday in the mill and lumber and wooden house district of St. Roch's. By one

YOUNG FOLKS

THE FIGURE THAT LIED.

Roy Marshall had been in school nearly three years, and almost all the time he liked it. It was fun to read and write, and geography was easy. But the number work was not like the other studies. It was a good deal harder, and he had to work longer at his lessons. Peter Greenwood, who sat just in front of him, got on much better than Roy did in the number work, and this made Roy unhappy, for always before, in the reading and writing and other things, he had kept ahead of Peter. Roy could not see how it was that Peter could add up long columns of figures and multiply and divide, and always get the right answer, when he himself worked just as hard, and even harder, and often got a wrong answer.

One day the teacher, looking over Roy's shoulder at his paper, pointed out a mistake he had made, and said, as she turned away, "Remember, Roy, figures do not lie."

It seemed a funny thing to say, and Roy thought about it a good deal. Figures must be very good if

and always get the right answer, when he himself worked just as hard, and even harder, and often got a wrong answer.

One day the teacher, looking over Roy's shoulder at his paper, pointed out a mistake he had made, and said, as she turned away, "Remember, Roy, figures do not lie."

It seemed a funny thing to say, and Roy thought about it a good deal. Figures must be very good if they always told the truth. He wondered if it was easy for them. He tried always to tell the truth himself, but sometimes it was not easy. Once or twice he had been punished for things he had done, and had told the truth about, when it had seemed almost as if he would not have been punished if he could only have told alie about it. But still he knew how his father and mother felt about it, and so he did his best to tell things just as they were.

But figures must be strange things if they never told a lie. Perhaps they were real and alive, like himself, and had to do things sometimes that were hard and that they did not like to do. At any rate, he thought about it a good deal.

The spring examinations came in March. Roy knew it weeks ahead, and he knew, too, that he ought to be reviewing the work he had gone over; but it was just marble-time then, and it was hard to stay indoors and study when everybody else was out playing marbles.

The examination in number work seemed to Roy easier than he had thought it would be. He did all of the first six examples, and was pretty sure he had got them right. But the seventh was a hard one. He worked and worked on it, and still he could not do it, so he skipped that and did the others, and then went back. He tried and tried again, but it would not come out right.

Then, when he was very tired, he looked up just as Peter Greenwood asked to leave his seat for a drink of water. Peter left his paper on his desk, and although Roy did not intend to look, he could not help seeing some of the examples. Number seven was right before his

and sorry. The more he thought about it the more it seemed to him that he had made the figure lie, when it did not want to, and had not meant to. That was why it looked so mean and ashamed.

The first thing the next morning Roy went straight to his teacher. "Please may I change one of the answers in my examination paper?" he asked.

"Why, my dear boy," she said, "I couldn't let you do that. It wouldn't be fair. If you have looked up the answer out of school you must not change it now. That would not be right."

"Oh, yes'm, it would because one of my figures lied," said Roy, eagerly. "He didn't mean to, but made him; but I didn't mean to, either."

"Why child, what do you mean?" Then Roy told the teacher all about it; how he had not got the right answer himself, and how he had seen Peter's paper, and put down the figure he had seen there.

The teacher laughed and hugged Roy the way his mother did sometimes. Then she took out his examination-paper, and where the poor, mean-looking figure nine had stood she put a great big eight that stood up so straight and looked so strong and honest that anybody could see at a glance that he was telling the truth, no matter if he had made a mistake.

And now Roy knows that if figures ever lie it is not because they want to, but because some one else makes them.

MOSQUITOES KILL NINETY.

Outbreak of Malaria in Northern Orange Colony.

A despatch from Cape Town says: The heavy rainfall has caused the overflow of the Orange River, in the Gordonia northern district. This has resulted in the breeding of swarms of mosquitoes leading to a serious outbreak of malaria. Three-quarters of the population are affected and ninety deaths are reported.

GREATEST OF WAR FLEETS

Magnificent Spectacle Witnessed by Delegates to Press Conference.

A despatch from Portsmouth, England, says: The delegates to the Imperial Press Conference, who spent Saturday here as the guests of the admiralty, witnessed a naval spectacle that represents a concentration of sea-power unparalleled in the history of the world.

Stretched out in seven lines in the far-famed Roadstead, and extending from Cowes Road to the sea forts guarding the entrance to Spithead, the visitors saw the "war head" of the British navy, that is to say, that section of the fleet which always is fully manned and equipped in readiness for instant action. Of the 144 ships, estimated to be worth, all told, something like \$450,000,000, that had assembled for Saturday's manoeuvres, not a single one had been especially commissioned for the occasion.

Among the 24 battleships were seven Dreadnoughts, while supporting these lines of capital ships

lay 21 cruisers, thirteen scouts and auxiliaries, 48 torpedo-boat destroyers and 35 submarines. Had they bands playing, the scene was full have formed a double line 18 miles long.

All the vessels were dressed with thousands of flags, and with the crews on deck manning ship and the bandsp laying, the scene was full of animation and color.

A salute from Nelson's old flagship, the Victory, announced the arrival of the Admiralty yachts, bearing the lords of the Admiralty and the newspaper guests. After traversing the lines of the fleet, the visitors went on board the Dreadnought and witnessed a sham attack of submarines and destroyers on the battleship. The sea front of Portsmouth was black with masses of spectators and the Roadstead was filled with steamers thronged with sightseers from all parts of the kingdom.

BUSINESS AT MONTREAL.

Montreal, June 15.—Oats—No. 2 Canadian Western, 62c; extra No. 1, 61½c; No. 1 feed, 61½c; No. 3 Canadian Western, 61c. Barley—No. 2, 72½ to 74c; Manitoba feed barley, 67½ to 68c; buckwheat, 69½ to 70c. Flour—Manitoba Spring wheat patents, firsts, \$6.50 to \$6.50; do., seconds, \$5.80 to \$6; Manitoba strong bakers', \$5.60 to \$5.80; Winter wheat patents, \$6.75; straight rollers, \$6.50 to \$6.60; do., in bags, \$3.15 to \$3.20; extra, in bags, \$2.65 to \$2.80. Feed—Manitoba bran, \$22 to \$23; do., shorts, \$24 to \$25; pure grain mouille, \$33 to \$35; mixed mouille, \$28 to \$30. Cheese—Westerns, 11½ to 12c, and easterns, 11½ to 11¾c. Butter—Finest creamery 22½c. Eggs—19 to 20c per dozen.

UNITED STATES MARKETS.

Minneapolis, June 15.—Wheat—July, \$1.30½; Sept., \$1.11½ to \$1.11½; Dec., \$1.08½; cash, No. 1 hard, \$1.35 to \$1.35½; No. 1 Northern, \$1.30½; No. 2 Northern, \$1.32 to \$1.32½; No. 3 Northern, \$1.29½ to \$1.31½. Flour—First patents, \$6.40 to \$6.60; second patents, \$6.20 to \$6.50; first clears, \$5.05 to \$5.25; second clears \$3.65 to \$3.85. Bran—In bulk, \$23.50 to \$24.

Chicago, June 15.—Cash wheat—No. 2 red, \$1.60; No. 3 red, \$1.56½; No. 2 hard, \$1.31 to \$1.32; No. 3 hard, \$1.29 to \$1.31; No. 1 Northern, \$1.32 to \$1.33; No. 2 Northern, \$1.32 to \$1.33; No. 3 Northern, \$1.30 to \$1.32; No. 3 Northern, \$1.24 to \$1.28. Corn—No. 2, 75½c; No. 2 white, 76c; No. 2 yellow, 75½ to 75¾c; No. 3, 75½c; No. 3 white, 76c; No. 3 yellow, 75½ to 75¾c; No. 4, 74 to 74½c.

LIVE STOCK MARKETS.

Montreal, June 15.—Prime beeves from 6 to 7½c per lb. Pretty good animals sold at 5 to 5½c; milkmen's strippers at 3½ to 5c per lb. Milch cows from \$25 to \$60 each; calves, \$2.50 to \$8 each, or 4c per lb.; sheep, 5 to 5½c per lb.; lambs, \$4 to \$6 each. Good lots of fat hogs about 8½c per lb.

Toronto, June 15.—The demand for butcher cattle is still strong and light exporters were freely bought for killing purposes. \$6 was paid for the latter class, whilst choice butchers were firm at \$5.60 to \$5.75. The top price paid for exporters was \$6.50, but well finished cattle of this class were firm at \$6.25 to \$6.40. Stockers and feeders continue in strong demand, with only a limited supply on offer. Milkers and Springers—Firm and unchanged. Sheep and lambs—Steady at last quotations. Calves—Firm. Hogs—Selects, \$7.50 f. o. b., and \$7.75 fed and watered.

REVENUE INCREASING.

Customs, Excise and Post Office Show Large Gains.

A despatch from Ottawa says: The financial statement for May shows the revenue for the first three months of the year to have been \$13,613,974, which is an increase of more than a million and three-quarter dollars over the collections in the same time the year before. The increase is principally due to enlarged customs collections, which show an increase of over a million dollars during the three months. Excise collections increased by about a hundred thousand dollars, and postoffice revenue by the same.

\$125,000 FIRE IN QUEBEC.

Mills and a Number of Dwelling Houses Destroyed.

A despatch from Quebec says: A serious fire broke out shortly after noon on Wednesday in the mill and lumber and wooden house district of St. Roch's. By one o'clock the lumber mill of Belland and Gignac and several adjoining dwellings were in flames. People for many blocks around became panic-stricken, encumbering the streets with their household goods. The loss will run about \$100,000 or \$125,000. The heaviest losers are the Belland and Gignac lumber mills and the Parisian Corset Co., both practically destroyed. Twenty or thirty houses were burned.

FIREMAN WAS KILLED.

Others Injured by Collapse of a Building at Halifax.

A despatch from Halifax says: Halifax was threatened with a big fire on Wednesday afternoon, but the department succeeded in confining it to the structure in which it started. Nevertheless, it cost the life of one fireman, and severe bruises and narrow escapes from death by half a dozen others in the collapse of the building. The blaze was in the wooden building occupied by the Nova Scotia Fur-fishing Company, adjoining their main brick structure. After the fire had been got under control the wooden building collapsed while a score of firemen were at work within it, or on the roof. A mass of debris fell upon the men, but all were dug out with more or less injuries, excepting James Tynan, who was at work with the hose when the roof fell in. He was struck by a beam, and instantly killed.

KILLED IN COLLISION.

Mr. McGrath, of Schreiber, Buried Under Engine.

A despatch from North Bay says: Two work trains on the C. P. R. met in a head-on collision on Wednesday morning, near Dalton, 200 miles west of North Bay, wrecking both trains and causing a delay of eight hours to traffic. A workman named McGrath, of Schreiber, in charge of one of the work trains, was buried beneath the engine and killed. George Coleman, train-master, White River section, received severe injuries, but will recover. A number of others received minor injuries, scratches and bruises.

CONVICT USED AXE.

Desperate Fight With Guards at St. Vincent de Paul.

A despatch from Montreal says: Details have leaked out of a desperate fight which occurred at St. Vincent de Paul Penitentiary last Saturday, between a Polish convict named Stonislas Ava, who attacked the guards with an axe, and was, after a struggle, shot in the arm. Ava is serving a twelve-year sentence, and as soon as he is out of the hospital will have to face the courts on another charge.

Forest fires are causing enormous destruction in New Brunswick and along the line of the Algoma Central Railway in Ontario.

T. EARTHQUAKE IN FRANCE.

Eight Persons Killed at Lambese, near Aix.

A despatch from Marseilles, says: Two earthquake shocks, running from northeast to southeast, were felt through the Riviera between 9 and 11 o'clock on Friday evening. While the damage done here was not great, reports from smaller cities show that the effects of the second shock was serious. At Lambese, a town of 2,500 inhabitants, twelve miles northwest of Aix, several houses collapsed and eight persons are reported to have been killed. Troops were immediately hurried there to search in the debris for possible dead or injured persons. Reports received later in the night indicated that the shocks had been felt practically throughout the whole of the south of France. They equalled in severity those of the earthquake of 1884. The violence seemed to have been greatest in the vicinity of Toulon. Warships in the harbor there were displaced from their moorings.

WRECKED OFF FLORES.

Cunard Liner Slavonia Stranded in the Azores.

A despatch from New York says: Through a private cable message, news reached New York on Friday afternoon that the Cunard liner Slavonia, bearing 110 cabin passengers and 300 in the steerage, stranded on Friday off Flores Island, of the Azores group. After having steamed successfully more than halfway across the Atlantic the vessel, which left this port for Naples on June 3, is almost a complete wreck, but through the timely aid rendered by the North German Lloyd and Hamburg-American liners that were nearby, every passenger, according to last reports here, was taken off in safety.

PLUNGED INTO WELL.

Thomas Marshall Commits Suicide at St. Andrews, N. B.

A despatch from St. Andrews, N.B., says: Thos. Marshall leaped out of bed at 2 o'clock on Wednesday morning, declaring he would drown himself. He ran towards the well in the shed, his wife following him. She tried to restrain him, and there was a struggle. Finding she could not dissuade him, and fearing that she would be dragged into the well, she let him go, and he plunged in, head foremost, and was drowned. He had been in poor health, and it is thought his troubles had driven him crazy. A wife and child survive.

TWO ENGINEERS KILLED.

Collision on the Great Northern Near Vancouver.

A despatch from Vancouver, B. C., says: The Great Northern Railway express from Seattle, due at Vancouver at 4 p.m., running late, collided head-on with the Guichon Limited, south-bound near Burnaby Lake, five miles from Vancouver, at half-past 4 on Thursday afternoon. Ralph McPheeter and Robert Nichol, two engineers, were killed. The fireman on the Guichon train, a stranger, was buried in the wreck and is dead. C. C. Cornwall, a passenger, was badly injured in the back and taken to the hospital unconscious. Twelve passengers were injured.

ASQUITH GIVES ADVICE

British Premier Tells the Press Delegates What Is Their Highest Duty.

A despatch from London says: The week's brilliant functions in connection with the Imperial Press Conference reached a climax on Friday night with the Government's dinner, at which Earl Crewe, Colonial Secretary, presided. Premier Asquith, the Archbishop of Canterbury, Col. Seeley, Lord Cromer, Lord Northcote and other distinguished guests were present.

The Premier proposed the toast to the guests and with high eloquence he claimed that there ought to be a sense of interdependence in the partnership between the Governments and the press. It was the duty of the Imperial press to promote in the highest forms and for its worthiest purposes a spirit of Imperial unity, and he referred to the one voice and settled conviction wherewith statesmen of both parties had dealt with the question of Imperial defence.

Mr. Langlois, who first responded, speaking for two and a quarter millions of French-Canadians, declared that in all crises Quebec would stand by the Empire. There would be no discordant voice.

Should any occasion arise Canada would be united in a mighty whole to defend the common cause. French-Canadians were proud of the British flag, which floated over a peaceful and contented people in Quebec. (Applause.)

Speaking in French, Mr. Langlois expressed pleasure at the entente cordiale and repeated that French-Canadians were grateful to Britain for safeguarding their religion, customs and liberties. He recalled with pride that in the dark days of 1812 French-Canadians saved Canada. What they had done in the past they could be relied on to do in the future.

Messrs. Cunningham and Fenwick responded for Australasia.

Earl Crewe said the Home Government would meet the overseas representatives as equals and allies. Nothing could be further from the Minister's thoughts than to dictate to them any policy or act. He thought the Imperial Press Conference would have effects as far reaching and beneficial as any conference that had been or would be held.

A FLOOD OF MOLTEN METAL

Three Bodies Burned to a Crisp at Wheeling, West Virginia.

A despatch from Wheeling, W. Va., says: In a horrible accident here on Wednesday night at least six men were burned to a crisp, four fatally injured and ten seriously hurt. Thirty others had narrow escapes. Shortly after eight o'clock a "slip" occurred in one of the furnaces of the Wheeling Steel & Iron Company. A force of workmen, numbering fifty, were gathered about the furnace making ready to drill in for the nine o'clock cast. Without a moment's warning there was a terrific roar and great masses of molten iron spurted from the furnace, sweeping down the workmen. Twenty or more were caught in the onrush. Six

men are known to have been caught by the hot iron, and their bodies burned to a crisp. Fourteen others were badly mutilated. Arms and legs were burned off, and some were showered from head to foot with white-hot metal. All the men were foreigners.

Frederick Zimmerman, manager of the furnace, was seriously burned in attempting to save some of the men from death. As one man was swept past him in the stream of molten iron, he reached forth and grasped the poor fellow's arm, which parted from the body, and the victim sank to a fiery death.

What caused the accident has not been definitely decided.

VOICE SHOT THROUGH AIR.

Heard a Hundred Miles by Wireless Telephone.

A despatch from Toulon, France, says: The trials of wireless telephone service between the cruiser Conde and land stations have shown satisfactory progress. The cruiser, although equipped with shorter poles than at the time of the previous experiments, was able to communicate on Wednesday at a distance of more than 100 miles. A few days ago conversation was carried on by the wireless system at a distance of 60 miles.

THROWN UNDER A ROLLER.

Thomas Riguey Killed by Horses Running Away.

A despatch from St. Mary's,

ang. was devastated by an earthquake on the nights of June 3 and 4. Two hundred and thirty people were killed and many others injured. The shock was accompanied by a tidal wave which swept away the native huts like cockleshells.

5,000 MASSACRED.

Raiders in the Trans-Caucasia Leave Death in Tracks.

A despatch to the Novoe Vremya, St. Petersburg, from Astara, trans-Caucasia, reports that 5,000 persons have been massacred by raiders in the Ardebil district, Province of Azerbaijan, Persia. The leading inhabitants have asked the Russian Consul to protect the people. The Consulate is full of refugees.

NATAL WILL ENTER.
Union of South African Colonies Now Assured.
A despatch from Durham, Natal, says: A referendum held to decide whether or not Natal should join the South African Union has resulted in favor of the juncture by a vote of 11,121 to 3,701. This assures the complete union of the South African colonies—the Transvaal, Cape Colony, the Orange River State and Natal. Practically the entire population of Natal is British, and the disinclination of a considerable element to enter the union was caused by fear that the confederation would be dominated by the Dutch.

THE DEADLY TOY RIFLE.
Boy Victim in Montreal—Shot Through the Heart.
A despatch from Montreal says: The toy rifle has claimed a second victim in Montreal within two weeks, Harold Davenport, sixteen years of age, being killed on Saturday night by the discharge of a .22-calibre rifle with which he and some boys were shooting in a yard at Point St. Charles. The bullet passed through his heart, killing him instantly. The previous victim was Gordon MacFarlane, son of the general passenger agent of the Dominion Line.

CIGARETTES ARE BARRED.
No One Allowed to Smoke Them in Seattle.
A despatch from Seattle, Wash., says: The new anti-cigarette law went into effect on Thursday night. It is the opinion of the Attorney-General's office that any person who has them in his possession is subject to fine and imprisonment. The Alaska-Yukon-Pacific Exposition police will enforce the law strictly. No one will be permitted to smoke a cigarette on the grounds.

PUT GRENADE IN FURNACE.
Many Killed in Lisbon Ammunition Factory.
A despatch from Lisbon, Portugal, says: An explosion occurred on Thursday night at the State ammunition factory at El Grozzo and five persons were killed and seventeen wounded. The explosion was caused by an employe inadvertently thrusting a charged grenade into the melting furnace.

CUT HER OWN THROAT.
Berlin Woman Commits Suicide While Insane.
A despatch from Berlin, Ont., says: Mrs. Peter Lantz, a woman about 50 years old, committed suicide on Wednesday evening at her home here by cutting her throat with a razor, after having tried to cut an opening into her heart. She had for some time shown signs of insanity. She leaves a husband and five children.

CUT HER OWN THROAT.
Berlin Woman Commits Suicide While Insane.
A despatch from Berlin, Ont., says: Mrs. Peter Lantz, a woman about 50 years old, committed suicide on Wednesday evening at her home here by cutting her throat with a razor, after having tried to cut an opening into her heart. She had for some time shown signs of insanity. She leaves a husband and five children.

It is said in London that a nade is contemplating a very generous financial offer to the Imperial Government for naval purposes. An English publisher accuses Mark Twain of appropriating, in his latest book, a chapter from a book by an English M. P. without mentioning the latter's name.

Charles Chaffee, convicted at Syracuse, N. Y., of stealing chickens, was sentenced to prison for life.

W. A. Gates of San Francisco stated at Buffalo that Japan had deliberately violated her agreement to restrict emigration to Canada.

The Board of Engineers appointed to investigate the proposed lakes-to-gulf deep waterway have reported to Congress that such a waterway is not desirable.

A man aged 86, near Sranton, Pa., shot his brother-in-law, aged 87, and then committed suicide.

There is some fear among the tariff framers at Washington that President Taft will veto the new tariff bill.

CROPS IN FINE SHAPE.

Good Fall of Rain and Warm Weather Has Prevailed.

A despatch from Winnipeg says: The weekly crop report of the Canadian Pacific Railway is to hand and is as favorable as ever. The condition of the crop is splendid. A considerable amount of rain has fallen during the past week. The weather remained warm with the exception of a few points, where there was rather a cool wave prevailing. Prospects were never better for a good crop up to the present time. Rosser reports wheat four inches high and barley just through the ground. At Burnside wheat is ten to twelve inches high and oats three to five inches. Various other points report wheat showing from three to seven inches.

TWO MILES OF CATERPILLARS.

C. P. R. Train Stalled Near Fredrickton Junction by Pest.

A despatch from St. John, N.B., says: A C. P. R. freight train which left here on Friday night was stalled near Fredrickton Junction by caterpillars, which covered the track an inch or more deep, for nearly two miles. The train crew had to shovel the track clear.

the previous experiment was made to communicate on Wednesday at a distance of more than 100 miles. A few days ago conversation was carried on by the wireless system at a distance of 60 miles.

THROWN UNDER A ROLLER.

Thomas Rigney Killed by Horses Running Away.

A despatch from St. Mary's, Ont., says: Thomas Rigney, a farmer, aged 53, met with a horribly painful death on Wednesday at Granton, a few miles from here. He was working in the field with a roller and the horses became frightened in some way and ran away. Rigney was thrown under the roller and sustained severe injuries, from which he died five hours later. He was one of the pioneers of this province.

A despatch to the Novoe Vremya, St. Petersburg, from Astara, trans-Caucasia, reports that 5,000 persons have been massacred by raiders in the Ardebil district, Province of Azerbaijan, Persia. The leading inhabitants have asked the Russian Consul to protect the people. The Consulate is full of refugees.

FADS AND FAN-IES.

Many long coats are seen in white serge.

Net is to play a leading part this season.

For run-around frocks nothing is more popular than serge.

Navy blue veiling with dots in velvet are a feature of the season.

The pompadours and Dresden silks are bewilderingly attractive.

Black collars on white serge suits are not so often seen as earlier in the season.

Messaline silk in exquisite Dresden patterns makes charmingly dainty underskirts.

Hand tucks and hand embroidery are favored to be found among the new embroideries.

FIRES IN NEW BRUNSWICK

Rains Alone Can Check Devastation, Says Crown Lands Department.

A despatch from Fredericton, N. B., says: Late on Thursday afternoon the Crown Land Office gave out the information that the wind has made the forest fires worse than they have been since the outbreak. On the Miramichi the situation becomes most serious. Men gathered from all sections of the county are doing their utmost in fighting the flames, but they seem to be beyond all control. The Crown Land Department is doing everything within its power, and sparing no expense, in putting every available man in motion to check the fires, but the work has evidently got beyond all human control. Word received at 6 o'clock on Thursday night says that rain alone can stop the fires and put an end to the destruction that is being wrought.

A telephone message from Napadogan is to the effect that some twenty miles of rich timber land along the line of the Grand Trunk Pacific is all on fire. Large forces of men are fighting the fires, which are on land owned by the New Brunswick Land Company and the Miramichi Lumber Company. The latter company on Thursday night sent out four hundred men from Boiestown to combat the flames. Fire is raging at Knowlan Settlement, Northumberland, and at Eo River, forty miles up river. In these districts the whole population are out working, strenuously fighting but with little result. From all sections of the country there come, but the one cry, "Rain, rain!" and unless rain comes soon the result will be most serious.

FOUND DISMEMBERED BODY

Mystery Surrounds Horrible Murder in New York City.

A despatch from New York says: The headless and dismembered body of a man done up in two packages, one containing the torso and the other the arms and legs, was found on Thursday night in charge of a 14-year-old boy who stood crying on the sidewalk of Oliver Street, at the side of Public School No. 1, a block south of Chatham Square. The dismemberment had apparently been done with a heavy, sharp knife and with a saw that worked smooth. Waste was evidenced by the unfinished character of the cuts at one edge of the stumps, and by the fact that the

butcher had not taken the time to undress the body. In severing the head the knife was used just at the base of the neck, cutting through the soft collar of the shirt, which ends in a ragged edge just where the collar would join it. The boy who had the bundle in his care gave a description of a man who he said had entrusted them to him. The man looked like a Jew. It is believed the murdered man was a Jew. Perhaps with the purpose of throwing the police on the wrong track, the words "Black Hand" had been printed on each bundle, crudely, in English.

Why Take Alcohol?

Are you thin, pale, easily tired, lack your usual vigor and strength? Then your digestion must be poor, your blood thin, your nerves weak. You need a tonic and alternative. You need Ayer's Sarsaparilla, the only Sarsaparilla entirely free from alcohol. We believe your doctor would endorse these statements, or we would not make them. Ask him and find out. Follow his advice. *J.C. Ayer Co., Lowell, Mass.*

The endorsement of your doctor will certainly greatly increase your confidence in Ayer's Pills as a family laxative. Liver pills. All vegetable. Ask your doctor about them.

ARAGO'S NOSE.

It Was Enormous In Size, but It Was Safely Anchored.

Emmanuel Arago, the French politician, was a nephew of the noted astronomer and was considered a handsome man, although his nose was extremely conspicuous. At one time he was traveling by train to Versailles when a child who was in the same car and who had watched Arago for some time with dilated eyes began to cry. In vain did the child's mother endeavor to calm the perturbed juvenile. The poor mother was in despair, and as the shrieks grew more and more piercing Arago felt bound to interfere and see what he could do. He said to the child:

"What ails you, my dear?"

Thus addressed, the child sobbed out, "Take off your nose."

Arago looked at the mother, who grew very confused and said:

"Ah, monsieur, excuse me—excuse my son."

"But, madame," said Arago, "what does he mean?"

The mother then explained that she had during the carnival taken her child to see a number of persons in masks and with false noses and he had become so excited that he could think of nothing else.

"By an unfortunate occurrence," she added, "we got into the same carriage as you, who no doubt for some good reason are prolonging the carnival. But you see what a deplorable result has followed. Let me then beg of you to have pity on a poor mother and take off your nose."

LIGHTNING.

Some Facts About This Mysterious Force of Nature.

Lightning is still more or less a mystery. We can imitate it on a small scale in the laboratory, but its gigantic manifestations in the sky and its wonderful vagaries make the wisest savants shake their heads. We know, at any rate, that lightning is the electric discharge at high tension between masses oppositely electrified. Every little particle of moisture in the air carries a charge, and when the particles coalesce in a cloud their electricity collects on the surface until the tension becomes enormous. If two clouds are oppositely electrified they will bombard each other until equilibrium is established between them. If the opposition is between the surcharged cloud and an object on the ground a terrific bolt passing between the earth and the sky will relieve the electric strain without regard to the well being of any creature that stands in the way.

A lightning flash often darts for miles through the air. It begins with a discharge between two adjacent particles. The next particle receives the shock and transmits it to its nearest neighbor, and thus it rushes on, zig-zagging along the line of least resistance until the unbalanced energies are restored to equality. The way of lightning is a crooked way when the path is long, because the distribution of the electric charges in the clouds is irregular. The positive seeks the negative and rushes to its embrace wherever it finds it.

The eye is not quick enough to unravel a lightning strike, but photography can do it to a certain degree, and photographs prove that the path of the discharge is a waving line. No discharge occurs until the tension has reached the breaking point—i.e., the point where the resistance of the air can no longer restrain the force of the gathering charge.

What might be called the inner structure of a lightning stroke is a marvel. Prof. Henry proved that every stroke is an alternating current, the oscillations occupying but a few millionths of a second, while the duration of the flash may be a considerable fraction of a second.

Grizzlies That Eat Violets.

In one locality the grizzly of the Rockies is found eating the fresh sprig of the dog-tooth violet and the green leaves of the spring beauties, while a few hundred miles farther on to the north or south, as the case may be, the grizzly doesn't touch them. Instead, he may be discovered munching at the young shoots of the shooting star down in the Bitter Root mountain country, for instance, among the towering peaks of the higher Rockies. Upon this question of locality, which is often overlooked or even ignored by nature writers, lies the solution of many warmly disputed points between those who tell the public at large all about nature and its animals.

Discouraging.

Lecturer on Art—Before I sit down I shall be happy to answer any questions that any of you may wish to ask. Gentleman in Audience—I have enjoyed the lecture much, sir, and have understood it all except a few technical terms. Will you please tell me what you mean by the words perspective, fresco and mickle-ajelo? (Lecturer sits down discouraged.)

Beware of Ointments for Catarrh that Contain Mercury.

as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo O., contains no mercury and is taken internally, acting directly on the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally, and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free.

Sold by Druggists. Price 75c per bottle.

Take Hall's Family Pills for constipation.

Moved by Mr. Anderson, seconded by Mr. Loyst, that the Treasurer reimburse the gaoler's residence with Mr. W. F. Hall. Carried.

Council adjourned till 1.30 p.m. Council resumed.

A deputation consisting of Provincial Inspector Cowie and P. S. I. Nesbitt, Rev. Mr. Cumberland, and Messrs. Nash, Maybee, Filson and Neilson waited upon the Council in reference to continuation class schools and addressed the Council.

Moved by Mr. Ruttan, seconded by Mr. Anderson, that the whole question of continuation schools be referred to the Committees on Education and Finance to evolve a plan as to districts and for financing the same in view of the present law and report fully. Carried.

A deputation, consisting of Ex-Warden Gallagher, and Ex-Warden Rankin, and Mr. Walker, of Frontenac, waited upon the Council in reference to a bridge across Mud Lake.

Moved by Mr. Gilmour, seconded by Mr. Anderson, that after hearing the deputation re Mud Lake Bridge, this Council take no action which will commit the County to the expenditure of any money. Carried.

Mr. Hambly presented the Second report of the Roads and Bridges Committee, which was read, and on motion was adopted.

On motion Council adjourned till to-morrow 9 a.m.

FOURTH DAY—FRIDAY.

Council met at 9 a.m. pursuant to adjournment. Warden in the chair. Members all present.

Minutes of yesterday were read, and on motion were confirmed.

Mr. Anderson presented the Second report of the County Property Committee, which was read, and on motion was adopted.

Communication from the Educational Department, showing High School grants payable for the school year ending June, 1909, to be: Napanee \$1289.20, Newburgh \$650.00, was read and filed.

An account, R. W. Kimmerly, for Committee services, \$4.50, was ordered to be paid.

Moved by Mr. Anderson, seconded by Mr. Lane, that the Warden issue a warrant for the sale of land for taxes when list completed. Carried.

Moved by Mr. Ryan, seconded by Mr. Anderson, that in as much as the relatives of Mrs. Edward Hinch are under the impression that they have paid the costs of her maintenance in the House of Industry at Kingston till her death, and desire to repay any amount paid by the County for her, the Clerk make the necessary inquiries thereto and report next session. Carried.

Moved by Mr. Ryan, seconded by Mr. Anderson, that the Corporation of Newburgh special grant road account be allowed to be overdrawn \$125.00 this year to assist in their extra expenditure on roads in the corporation connecting links of the County Road system and same amount to be deducted from the next appropriation. Carried.

Communication from the Ontario Municipal Association for the betterment of consumptives, was read and filed.

Communication from the Ontario Good Roads Association was again read.

Moved by Mr. Ryan, seconded by Mr. Gilmour, that the Warden and Councillor Dawson be a deputation to attend the meeting of the Association. Carried.

Account, J. F. Dawson, for Committee services, \$5.00, was ordered to be paid.

Account, C. Walker, for committee services, \$2.50, was ordered to be paid.

Account, Township Kaladar, A. & E., \$12.50, for work on Stony Creek bridge, was ordered paid.

On motion Council adjourned till 1.30 p.m.

Council resumed.

Account, Carscallen Bros., \$7.00, was on motion referred to the Finance Committee to report.

Mr. Ryan presented the report of the Finance Committee.

was adopted.

On motion Council adjourned till to-morrow 9 a.m.

FIFTH DAY—SATURDAY.

Council met at 9 a.m. pursuant to adjournment. Warden in the chair. Members all present.

Minutes of yesterday were read and on motion were confirmed.

The following accounts were ordered to be paid: Meng and Hambly, \$15.00; S. Gilmour, Committee services, \$3.00; W. G. Wilson, contingencies, \$13.90; C. Edgar, Committee services, \$2.50.

Moved by Mr. Dawson, seconded by Mr. Hambly, that the Chairman of County Property Committee, see that the insurance on the County buildings contain the usual lightning clause. Carried.

Moved by Mr. Hambly, seconded by Mr. Loyst, that the Council give North Fredericksburgh a special grant of \$150.00 to be expended on the road known as Close's Lane. Lost.

Moved by Mr. Loyst, seconded by Mr. Hambly, that the Council give a special grant of \$50.00 to Hay Bay ferry. Carried.

Moved by Mr. Lane, seconded by Mr. Kimmerly, that the usual grant of \$400.00 be made to the poor schools of the County, payable to the order of the Public School Inspector for distribution. Carried.

Moved by Mr. Walker, seconded by Mr. Burleigh, that the cleansing of the floors of the Court House and the fitting of a room on the main corridor for the use of Committees and the Road Superintendents and County Clerk be left in the hands of the Chairman of County Property Committee with power to act. Cd.

Moved by Mr. Anderson, seconded by Mr. Dawson, that the Warden Clerk and Treasurer be authorized to adjust and prepare the County Road accounts and forward to the Public Works Department in order to secure the Government share of the County Road expenditure for the year 1909. Carried.

Moved by Mr. Ruttan, seconded by Mr. Gilmour, that a grant of \$25.00 be made to the Lennox Agricultural Society and to the Addington Agricultural each. Carried.

Moved by Mr. Ruttan, seconded by Mr. Hambly, that the repairs of a portion of the Kingston Road and of the County Road fronting on the boundary between North Fredericksburgh and Napanee, be placed in proper condition and the expenditure to be paid by the County as expended and the adjustment to be left over until next session of the Council. Carried.

A By-law to allow the Treasurer to overdraw \$20,000 was read first time. On motion rule 38 was suspended in order to give the By-law its second reading, and the Council went into the Committee of the Whole on the second reading of the By-law. By-law was read second time and the blanks filled in, and on motion the Committee rose and reported the By-law read second time, and the report of the Committee was adopted.

Rule 38 was again suspended in order to give the By-law its third reading, and on motion the By-law was read third time, numbered 242, signed by the Warden and Clerk, sealed and finally passed.

On motion Council adjourned at the call of the Warden.

What "He's a Brick" Means.

The common phrase "He's a brick!" is first found in Plutarch. The expression implies any form of admiration. The Spartans, quick witted and noted for their repartee, were early trained in both schools. They were men of few words and fewer laws and embodied in short phrases their admiration, dislike or appreciation. Lycurgus was not only a man of few words, but quick action. On being asked, "Should Sparta be inclosed?" an invasion of the enemy being expected during the time of war, he replied, "A city is well fortified which has a wall of men instead of brick."

masses and with arms raised and had become so excited that he could think of nothing else.

"By an unfortunate occurrence," she added, "we got into the same carriage as you, who no doubt for some good reason are prolonging the carnival. But you see what a deplorable result has followed. Let me then beg of you to have pity on a poor mother and take off your nose."

"But, madame," said Arago, stupefied.

"A little more and my child will have convulsions," shrieked the mother. "Take off your false nose."

"But, madame," said Arago in despair, "that is impossible. This is not a false nose, but my own!"

"Impossible, impossible!" cried the agonized lady.

"Touch it," said Arago.

The lady gave a pull at Arago's nose, but it did not come off in her hand, as she had expected.

"A thousand pardons," she said, "but pray—oh, pray, hide it with your hat."

So Arago continued his journey with his nose in his hat, and the child's screams gradually subsided. Arago himself used to tell the story with much glee.

He Dazed Lew Wallace.

Shortly after the first success of "Ben-Hur" Lew Wallace had occasion to go over to London and one day picked up a pirated copy of the novel at a railroad newsstand. To his amazement he found the subtitle left off, a preface interpolated and one of the chapters rewritten. Of course he boiled with rage, and as soon as possible he called on the publisher. That gentleman coolly admitted his crime and told Wallace he thought the amended form better adapted to the British taste, doncherknow. His gall was so stupendous that the novelist was awed and went away without spilling his gore.

It Was Good Advice.

A wildly turbulent peasant was once a witness in a trial before Chief Baron O'Grady. The counsel, after pestering him for some time, put a question to him which reflected on the witness' character.

"If ye ax me that again I'll give ye a kick in the gob!" was the answer.

The counsel appealed to the court, stating that an answer was necessary to his client's case, ending up with the query, "What would your lordship advise me to do?"

"If you are resolved to repeat the question," replied the court, "I'd advise you to move a little from the witness."

The Poultice Is a Barbaric Relic.

The poultice is a barbarous relic of the days of witch burning. The typical home poultice is made of flaxseed. It is a soggy, unsavory, germ infested instrument of torture. Clapped upon the suffering baby's chest, it interferes with the poor child's breathing, infects his skin with the germs that cause pimples and boils and makes him unbearably uncomfortable and unhappy. The heat in the poultice is its only valuable feature. The dampness does damage, and the flaxseed is as inert as so much sawdust or breakfast food. Why not use hot water bags or, better still, hot cloths?—Delineator.

He Got the Teacher.

A man called at a grammar school in a large city to see one of the teachers and, uncertain just which was the room he wanted, noted the bell buttons in the main corridor. He pressed one of them. His surprise was great when soon after the sound of the gong children and teachers fled forth from the various rooms, all in orderly line and with no excitement or crowding. The visitor had pressed the button which called for the fire alarm drill practice.

THE CENTAUR COMPANY, NEW YORK CITY

Yet since those early days the town has been comparatively forgotten. Even yet it has not become a haunt of the tourist and the traveler, although each year a few visitors resort there, bringing back tales of this city that out-Nurnbergs Nurnberg. It is easily reached, being on a little branch line from the railway between Frankfurt and Munich.

She had asked him to come back and

A story is told of Quanah Parker, one of the old Comanche chiefs. Parker had been extremely valuable in bringing the Comanches into friendly relations with the whites. He found

Office—North side of Dundas Street, between
West and Robert Streets, Nanaimo. 4-17

household. He had his hand cut off. Yet since those early days the town has been comparatively forgotten. Even yet it has not become a haunt of the tourist and the traveler, although each year a few visitors resort there, bringing back tales of this city that out-Nurnbergs Nurnberg. It is easily reached, being on a little branch line from the railway between Frankfurt and Munich.

It is a place where the sightseer cannot go wrong, for everywhere is fascination. There are both statelyness and beauty. There are towering houses with crisscrossed fronts.

There are deep dungeons under the Rathaus, reached by stairways dripping with moisture, into which not a ray of light can enter, and in one of these dungeons some five centuries ago the men of Rotherburg placed the burgomaster who, more than any other in the long burgomasterial line, gave to the city power and wealth and prosperity. But they charged him with conspiring with the emperor and not only gave him no light, but edged their animosity by deliberately giving him no food. It is in all a fiercely dramatic story, for friends who were still faithful tunneled to the cell and madly cut through its prodigious wall and reached the prisoner, but only to find him dead.

Nowadays they treat unpopular burgomasters with more consideration. Each burgomaster is chosen for three years, and at the end of that time he is either elected for life or gives place to a successor. But an election for life does not give unchecked power, for it is a simple matter with these townfolk, if they tire of a life chosen mayor, to make him "so crazy with vexation," as it was expressed to me, that he is glad to resign and accept the pension that they palliatively offer. Only recently they thus got rid of one.—Robert Shackleton in Harper's Magazine

In the Days of Sir Allan MacNab. A Hamilton paper says the remains of Sir Allan MacNab will be removed from Dundurn Park to Holy Sepulchre cemetery, after resting in the former place for nearly seventy-five years.

Hardly so long. Sir Allan was still very much alive when The Toronto Examiner of June 16, 1847, said of him:

"Sir Allan MacNab is a great man. Speaker of the House of Assembly, juggling director of the Great Western Railroad Co., the representative of Hamilton, president of the Gore District Turf Club, and the pious defender of the rights and wrongs of mother church. The races are coming on. Pity Sir Allan cannot be in two places at once—cannot attend to the important business of the turf and the petty business of the Legislature at the same time."

How courteous were these old-time papers in their references to public men, and how full of news! One looks in vain for a report of said races, but finds instead an editorial jeremiad. The races and the circus, said The Examiner, filled the police court, and it called upon the Government for their abolition.—Toronto Saturday Night.

ZAM-BUK CURES SUNBURN

Don't have your vacation spoiled by the pain of sunburn; and don't have your skin permanently freckled from the same cause:

Zam-Buk contains herbal extracts and juices which not only ease the pain of sunburn, but prevent unpleasant results from it. Zam-Buk applied to a bad burn gives speedy ease. It also soothes blisters, aching feet, chafed places, insect stings, etc. See that you take it with you to the country!

Mothers should know that for baby's chafed places it is better than powder. Also for heat rashes, eczema, prairie itch, etc. Sufferers from piles will find it indispensable. All druggist and stores.

ing out, and he had been drawn to his dreams. Gypsy, dressed in a bewildering gown and moving with the elegant throng that oppressed the ranchman, was on her way to the opera under escort of an immaculately clad young Englishman possessed of a big title, and Layne was left to be entertained by her father.

She had asked him to come back and breakfast with them, but her changed bearing and the cool treatment accorded to him by the condescending nobleman had nettled Layne. He took the very next train back to the land of sunshine, where people were not proud and stuck up and did not forget old friends.

On his return the cowboys of Circle II had besieged him eagerly for news of their little chum of the ranch.

"Yes, I saw her," he answered, veiling the bitterness in his heart. "And she's a great belle in her society togs. She has a beau, Lord Percy Ellington, one of those plug battered chaps, and she seems to like his attentions all right. The boss says he followed them back from Europe."

Having imparted this information to the news hungry men, Ned had gone off by himself under the starlight and finally abandoned all his old plans and hopes.

Ever since that night the young man had been formulating a plan for his future which he kept strictly to himself, resolved to execute the first step toward it when the owner of the ranch returned to his own again. Accordingly he mounted Muggins, his own pony, and rode rapidly away across the brown mesa before the party could arrive.

From an eminence his well trained eyes caught the blur of rising dust far up the trail. Nearer approach enabled him to recognize the ranch buckboard driven by Bob Cat Nick. Seated by the driver was the trim figure of Gypsy, while the stout form of Ellington and a slender man wearing a derby occupied the back seat. Trailing behind or galloping proudly on either side of the vehicle rode the adoring cowboys, chatting merrily with their old friend.

At sight of the derby hat a frown crossed Ned's face, and, putting spur to the unoffending Muggins, the disgruntled young horseman rode off down the gulch.

"Ellington alone!" he exclaimed. "Yet what right have I to be surprised or care for that? No doubt Ellington wants to show his prospective son-in-law what a fine ranch he has for his daughter."

When he had reached the live oak thicket quite a distance away he let Muggins rest. Throwing himself upon the ground, he surrendered his mind to a train of miserable thoughts.

He had lain there a long time, when suddenly he was aroused from his bitter reflections by the clatter of hoofs over the rocky trail.

Pushing back his sombrero from his eyes, he looked up into the smiling face of Gypsy, seated upon Slap Dash her favorite pony.

"And this is the way you keep your promise?" she said reproachfully.

He scrambled to his feet and, throwing one arm across the saddle on his pony's back, leaned there till he could summon self mastery.

"What do you care, Gypsy?" he finally interrogated, his eyes stubbornly refusing to meet hers.

Some of the brightness left the girl's face as she noted the misery on his.

"Tell me what it all means, Ned," she begged. "Why are you not yourself? Why do I find you so changed?"

"Changed? Heavens! and he could not forbear a gesture of impatience. "You!"

"Here," she interrupted in the scolding tone of her privileged girlhood, "we come all the way from New York

the tub Byron's "Once more upon the waters, yet once more."—Philadelphia Ledger.

Why the Indian Wanted a Desk.

A story is told of Quannah Parker, one of the old Comanche chiefs. Parker had been extremely valuable in bringing the Comanches into friendly relations with the whites. He found himself getting on in years, but without any property, and his white neighbors thought it would be a good idea to collect money to build him a house. They did this, and when the house was ready they told him and he went to see it.

"There is no furniture here," he said. "What do you want?" they asked.

He replied he wanted this and that and added, "I want a big desk—a great big desk."

"What do you want that for?"

"Well," he said, "I want to go in there and sit back in my chair and put my feet up on that desk, and some one will come in and knock at the door and say, 'Is this Mr. Parker?' 'Yes, I want to speak to you.' And I will say, 'Oh, go away; I'm busy today.'—Delineator.

Corrected.

Inspector of Village School (questioning class)—Now, my boy, what is an island? Pupil (dejectedly)—I dunno, sir. Inspector—Well, for instance, could I ride from here to France? Pupil (brightening up)—No, sir, that yer couldn't, for feyther saw yer on hossback 't'other day an' sed as how he' lay a shillin' yer couldn't roide a moile without a wabblin' off.—London Spare Moments.

The Chafing Dish.

"Do you know how to use a chafing dish?"

"Yes," answered Mr. Sirius Barker. "I have some novel ideas on the subject."

"What are they?"

"The best way I know of to use a chafing dish is to punch a hole in the bottom of it, paint it green and plant flowers in it."

Persuasive.

"Could you tell me where I can get a drink at this time of night?"

"No, sir," says the police officer rebukingly.

The belated individual goes on his way, but at the next corner he has a new idea, so he returns to the faithful officer and inquires confidentially:

"Could you tell me where we can get a drink at this time of night?"

Hennequin's Infant Tablets

Save Babies' Lives. For Babies and Small Children. (Made in France.)

Dr. Hennequin's Infant Tablets saved our little girl's life. Three doctors said she could not live. The Tablets cured her.—Mr. E. R. McBRIDE, Napanee, Ont.

My baby was so weak from sickness that he could hardly walk. We thought he would die. We could find nothing to help him. I was given a sample package of three Hennequin Tablets; we used them; I saw a change at once. We secured the Tablets and our baby improved every day, and is now a bright, fat, good natured boy; you could not believe he was the medicine ever sold for babies. Mothers if your babies are not well take my advice and try these Tablets.—MRS. JAMES RUSSELL, Barrydale, Ont.

We have hundreds of such letters. If the Tablets were not what you need we would not offer to give them away and prey them. If your baby is not well send for trial package. All dealers, 25c per package, or 5 for \$1.00 sent postpaid to any address.

SCRAPING THE STOMACH

Dangerous and Painful Operation
Avoided by Taking "Fruit-a-tives."

Guelph, Ont., Aug. 6, 1908.

I suffered for many months with dreadful Stomach Trouble, with vomiting and constant pain, and I could retain practically nothing.

My doctor stated that I must go to the hospital and undergo an operation of scraping the stomach and be fed by the bowels for weeks. All the medicine the doctor gave me I vomited at once. I was dreadfully alarmed, but I decided on an operation and had refused.

I had heard of "Fruit-a-tives" and the great success they were having in all Stomach Troubles, and I decided to try them. To my surprise, the "Fruit-a-tives" not only remained on the stomach, but they also checked the vomiting. I immediately began to improve, and in three days the pain was easier and I was decidedly better. I continued to take "Fruit-a-tives" and they completely cured me.

Mrs. Austin Hainstock.

"Fruit-a-tives" are 50c a box, 6 boxes for \$2.50, trial box 25c. At dealers or from Fruit-a-tives Limited, Ottawa.

CHINESE JUSTICE.

Li Hung Chang and the Men Who Tried to Poison Him.

When Li Hung Chang was Chinese premier and was having a bitter fight with some of the more conservative members of the tsung-li-yamen he received as a present a magnificent cake which he had reason to suspect contained poison. He put the cake aside and set all his powerful machinery to work to find out who was at the bottom of the plot. The investigation was partly successful, the crime being traced to three men, of whom one at least was absolutely guilty. Li had the trio arrested and brought to his yamen. When they arrived they were ushered into his presence and were received in his courtliest manner. The cake was produced with the remark that politeness forbade his tasting it until the three generous donors had had an opportunity to enjoy its excellence. Li cut the cake, and one of his servants handed it to the unwilling guests. Each took a piece and ate or pretended to eat it. One crumbled the pieces and let them fall upon the floor, but the other two ate calmly, without manifesting any emotion. Ten minutes and the two men began to show symptoms of suffering. Li smiled be-

nignantly and said to the man who had not eaten, "Your wisdom is so great that I am compelled to preserve your head as a souvenir to transcendental genius."

The man was removed and promptly decapitated. To the other two the premier remarked: "The cake that you are eating is not the one you sent, but one which I had my cook imitate. The poison from which you are suffering exists only in your imagination. I know of no way to cure your present pain except by letting you share the same fate as your friend who has just left the room."

As they were led away the statesman said to his retinue "It is a pity that a man who can eat a deadly corrosive poison with an unmoved countenance should so ungraciously the talent wherewith heaven has endowed him."

ICEBERGS.

How Those Found in the North Atlantic Are Formed.

The distance covered by an iceberg of the north Atlantic from the time it is formed until it reaches the banks is fully 2,500 miles. It may have been afloat for a year, exposed to wide changes of temperature, battered by ice floes, possibly other bergs and ceaselessly washed by the waves. Yet some of those seen 2,000 miles south of their starting point are nearly 300 feet in height and truly of majestic proportions, often 1,000 or more feet in length, while it is an established scientific fact that so much more of the bulk is under water than is visible that the largest bergs may extend into the ocean to a depth of over half a mile.

Their enormous size when they become detached from the glaciers is proved by the observations of explorers along the Greenland coast. A few years ago a berg was measured as nearly as possible around the edges. This distance was about five miles. It had several peaks estimated to range from 300 to 500 feet high. Judging from its appearance, it was a solid mass that had separated in its entirety from the glacial edge of Greenland.

As arctic navigators who venture far north often see a score or more of great bergs in a day, the tremendous glacial activity in this region can be appreciated. The majority of these that drift to the Grand banks come from Melville bay. Some of the distinct glaciers that terminate the Greenland ice cap on this coast extend along it a distance of fully twenty-five miles. Their thickness or height can only be estimated, but in places near the open sea it is believed to be several hundred feet.

Recent examinations of this coast show that during the short summer the formation of bergs in the bay is almost continuous. The glacial movement keeps pressing the ice forward until a thick stratum often projects many feet beyond that beneath. After a time the great weight overcomes the tensile strength of the mass and it falls into the sea and a berg is created.—Day Allen Willey in Scientific American.

The Rat's Revenge.

While a rat-trap was being set in a Woodbridge, England, wheelwright's shop recently by the light of a paraffin lamp, a rat darted out of a hole and upset the lamp. The premises was set on fire, and damage to the extent of \$1,000 was done.

HOW DO, MR. Q. CUMBER

ABOUT CHILDREN WHO DON'T LOVE THEIR PARENTS.

Mahershalahabaz Is the Record Christian Name For a Baby, But Talitha Cumi Runs It Close—Mr. Quintus Cumber Also Got a Rough Deal In the Matter of Names—Other Odd Names.

It is said that a gentleman had his two infants christened Cherubim and Seraphim, "because they continually do cry." As a matter of fact, many offspring have been labelled with names which in later years they bear with disgust.

On the momentous point of parental responsibility, it would be interesting to have the opinion of Miss Boudicca Bashet, Mr. Happy Jiggins, Haystack Brown, and Amio Domini Davis, all of whom appear in the register at Somerset House.

Mr. Jolly Death, whose name figured not long ago in a lawsuit, would probably have chosen a more reverent Christian name if he had had any voice in the matter; as would also Mr. Judas Iscariot Burton and Ananias Culling, who are, no doubt the most upright of men.

Savage Bear, Esq., was probably a charming man to live with; and so, for anything we know, were—or are—Standy Scarrott, Odious Heaton, and Stormy Petrol Hodgson. Joseph Lyon Lamb probably combines the courage of his Christian name with the gentleness of his cognomen; Partridge Roast might tempt cannibals, if there is anything in a name; and Mineral Waters ought to be allied with good spirits. Ernest Frosty Winter is probably a cool customer; and Alfred Dime Weeks will flourish, we hope, for many a year.

Even names such as those are not so uncomplimentary as those which mark either a cold or a frivolous welcome on the part of parents. We wonder what "Ophelia-mary Johnson" and "No Wanted Smith" think of the Fifth Commandment. Rowell Simpson is a commercial suggestion; Garrick Brown was early destined to be an altar boy; and yet, wonder, and Merry Christmas Funnell ought to feel cool and jovial even in the coldest days.

But of such grotesque baptismal names the registers supply literally hundreds, all so appealing in their ludicrousness that it is difficult to pick and choose among them. Here are a few, taken at random: Noah's Ark Smith, Affability Box—any relation, we wonder, to Miss Sardine Box, who was cradled in Hackney, Eng., a few years ago?—Joseph Ann Reynolds, a name which should J. A. R. Chancery Lane Illingworth, and River Jordan.

Floral names make quite a sentimental appeal to us. Who, for instance, could fail to find Miss Ivy Violet Primrose, McGulley, a very flower of maidenhood, or Ivy Verbena Mignonette Slocombe perfectly sweet?

It is almost equally unkind to send a child into the world with such a name to write and pronounce as this, Mahershalahabaz—a name which was borne until a year or two ago by an old man in Norfolk, Eng. No wonder his friends struck, and called him "Maher" for short. Talitha Cumi is rather a dreadful name to put on a visiting card; and Tryphena and Tryphosa are no doubt trying for their bearers. Azile, as an ingenious transposition of Eliza, is rather pretty; as also is Louvima, a combination of Louise, Victoria and Mand, the names of King Edward's daughters.

For a mild, peace-loving man to be condemned to go through life as Richard Cour de Lyon Tyler, Horatio Nelson Wellington Marlborough or Kitchener Buller French Gatacre—all

DOCTOR ADVISED OPERATION

Cured by Lydia E. Pinkham's Vegetable Compound

Canifton, Ont.—"I had been a great sufferer for five years. One doctor told me it was ulcers of the uterus, and another told me it was a fibroid tumor. No one knows what I suffered. I would always be worse at certain periods, and never was regular, and the bearing-down pains were terrible. I was very ill in bed, and the doctor told me I would have to have an operation, and that I might die during the operation. I wrote to my sister about it and she advised me to take Lydia E. Pinkham's Vegetable Compound. Through personal experience I have found it the best medicine in the world for female troubles, for it has cured me, and I did not have to have the operation after all. The Compound also helped me while passing through Change of Life."—Mrs. LETITIA BLAIR, Canifton, Ontario.

Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, has proved to be the most successful remedy for curing the worst forms of female ills, including displacements, inflammation, fibroid tumors, irregularities, periodic pains, backache, bearing-down feeling, flatulency, indigestion, and nervous prostration. It costs but a trifle to try it, and the result has been worth millions to suffering women.

COW TESTING ASSOCIATIONS.

FIFTY CENT COWS.

Cow testing association members are astonished, to put it mildly at the revelation of the scales and test. In one herd of 17 cows the average yield was 4,380 lb. milk, 4.2 test, and 183 lb. fat. The highest yield of milk and fat was from a 7-year-old cow, whose test was only an average of 3.8 for the full period of lactation. Her total yield was 7,200 lb. milk and 274 lb. fat. Notice how high this is above the average, 2820 lb. milk more. The yield of the poorest cow, a 10-year-old, was only 3,050 lb. milk, 3.7 test, and 111 lb. fat. Notice how much this is below the average yield, 72 lb. of fat less. But this 10-year-old cow gave much less than half what the 7-year-old did; there is actually a difference between the two yields of 4,150 lb. milk, and 163 lb. fat. Is the one cow worth twice as much as the other? Carry the figuring one step further in order to ascertain profit. Valuing milk at \$1.00 per 100 lb, and even putting the cost of feed at only \$30, one cow made just 50c profit on the year's business. Did that pay labour, or interest, or any return for supervision or supply any incentive to keep cows? But even assuming that the first cow consumed feed to the value, not of \$30 merely, but fifty dollars, the profit is \$22.00, or just 44 times as much as with the second cow. Supposing one could just deposit the profit made on each cow; with the kind that makes \$22.00 profit one could attain a bank

DISCOURAGED MEN

IS LIFE WORTH LIVING

MEN, you become disheartened when you feel the symptoms of Nervous Debility and decline stealing upon you. You haven't the nerve or ambition you used to have. You feel you are not the man you ought to be. You feel like giving up in despair. You get nervous and weak, have little ambition, pain in the back over kidneys, drains at night, hollow eyes, tired mornings, prefer to be alone, distrustful, variable appetite, looseness of hair, poor circulation—you have Nervous Debility. Our New Method Treatment is your refuge. It will strengthen all weak organs, vitalize the nervous system, purify the blood and restore you to a manly condition.

Pay When Cured.

Are you a victim? Have you lost hope? Are you intending to marry? Has your blood been diseased? Have you any weakness? Our New Method Treatment will cure you. What it has done for hundreds of others, it will do for you. CONSULTATION FREE. No matter who has treated you, write for an honest opinion Free of Charge. Charges reasonable. BOOKS FREE—"The Golden Monitor" (illustrated), on Diseases of Men.

ESTABLISHED 23 YEARS—CURES GUARANTEED. No Treatment sent C. O. D. No names on boxes or envelopes. Everything confidential. Question list and cost of Home Treatment FREE.

DRS. KENNEDY & KENNEDY

Cor. Michigan Ave., and Griswold St., Detroit, Mich.

their bearers. Azile, as an ingenious transposition of Eliza, is rather pretty; as also is Louvima, a combination of Louise, Victoria and Maud, the names of King Edward's daughters.

For a mild, peace-loving man to be condemned to go through life as Richard Cour de Lyon Tyler, Horatio Nelson Wellington Marlborough, or Kitchener Buller French Gatacre—all names actually borne to-day—is enough to make him seek oblivion in the waters of the Thames. Personally, we would prefer to sign our name Edward Byng Tally Ho, or even Quinine, as two very worthy people still living must perforce do.

There is something to be said for naming children in order of arrival, as Primus, Secundus, Tertius, and so on. It has the merit of settling all disputes as to seniority. But it has its dangers, as a certain well-known Canadian, one Quintus Cumber, admits sadly when he reads his name in the papers as Mr. Q. Cumber.

ROLE OF THE COCONUT.

The Staff of Life to the Natives of Sea Washed Island.

It is more than a coincidence that the tree which furnishes a greater amount of available material to man than any other in the vast kingdom of vegetables is the first to spring up on the bare rocks of the newly arisen coral reef. The coconut, so formed that it may have floated halfway across the Pacific, is thus universally distributed throughout tropical islands.

It thrives best near the sea, seldom penetrating far into the interior. Its hard shell is a coat of mail for the embryo plant, enabling it to stand hard usage for a protracted period and locking up securely the precious life in miniature.

The fibrous husk which envelops it and is seldom seen on the market on account of the greatly increased bulk breaks the jar which would be inevitable should the hard nut fall unprotected from the tall tree to the ground sixty or ninety feet below.

Such a blow would scarcely fail to break the shell, occasioning the loss of the nourishing milk so necessary to the germ. The outer husk not only breaks the jar of a fall, but buoys it up on the water, while the tough outer cuticle is waterproof.

Thus is the tree which offers to man almost in the raw state all his necessities freely scattered where the warm seas and their borders offer a footing, and from it the humble native secures sugar, milk, butter, wine, vinegar, oil, candles, soap, cups, ladles, cordage, matting, thatch for roof and material for raiment, combining food, clothing and shelter in a single gift, continually making waste places habitable.—New Age.

The Wise Goose.

You must not say "as silly as a goose" any more, for naturalists have been studying this animal of late years, and they have come to the conclusion that she is the wisest of all bird going.

She never quarrels without cause, she sees danger before any other fowl; she has more courage than the rooster; she is far braver than the gobbler, and, if given a fair show, she can beat off the fox.

A flock of geese squatted around the barnyard at night is a much greater protection than the watch-dog. They are light sleepers and will give the alarm the instant they see a stranger moving about.

So in future say "as wise as a goose" and give her all credit.—Montreal Standard.

CASTORIA.

The Kind You Have Always Bought

Bears the Signature of

any return for supervision or supply any incentive to keep cows? But even assuming that the first cow consumed feed to the value, not of \$30 merely, but fifty dollars, the profit is \$22.00, or just 44 times as much as with the second cow. Supposing one could just deposit the profit made on each cow; with the kind that makes \$22.00 profit one could attain a bank balance of \$1000 by keeping 46 cows, but with the other kind it would necessitate keeping two thousand! Who could afford that? Farmers, the point is evident: test your cows and ascertain definitely whether the fifty cent cow boards in your stables.

Ottawa, June, 1909. C. F. W.

Building Up a Speech.

Before making a speech Charles Dickens would decide on his various heads and then in his mind's eye liken the whole subject to the tire of a cart wheel, he being the hub. From the hub to the tire he would run as many spokes as there were subjects to be treated, and during the progress of the speech he would deal with each spoke separately, elaborating them as he went round the wheel, and when all the spokes dropped out one by one and nothing but the tire and space remained he would know that he had accomplished his task and that his speech was at an end.

Doing It.

Old Lady (to grocer's boy)—Don't you know that it is very rude to whistle when dealing with a lady?

Boy—That's what the gun'or told me to do, mum.

"Told you to whistle?"

"Yes'm. He said if we ever sold you anything we'd have to whistle for the money."—London Fun.

Running Conversation.

Collector (angrily)—You know very well, sir, that this bill has been running several years. Now, I put it up to you, what do you want me to do with it? Debtor—By George, I'd enter it in the next Marathon race if I were you!—Puck.

What Did He Mean?

"Yes; I believe that every intelligent woman should have a vote."

"But, senator, I understand that you were opposed to women's suffrage?"

"I am"—Judge.

A LONDON DOCTOR

Tells How to Cure Stomach and Liver Troubles.

A distinguished London physician during the course of a recent lecture on stomach and liver troubles, gives the following advice:—

"Be moderate in the use of heavy, rich foods. Do not eat hurriedly, and thoroughly masticate the food. If your habits are sedentary, take a moderate amount of exercise before retiring and immediately upon arising. Do not use strong cathartic pills, many of which are advertised as sure cures, but in reality do injury by weakening the system. If you find it necessary to use any laxative, stick to the old-fashioned vegetable mixture, viz:—

Fluid Extract Cascara..... ½ oz.
Syrup Rhubarb 1 oz.
Carriana Compound 1 oz.
Compound Syrup Sarsaparilla 5 oz.

Take one teaspoonful after meals and at bedtime.

This acts in a gentle, natural way, and is free from the weakening effects of strong purgatives.

The ingredients can be bought separately, and anyone can mix them at home. This information will be of benefit to our readers and is worth keeping.

What Other Papers Say.

The Binghamton Republican.

A Texas preacher says that every girl should be taught the use of the rolling pin. That's what many husbands object to, their wives know how to use rolling pins too well.

Galt Reporter.

The newspapers seem to think they have annihilated the dog. But the vagrant cur still wags his tail as on destruction bent he still paws his way through shrubbery and flower beds.

Hamilton Times.

J. A. Macdonald, editor of the Globe, saved the imperial press conference from taking a step that might have easily caused trouble in the overseas Dominion. Mr. Macdonald deserves a few cheers.

Le Canada.

Day by day the gulf widens between the east and west, and the conservative party is facing an imminent division, or a compromise, which will be in the nature of homage to the Liberal fiscal policy.

Calgary Alberta.

The proprietor of the London Daily Mail and other yellow papers of London went over to Germany a few days ago and when abroad heard his animals roar, and the outcry was so ludicrous that he wired home to hook up the dogs of war because the Germans were growing fat laughing at them.

Quebec Chronicle.

Women to-day is a power in public life because she is a power in the home and in social life. And she is a wise member of her sex who is capable of distinguishing between the unlimited power that comes from plain womanliness, and the very limited power that comes from being a mere female voter.

Kingston, Ont., Standard (Con.)

We still think, therefore, that the North Waterloo voters would be paying a deserved personal tribute to a brilliant young man if they gave him his seat by acclamation—and we hold that this acclamation need not necessarily be taken as expressing approval of the Laurier Administration, but might be regarded rather as a purely personal compliment to this young man.

Goderich Signal.

Some people seem to be getting nervous over the building up of a "naval force" by the United States on the great lakes. The inhabitants of the Canadian lake port towns are not worrying about it, and inlanders need have no dread of the "warships" which Uncle Sam is using on the lakes for the training of naval cadets. At the same time it would be a pity if the long-standing arrangement between Canada and the States, whereby the spirit of war was to be banished from the region of the great lakes, should be disturbed.

Winston Churchill, M. P.

"In my opinion a liberal is a man who ought to stand as a restraining force against extravagant policies, to keep quite cool in the presence of jingo clamor, and believe that confidence between nations begets confidence, that a spirit of peace and good will makes for the safety it desires. Above all I think a liberal is a man who should keep a sour look for scaremongers, however distinguished

ONE OF THE HAPPY HOMES IN CANADA WHERE PE-RU-NA IS USED IN THE FAMILY.

A Great Many Mothers Have Discovered That a Few Doses of Peruna Given at The Right Time Prevent Much Sickness.

MY DOLLY IS WELL TOO.

MRS. ETTA BOOKER AND DAUGHTER.

The fatality of acute diseases during hot weather among children, is well-known to the medical profession. From year to year the average practicing physician changes his tactics and his remedies. One year the physician uses certain remedies with confidence and enthusiasm. The next year he is liable to adopt new remedies. But through all the changing vicissitudes of the medical profession in their treatment of infantile ailments, Dr. Hartman has clung with unwavering confidence to Peruna. Thus it is that Peruna has become a household word in many thousand families. In catarrhal derangements of the bowels resulting in summer complaint, diarrhea and sometimes cholera infantum, a few doses of Peruna given in the early stages check the disease before it has reached a threatening severity. Many mothers, from Canada to Mexico, give cheerful testimony to the benefit of Peruna in the many catarrhal ailments to which the family is liable, both summer and winter.

when she began to improve in strength and appetite.

"Now she has a good appetite and is a picture of health."

Baby With Indigestion.

Mrs. J. M. Brown, Dunnegan, Mo., writes:

"My little daughter, three years old, was troubled with a very bad cough, which remained after an attack of catarrhal fever, which was a great deal worse at night. She would wake up out of her sleep and cough until I feared she could not stand it. Nothing that we gave her seemed to do her any good.

"I then concluded to send for Dr. Hartman's book, entitled 'The Ills of Life,' which I promptly received. I at the same time commenced giving her Peruna. She has taken one bottle in all, through which she has obtained a complete cure.

"She also since her birth was troubled with indigestion, but since she has taken Peruna she can eat almost any kind of food without any bad results.

"She is now as well and happy as any little girl can be. When our friends say how well she looks, I tell them Peruna did it. I shall always be a friend of Peruna, as I consider it the best medicine for coughs and indigestion we have ever tried, and will recommend it to any one similarly afflicted."

Child Benefited by Pe-ru-na.

Mrs. Fritz Roethe, Pinckneyville, Ill., writes:

"I feel real well, and am glad I am able to say this. One of my children had a fever for five months, nothing would help him. The doctor said it was malarial fever, but his medicine did not help him at all.

"I then gave him Peruna, and it helped him immediately, and so far he has not had another attack of it.

"When I wrote to Dr. Hartman I was unable to do my housework, now I am entirely relieved."

Mrs. Etta Booker, Dundurn, Sask., N. W. T., Can., writes: "I suffered with internal catarrh until I wrote to Dr. Hartman, and after taking treatment as he advised I can say I am now cured of this most trying affliction, for which I am truly thankful. I think Peruna the best medicine for catarrh. I never felt better in my life than I do at present."

In a later letter Mrs. Booker says: "I can truthfully say from experience Peruna is a most wonderful medicine, and in the case of my little daughter, Elsie Booker, it did all I could wish for, and I am entirely willing that you may publish a testimonial in regard to her cure."

Ailing Children.

Mrs. Schopfer, 5920 Prescott Ave., St. Louis, Mo., writes:

"In the early part of last year I wrote to you for advice for my daughter Alice, four years of age. She was a puny, sickly, ailing child since she was born. She had convulsions and catarrhal fevers.

"I was always doctoring until we commenced to use Peruna. She grew strong and well.

"Peruna is a wonderful tonic; the best medicine I have ever used.

"I was in a very wretched condition when I commenced to take Peruna. I had catarrh all through my whole body, but thank God, your medicine set me all

right. I would not have any other medicine.

"Peruna cured my baby boy of a very bad spell of cold and fever. He is a big, healthy boy fifteen months old. I have given him Peruna off and on since he was born. I think that is why he is so well.

"I cannot praise Peruna enough. We have not had a doctor since we began to use Peruna—all praise to it."

Child Now Healthy.

Mrs. G. W. Heard, of Howth, Texas, writes to Dr. Hartman in regard to her baby girl, Ruby:

"My little girl was two years old this January. She had some derangement of the bowels. She was a mere skeleton, and we did not think she would ever get well.

"She had been sick three or four months, and after giving her less than one bottle of Peruna she was sound and well.

"I found the Peruna splendid for wind colic, with which she was troubled

RICHMOND MINUTES.

Selby, June 7th, 1909.

The council met at Selby.

The members present were Messrs. Chas. Anderson, Reeve, and Councillors Fred Sexsmith, E. R. Sills, C. H. Spencer and Manly Jones. The Reeve presiding.

The minutes of the last meeting were read and confirmed.

Moved by E. R. Sills and seconded by C. H. Spencer, that Walter Russell be paid his salary for assessing the Township, \$54.00 and \$6.00 for equalizing three School Sections. Carried.

A communication from Herrington, Warner & Grange re culvert near M. H. Sexsmith's, was read.

Upon the notice of Herrington, Warner & Grange re culvert near M. H. Sexsmith's, it was moved by Manly Jones and seconded by C. H. Spencer, that Councillor Sills be appointed to examine said culvert and report at next meeting of the council. Carried.

A petition of Z. A. Grooms and others in reference to the rock cutting in Sucker Creek at Albert Reid's was read and ordered filed.

Moved by C. H. Spencer, seconded by Fred Sexsmith, that a grant of \$10.00 be made to Road Section No. 60. Carried.

Moved by C. H. Spencer, seconded by Manly Jones, that Robt. Smith

"In my opinion a liberal is a man who ought to stand as a restraining force against extravagant policies, to keep quite cool in the presence of jingo clamor, and believe that confidence between nations begets confidence, that a spirit of peace and good will makes for the safety it desires. Above all I think a liberal is a man who should keep a sour look for scaremongers, however distinguished and ridiculous: a cold, chilling, acidulated, sour, verjuice-tainted look for all of them, whether their panic comes from the air, the sea, the earth or the waters under the earth.

CREAM OF THE IMMIGRATION.

While it may be natural that some colonies should complain because Canada demands the cream of British immigration and carefully rejects the undesirables, it is not a policy for which the Dominion should be censured. It is quite proper that the various members of the Empire should face and solve their own problems. We have not achieved sufficient success in solving the unemployed and other similar problems to warrant us in undertaking a solution of problems properly belonging to other countries or other parts of the Empire. An able man out of work is a sociological problem. The physical deterioration and moral degeneracy that result from onerous conditions and insufficient food and shelter are simply the same problem massed and concentrated. It is not well that any nation or any people confronted by such a problem should be allowed to evade duties and responsibilities by shipping the human residue elsewhere.

People classed as undesirable by the Canadian immigration authorities are almost certain to do better if admitted to the Dominion than they could in the crowded centres of the old world. But that is because the Dominion has large areas awaiting settlement, and the resultant openings relieve the pressure of the unemployed and make a freer demand for labor. Service of all kinds is better rewarded, and many are able to earn a living who would be hopelessly submerged under the more crowded conditions of older countries. But the difference is due to purely accidental circumstances. It has been foolishly attributed to the democratic forms of government, protective tariffs, and the special care of Providence. The methods, systems, and practices which have brought the more onerous conditions in older countries have been faithfully, almost slavishly, copied, but the older results have not had time to develop. Under these circumstances it would seem the part of wisdom to let the older countries deal with their own problems instead of shifting them by the emigration of the submerged classes.

Rubinstein's Free Seat.

A pianist who was pre-eminently successful in his day was Rubenstein, who traveled nearly the whole world over delighting people with his genius. He was very much annoyed by requests for complimentary tickets, but most of the time he maintained his composure, even though justly irritated. It is told of him that just before one of his recitals in London he was accosted by an old lady in the entrance hall and thus addressed: "Oh, Mr. Rubenstein, I am so glad to see you! I have tried in vain to purchase a ticket. Have you a seat you could let me have?" "Madam," said the great pianist, "there is but one seat at my disposal, and that you are welcome to if you think fit to take it." "Oh, yes, and a thousand thanks! Where is it?" was the excited reply. "At the piano," smilingly replied Rubenstein.

equalizing three School Sections. Carried.

Upon the notice of Herrington, Warner & Grange re culvert near M. H. Sexsmith's, it was moved by Manly Jones and seconded by C. H. Spencer, that Councillor Sills be appointed to examine said culvert and report at next meeting of the council. Carried.
A petition of Z. A. Grooms and others in reference to the rock cutting in Sucker Creek at Albert Reid's was read and ordered filed.
Moved by C. H. Spencer, seconded by Fred Sexsmith, that a grant of \$10.00 be made to Road Section No. 60. Carried.
Moved by C. H. Spencer, seconded by Manly Jones, that Robt. Smith receive \$3.00 for fixing a bridge opposite his place. Carried.
Moved by Manly Jones, seconded by C. H. Spencer, that Councillor Sexsmith be appointed to examine the hill in Henry Kellar's Road Section re repairs, with power to act. Carried.
Moved by C. H. Spencer, seconded by E. R. Sills, that this council grant Mrs. Mowers the sum of \$5.00, she being in indigent circumstances. Carried.
Moved by F. Sexsmith, seconded by E. R. Sills, that \$15 be granted Selby Road Section in addition to the \$17 not expended in 1908. Carried.
Moved by E. R. Sills, seconded by M. Jones, that T. H. Herrington be detached from Road Section No. 11 and Wm. Norris be detached from Road Section No. 7 and be made in a new road section, starting at Albert Reid's line going east across Wm. Norris' farm thence north and west to the school house, said road section to be numbered 88, and Wm. Norris, Pathmaster. Carried.
Moved by F. Sexsmith, seconded by E. R. Sills, that the following accounts be paid: James Smart Co., Brockville, pair jaws for stone crusher, \$23.16; Jas. McMath, for damages to rig caused by obstructions on the road in 5th concession, opposite T. M. Russell's, \$1.35; C. Anderson, for repairing Scott's bridge, \$13.00; M. S. Madole, supplies for roads, \$18.14; Robt. McCormick, fixing Town Hall door, 40c. Carried.
Moved and seconded that the council adjourn to meet on the first Monday in July at the hour of 10 o'clock a. m. Carried.

ABRAM WINTERS,
Tp. Clerk.

DENBIGH.

For last week.

Mr. George James, of Plevna, and Miss Ada Vilneff, daughter of Mr. and Mrs. John Vilneff, were married at the home of the bride on May 26th, by Rev. Mr. Lyons, of Plevna, who with Mrs. Lyons made use of the occasion to pay a short visit to their friends and former neighbors, Dr. and Mrs. J. Adams.
His Honor Jas. Madden held Division Court in Bebee's Hall, on Thursday, May 27th.
Court of Revision for this Municipality was held at the Chatson House on Saturday last. There were twenty-six appeals against the assessment. The attendance was unusually large, the session a stormy one, and appeals from some of the decisions of the Court to the County Judge are threatened.
D. A. Nesbit, P.S.I., made an official visit to our village school last Monday.
Miss Wanda Glaesser, for several years a resident of New York city, is

home for a visit to her parents, Mr. and Mrs. H. Glaesser.
Mr. Adam McGellan, of Matawatchan, also favored old friends in our village with a call.
Mrs. E. Sallaus, who some time ago had the misfortune to fall down stairs and dislocate her right arm, has been improving very slowly and started yesterday for Renfrew, to consult some medical authorities there.
Rev. J. Reble received the sad and unexpected information that his mother died suddenly in Krupp, Germany, of a paralytic stroke. He was just making arrangements for a more joyful occasion, as he was expecting his bride, a young lady from Dresden, Germany, over. She has in the meantime arrived in Arnprior where he went to meet her and where they were quietly married on the 26th, by Rev. Wm. Kupfer, a personal friend and former fellow student of Mr. Reble. Both clergyman have since gone to Preston, Ont., where they are attending the sessions of the 49th annual meeting of the Lutheran Synod of Canada.
Mr. John S. Lane is now engaged with a gang of men to repair that part of the Addington road around the west shore of Massanoga Lake, which was badly damaged and made impassable by the high water last spring.

Saved by Her Coiffure.

"Was she hurt when she was thrown from the automobile?"
"Nope. She landed on her head."
"Without suffering any damage?"
"Well, it smashed a roll, a double row of puffs and seven rats!"—Cleveland Plain Dealer.

As to Toes.

Oh, goodness knows
There's toes and toes!
There's pinky toes on baby's feet,
And mistletoes are very sweet.
The last I tried on yesternight
When Gladys stood there 'neath the light,
And as the smack resounded through
The house—oh, moment fraught with
ruet—
I found, to my complete surprise,
Her father had a toe likewise.
—Horace Dodd Gastin in Judge.

Ice Cream, Etc.

"When a young man reaches the age of nineteen he begins to appreciate the dear girls," said the sweet thing in the pink peach basket.
"Yes," sighed the tall youth who had been taking long detours to avoid ice cream signs. "It is then that he begins to appreciate how 'dear' they are."—Chicago News.

Her Reason.

"The reason that Belle Married Billie," said Lillian.
"Was simply because He was rated a million."
"The panic came on In a very short season. Then Bill lost his cash, And Belle lost her reason."
—Puck.

Helping It Along.

"I'm sure," said the fond mother, "that Willie is designed for a brilliant career."
"Well," rejoined her bachelor brother, "you might help it along by getting him a job in an imitation diamond factory."—Chicago News.

Too Much French.

He was out with his best girl, and as they strolled into the West End restaurant he tried to swat on an I-do-this-every-evening kind of look. When they were seated at a table a waiter approached them.
"Will monsieur have a la carte or table d'hôte?" he asked.
"Both," said the young man, "and put plenty of gravy on 'em."

HOME.

SOME DAINTY DISHES.

Ginger Cakes.—Mix together half a pound of flour, six ounces of butter, then add a quarter of a pound of moist sugar, one egg, a teaspoonful of ginger, and two tablespoonfuls of golden syrup. Stir these all well together and drop tablespoonfuls of the batter on the baking tin and bake till done.

Cold Pork.—Cut some neat slices, or cutlets, according to the joint, sprinkle them with pepper, salt, and a suspicion of powdered sage, and then fry a nice light color. Make some apple sauce, arrange it in a mound on the centre of the dish, and place the pork round. Garnish with parsley and serve.

Chocolate Icing.—Stand two ounces of chocolate on a plate in the oven till soft, then set it in a stewpan with a quarter of a pound of icing sugar, moisten with a tablespoonful of water, and stir over the fire till quite smooth, but do not let it boil. Spread it over the cake like any other icing.

Victoria Sandwich.—Take an egg, its weight in flour, ground rice, caster sugar and butter. Add to these ingredients a tablespoonful of baking powder and flavoring to taste. Spread the batter on two small tins of equal size and bake in a sharp oven. When cooked, turn out on a sieve, spread one lightly with jam and set the other in it. Sift sugar over and serve.

A Savory Liver Dish.—Get a pound of liver, cut it in thin slices, and wipe it with a damp cloth. Grease a pie-dish, lay in some slices of liver, sprinkle with pepper and salt, some chopped onion, and a few breadcrumbs, and a slice or two of fat bacon. Continue thus till the dish is full, then cover with some sliced potato, pour in a little gravy or water, and bake for an hour. Serve hot.

Baked Apple Pudding.—Butter a pie dish and cover with breadcrumbs; pare, core, and quarter some apples, and three parts fill the pie dish. Sprinkle with sugar and a grate of nutmeg and cover with breadcrumbs. Bake till quite cooked. In the meantime, make a custard with half a pint of milk, one egg, a teaspoonful of cornflour, and sugar to taste. Stir over the fire till the custard is thick, but it must not boil. Take up the apple, pour over the custard, return to the oven for a few minutes to set, and then serve.

Mother's Pudding.—Make a suet crust with three-quarters of a pound of flour, six ounces of chopped suet, one tablespoonful of baking powder, and enough water to make a paste. Roll it out, and spread with this mixture: One teaspoonful of chopped apple, half a teaspoonful of currants, one tablespoonful of sugar, and half a teaspoonful of mixed spice. Roll up, wet the ends to prevent the mixture boiling out, tie in a cloth, and boil for three hours.

Vegetable Marrow Pie.—Peel a marrow, cut it in half lengthwise, and lay it in boiling stock, letting it cook gently for fifteen minutes. Mix an ounce of dripping smoothly with half an ounce of flour. Put it into a small saucepan, and as it melts, stir in a dessertspoonful of grated cheese and a teaspoonful of stock. Stir for a few minutes till the sauce boils, and is thick. Grease

Wet thoroughly with the peroxide and hang waist in sun and wind.

When milk, soup, or other liquids boil over on the stove, and threaten to fill the place with unpleasant odors cover the spot quickly with salt.

An old-fashioned but sure remedy for removing ink stains is to dip the spots in pure melted tallow. When the latter is washed out the spots will go.

A saucepan in which oatmeal has been cooked may be easily cleaned by putting a cupful of ashes into it and filling with water a few minutes before washing.

When starching children's pinafores add a small piece of sugar to the boiled starch. This will make them iron more easily and leave a beautiful gloss on them.

The following is said to be a sure cure for corns: One teaspoon, each, of coarse brown sugar, salt-petre and tar, warmed together; put on kid and bind on the foot for 24 hours.

To dry parsley wash the parsley and shake it dry. Then set it in a cool oven and when it becomes crisp let it cool. Put into tins or bottles and exclude the air from it.

Gilt on china will not last long if soda be used in the washing of it; therefore use soapy water for washing teacups, etc., patterned with gilt, and keep soda carefully away from them.

Paint on clothing, even when it has become hard and dry, may be removed with a mixture of equal parts of ammonia and turpentine. Saturate the paint spot as often as necessary and wash out in soap-suds.

To purify rancid butter, melt and skim the butter, and then put into it a piece of well toasted bread. In a minute or two the bread will have absorbed all offensive taste and smell.

Utilize old cigar boxes by taking them apart and lining a large box or chest with them to make a moth proof box. The wood is cedar, which is saturated with the odor of tobacco, making it doubly secure against moth.

Glasses which have held milk should never be washed in warm water while the dregs of the milk still cling around the edges. If the glass is first rinsed out in cold water it can then be washed safely in warm water in the usual way.

Soup is an economical and wholesome addition to the dinner. Save all the bones, boil them up for stock, then add the odds and ends of vegetables left over from dinner. If nothing else, put in a dash of catsup—and you have nice tomato soup.

A broom supporter made of spools is a simple and convenient device. Screw into large empty spools high up on the middle frame of a door, just far enough apart to allow the handle of the broom to slip in. The broom part rests on the spools.

When patching wall paper don't forget to preface operations by putting the new piece of paper in the sunshine to fade, till it matches that on the wall. Don't cut the patch a neat square, but tear it. The irregularity of its edges make it less conspicuous.

THE TREATMENT OF DISEASE.

Some original and striking statements with regard to the attitude of the public in general, and the medical profession in particular, towards humanity's common enemy, disease, are made by Bernar Macfadden in the June issue of the

IS MARS INHABITED?

(By Chas. M. Bice, Denver, Col.)

Prof. David N. Todd, of the Amherst College Observatory, is creating some excitement in scientific circles by formulating extensive plans to signal the alleged inhabitants of our near starry neighbor, Mars.

It is the belief of Mr. Todd, that the Martians have been signalling the stupid denizens of this earth, otherwise called "humans," for many years, but that we have been wholly oblivious to these friendly manifestations. He, therefore, proposes to discharge this long-delayed duty on our part, and to fittingly respond to all Martian greetings in the future, by picking up these messages from our neighbor through the aid of wireless instruments carried up in a balloon to the very upper edge of our atmosphere. To accomplish this, he will shut himself up in an airtight tank which is to be borne aloft in a huge balloon. In September next, the planet Mars will reach a position in its orbit several millions of miles nearer our earth than it has occupied for many years, and of this fact Prof. Todd will take advantage in carrying out the plans he has in contemplation. It is claimed that the Martians, being older, have discovered the things, and solved the problems that the people of this planet are still blindly groping for, and that many things that are mysteries here must be an "open book" there. Prof. Todd is modest enough to inform us that he does not intend to send any messages to Mars, in his coming trip, but will only try to receive messages sent by the Martians. He has another scheme in mind, consisting of the construction of a stupendous mirror, at the cost of millions, by which he blandly expects to signal the Martians and get responses.

In all this, of course, he proceeds on the assumption that Mars has intelligent inhabitants desiring to make our acquaintance. Astronomers are by no means agreed on the question of the habitability of Mars. It is certain that very much of Prof. Lowell's argument on this subject is based upon sheer conjecture, with the single exception of the so-called Martian "canals." It must be conceded that if astronomers by the aid of their immense telescopes could be sure that the streaks so dimly outlined on the surface of Mars are veritable canals, the conclusion that the planet is inhabited would be almost irresistible. But astronomers are not generally of that opinion. At favorable times they can observe certain undefinable streaks and ridges, but what they indicate is still a matter of vague speculation, and will remain so until a reflector is invented of sufficient power to bring these lines or ridges into more definite view.

The immense distance of Mars from the earth, and our present imperfect instruments, do not admit or reveal anything sufficiently definite about these alleged canals to form a proper conception of what they really are.

A canal on Mars, we know, would have to be of great width to be discernable at all by our most improved telescopes.

Our largest rivers, viewed from Mars by the most perfect telescopes known to us, could scarcely be seen at all, much less could it be determined what they are at so great a distance. It is not to be imagined that Mars could have canals an

Lowell, to be uninhabitable, for they are not dense enough, being but little beyond the gaseous condition. The notion that the stars possibly have life on them is reduced to a very few instances, as they are too close to binary systems of stars to make it probable that their conditions could be stable enough for a period of time requisite for the development and maintenance of life.

When it is considered that a space on Mars as large as the Province of Ontario would appear, by the aid of our most powerful telescopes, to be a mere indefinable dot, the possibility of signalling from the one planet to the other becomes nothing more substantial than the shadowy hallucination of an iridescent dream. That the great author of the universe has the power to create a species of life fitted to inhabit even the seething temperature of our sun, or the cold atmosphereless and planetless wastes of our moon and the planets, no one will question or deny, and we venture to say that none but the most reckless will affirm has been done. But science is compelled to steer clear of the supersensual and the supernatural and to confine its scope to phenomena susceptible of demonstration and inductive proof.

THE SWEETEST OF TOWNS

GRASSE, FRANCE, PERFUMES THE WORLD.

Manufacture of Perfume is as Varied as the Flowers from Which It is Made.

The sweetest town in the world is Grasse, in the foothills back of Cannes on the French Riviera. All through the year Grasse is really one big bubbling cauldron where are distilled gallons, barrels, hogheads of perfumes.

In the spring violets, roses and narcissus form the principal ingredients, in the fall jasmine and tuberose. All the flowers are grown in the open sun, except the violets, which, requiring shade, are hidden between rows of olive trees.

The flower pickers of Grasse and the flower girls and flower women of the "Jeu de Ballon," says the Lady's Pictorial, form a far more picturesque element than the perfume makers of the factories where the fragrance is distilled. Coiffed with great, flat, pancake hats of plaited straw the flower pickers cannot fail to impress one. With them are their helpers with square flower-laden baskets on their backs and a smile—the traditional smile of southern Europe—on their faces.

AS FOR THE PROCESS

by which the perfumery of commerce is made, it is as varied as the flowers which make up the ingredients. Primarily the essential oil or otto of a flower is obtained only by distillation. The residue is then mixed with carified or refined pork fat by boiling in great copper kettles, and being stirred constantly with a wooden pestle during the operation.

It is this boiling down with fat that gathers the perfume to itself. The impregnated grease is then churned up with refined alcohol in another cauldron until all, or nearly all, the perfume has passed into the spirit.

The fat remaining, with a slight impregnation still left to it, is made

boil for three hours.

Vegetable Marrow Pie.—Peel a marrow, cut it in half lengthwise, and lay it in boiling stock, letting it cook gently for fifteen minutes. Mix an ounce of dripping smoothly with half an ounce of flour. Put it into a small saucepan, and as it melts, stir in a dessertspoonful of grated cheese and a teaspoonful of stock. Stir for a few minutes till the sauce boils, and is thick. Grease a pie-dish, and scatter a few breadcrumbs over it, then cover the bottom with a layer of sauce, next with slices of marrow, well seasoned with pepper and salt, then more gravy and marrow till the dish is full. Cover with good crust, and bake till the pastry is done. Serve hot.

TWO SANDWICH RECEIPIES.

Bacon and Cheese Sandwiches.—Take round sandwich bread, cutoff crust before slicing, slice bread in pieces one-half inch thick. Mix one slightly beaten egg with one jar of club cheese, pinch of salt, and red pepper. Butter bread with plenty of cheese, put on top three slices of crisply fried bacon and put under broiler until cheese is melted. This makes a delicious sandwich of toasted bread, melted cheese, and broiled bacon.

Appetizing Sandwiches.—Take made mustard and stir into it as much grated Parmesan cheese as the mustard will hold together. Slice bread thin; remove crust. Butter a slice, add the cheese mixture, place un buttered slice on top, press together; and you'll be pleased with result.

WORTH KNOWING.

Stains may be removed from agate dishes with pumice stone.

If spices are tied in a cloth, they won't be troublesome when serving.

Always scald china milk pitchers and add soda to the water to make them perfectly sweet smelling.

The most easily digested meats are mutton chops, venison, sirloin of beef, lamb chops, rabbit and chicken.

Boil sausages in flour before frying them; it will keep them from burning, and will also improve the flavor.

Tartaric acid will remove almost any iron rust blemish from material, and is excellent for removing yellow marks.

If lettuce is kept for several hours it should be laid on a wet towel and placed on the cellar floor or in the refrigerator.

Stained table linen should be put into pure boiling water before putting the stain to disappear.

Little garments which come next to a baby's skin should never be washed with soda. This irritates the skin and is very painful.

Always warm the baby's bed with a hot water bottle before putting him to rest for the night. If restless this will make him sleep.

If your soup is found too salty add a few slices of raw potatoes and cook a little longer. The potatoes will absorb the surplus salt.

When anything has burned in the double boiler, instead of replenishing the steamer with hot water, use cold for the same effect.

If the kettle in which syrup is being boiled is rubbed with butter to the depth of an inch or so from the top the syrup will not boil over.

Copper may be cleaned by scouring it with a cut lemon dipped in salt. When clean rinse in pure hot water and polish with a soft cloth.

Residue of hydrogen will whiten a gilt waist that has become yellow.

it less conspicuous.

THE TREATMENT OF DISEASE.

Some original and striking statements with regard to the attitude of the public in general, and the medical profession in particular, towards humanity's common enemy, disease, are made by Bernar Macfadden in the June issue of the Physical Culture magazine. The following quotations will serve to illustrate the standpoint from which this writer views the ordinary method of dealing with physical ailments, and many of his beliefs are gaining acceptance in the minds of those who think for themselves the world over:

"Practically every advanced student of medicine is prepared to admit that disease germs are innocuous or harmless to those who possess what might be termed a high degree of vital resistance. Such persons are classed as immune, and it has always been an unsolvable riddle to me why the germ-seeking scientists do not turn their attention to the study of the how and why of this immunity. They are seeking a method of insuring immunity against disease. Why do they devote so much time to the study of the minute details of disease itself, instead of learning something of the nature of the forces within the body which can render it practically immune from all disease?"

"Disease is not an enemy! It is a friend! It comes as a means of bringing relief. It is an effort on the part of the body to right a wrong. It shows that the body is struggling for life and health, and on many occasions, if it were not for the disease that come as a means of ridding the body of the vile accumulations of poisons, death would unquestionably ensue. Therefore, disease in many cases actually saves life. To be sure, if there is but a small amount of foreign material in the circulation and tissues of the body, the attack of the disease will be slight in character."

EASILY COAXED.

The new school-teacher had a talk with Mrs. Hobart one day in regard to discipline. "I don't see how you manage Bobby as well as you do," said the teacher. "I like him, but he's such a mischievous little fellow, and he will not mind; yet every one says he minds you. I wish you'd explain it to me."

"Well," said Mrs. Hobart, doubtfully, "I'd just as soon tell you, but I'm afraid it won't help you much. You see I kind of coax him."

"Coax him?" echoed the teacher. "Yes," said Mrs. Hobart, "that's what I do. I say to him, 'Now come, Bobby, wouldn't you rather be mother's good boy and have griddle-cakes and syrup for supper, and play games till eight o'clock, than have just plain bread, and milk that's been through the separator, and go to bed right after it, with the curtains drawn so you can't see the stars?'"

"I can always coax him that way."

"Once in a while, if he's real set to be naughty, I'll say, 'See here, Bobby, which'd you rather, have mother fry you some doughnuts, or cut a little willow switch, not so very little, either?'"

"I can coax him that way sure, if the other fails."

they really are.

A canal on Mars, we know, would have to be of great width to be discernable at all by our most improved telescopes.

Our largest rivers, viewed from Mars by the most perfect telescopes known to us, could scarcely be seen at all, much less could it be determined what they are at so great a distance. It is not to be imagined that Mars could have canals approaching the width of our great rivers.

It is pretty generally conceded by astronomers that Mars has no oceans or large bodies of water, as none have been seen.

How, then, is it possible she should have canals of such immense width to be seen from the earth? and where would the water come from to fill the canals or make them of use for irrigation or commercial purposes?

Modern astronomy has fully established the unity of the vast stellar universe, and shown that it is not composed of distinct systems as was once supposed, nor are the stars infinite in number as was formerly believed.

Lord Kelvin has shown that if the stars extended much beyond those we see, then the force of gravitation towards the centre would be so great it would send the stars whirling in much more rapid motion than they are known to possess.

The consensus of opinion among the best astronomers is that our earth occupies a nearly central position in the stellar universe, and all agree that the Milky Way is nearly circular in form, and that our sun is situated almost exactly in its medial plane. We know, from spectrum tests, that there is an almost complete uniformity of matter throughout the universe, and when we consider all the necessary conditions for the maintenance of physical life, it is not a very complex problem to determine the possibilities of life such as we know it upon any given planet.

The extreme complexity of the chemical compounds which form the basis and conditions of life are well known, and their delicate adjustment for that purpose is recognized by all naturalists.

The conditions of life, such as solar heat, light, water (diffused through the atmosphere and extending over the planet), together with an atmosphere of sufficient density and possessing the requisite gases, etc., are not to be found on any of the planets as they are upon the earth. There must also be a proper proportion of surface land and water—dust in the air, and numerous other conditions found alone on the earth and of which we know that Mars is sadly deficient before life, as we are familiar with it, is possible.

On all the planets, except the earth, we know that many of the foregoing necessary conditions do not exist.

The small size and mass of Mars, and the rarity of its atmosphere, make it impossible to retain sufficient aqueous vapor, while Venus and Mercury, like our moon, revolve but once on their axes in their orbital course around the sun, thus making it impossible that life, such as we know it, could be maintained on either of them.

Excepting the size of Mars, these facts were not known when Proctor wrote on the inhabitability of the planets.

All other planets of our system are conceded, even by Proctor and

being stirred constantly with a wooden pestle during the operation.

It is this boiling down with fat that gathers the perfume to itself. The impermeated grease is then churned up with refined alcohol in another cauldron until all, or nearly all, the perfume has passed into the spirit.

The fat remaining, with a slight impregnation still left to it, is made into soap, a by-product which is no inconsiderable factor in the turnover of the establishment, though often enough this left over product is simply sold to another concern whose business it is to work it up into toilet soap and sell it under more or less poetic names.

A more primitive method of making perfume is that which was in use at the beginning of the industry at Grasse. This method prescribes that coarse linen or cotton cloth should be first impregnated with the finest olive oil, then stretched

ON A GAUZE WIRE FRAME.

Upon this gauze are placed thin layers of flowers, the layers being changed many times until the oil impregnated cloth has absorbed a saturated solution of oil and perfume. This cloth and its precious burden are afterward treated with an alcohol bath, which in turn separates the perfume from the oil.

Another method for extracting the perfumes from the flowers is that of enfleurage. By this means the most delicate of essences are yielded indirectly by being allowed to filter slowly from the crushed blossoms through a quarter-inch layer of cold fat in shallow glass pans. From twelve to seventy-two hours is required for the enfleurage, depending upon the varieties of blossoms and the season of the year.

By calculated experiment and by accident as well many curious truths have been brought to light concerning the art of the perfumer. White blossoms have been found to yield the most fragrance, with those of yellow and orange tints at the bottom of the list. A strong light decreases the odor of perfumes, though this may be accounted for by the fact that the sense of smell is strongest when that of sight is enfeebled.

IT IS A CURIOUS FACT

that the ethereal extract of any flower resembles the perfume of that flower very little. The odor peculiar to the rose and jonquil is a combination of ethereal essences which is only arrived at by a long and tedious process.

Nearly every odor requires a different process to bring out its full value. Lilies, strangely enough, give out an odor resembling that of the rose, while the rose and the orange flower (neroli) each yield quite a different perfume from that naturally looked for and the scent of any and all blossoms except the jasmine can be fabricated by the scientific combination of the odors of many different flowers.

It is comparatively recently that a real violet perfume has been made. The so-called violet perfume of a generation ago scarcely resembled the natural odor of the flower, though it was actually prepared from it. The odor of the violet exists in infinitesimal quantities in each flower and is also very difficult to extract.

Just because a man is no better than he ought to be is no sign that he isn't worse.

SOME MAUVRELOUS COUPS AT MONTE CARLO.

Great Fortunes Have Been Won and Lost at These Gaming Tables.

Mr. Huntley Walker, who, in two evenings' play won \$90,000 at Monte Carlo, and on the second evening "broke the bank" at one of the tables, is, nevertheless, by no means a record-breaker in this field, whatever he may be in automobilism.

A man by the name of Wells won a huge sum, placed as high as \$250,000, but subsequently he stated that in the end he lost not only all his winnings, but also a considerable part of the capital with which he started operations.

INSIDE INFORMATION.

One of the most lucky winners at Monte Carlo was Lord Villiers, who, a few years ago, left the tables after having transferred \$150,000 from the coffers of the bank to his own pockets. But even this feat was thrown quite into the shade by Mr. Jaggers, a Yorkshire mechanic. By carefully watching the play, he discovered that one of the roulette-wheels had some defect, which biased its actions. He used his knowledge with judgment and skill, and had cleared \$600,000 before the bank eventually discovered his secret.

Probably Mr. Jaggers got his idea from an incident that considerably startled the Casino management a few years before, and which might have proved very much more expensive to them than was actually the case.

One day the director of the play was casually watching an old lady, Madame X—, whom he knew to earn her living by securing good places at the beginning of play, and afterwards selling them at a good price to late-comers. Madame X— played only 5fr. at a time, and then only occasionally; but the director noticed that she always, or nearly always, won, and after she had risen he went up to her and congratulated her.

"How much will you give for the secret?" demanded the old dame. But he only laughed, his experience teaching him that he had nothing to fear from any system. "One day you will be glad to buy," was the woman's parting warning.

About a week later she returned to the tables, accompanied by three young Italians, and they soon attracted attention by always playing the maximum, and consistently winning. The surveillants, who were ordered to watch the party, reported in an hour's time that they had won 70,000fr.—\$14,000.

For a week this sort of thing went on, and when the party had "broke the bank" three times at that table, M. Blanc, the then master of the tables, was asked to come from Paris. When he saw what was going on, he asked Madame X— to come to his private office, and there, after much haggling, persuaded her to sell her secret for the low figure of 70,000 fr.

£12,555 FOR A "WARP."

When the play was ended, and the rooms closed, the old woman explained that, after some years

FROM LAND OF MYSTERY

EXPLORING EXPLOITS OF DR. SVEN HEDIN.

Tells of His Experiences in the Hitherto Unexplored Regions of Tibet.

Stories of adventure in strange lands are of interest alike to the traveller and to the stay-at-home, and Dr. Sven Hedin, the famous Swedish explorer, has many to recount.

Since he left Stockholm for the Far East, over three years ago, he has spent no less than twenty-five months in the hitherto unexplored regions of Tibet, and his experiences have, naturally enough, been of a singular character.

BURNING UP THE OLD YEAR.

During his stay with the Graid Lama, Dr. Hedin visited an ancient Tibetan temple, in which a New Year festival was being held. The principal feature of the festival was the banishing of every evil thing from the country for the succeeding year.

"A list of all the nasty things they wanted to get rid of," says Dr. Hedin, "was made upon slips of paper, and a big fire was lighted in the centre of the courtyard. Then, amid the prayers of the multitude, the papers were consigned to the flames by the priests; and, as the ashes were carried off by the wind, the Tibetans firmly believed the evil things which had been written down were carried off with them."

Near the source of the River Indus Dr. Hedin came upon a number of stones, set at regular intervals upon the mountainside, and every one of these stones was inscribed with the holy formula of the Tibetan religion.

Many of the lamas, or priests, Dr. Hedin says, voluntarily shut themselves off from the world. They go into separate grottoes, the entrances to which are closed against them for the rest of their lives, and there, in solitude and absolute darkness, they spend their days.

The reason for this awful martyrdom is the lama's belief that it ensures his being re-born after death, into a very happy existence.

LAND OF SUPERSTITION.

He has no communication whatever with the outside world, and the other priests of the temple send in his food by means of a long pole with a bowl attached to one end. When the food and drink contained in the bowl are withdrawn in an untouched condition the inmate of the grotto is known to be dead.

But Tibet is a land of superstitious and strange belief. In one part there is a sacred mountain called Kailas, thirteen pilgrimages around which are believed to purge one of every sin.

Many pilgrims to the mountain prefer, however, to go down upon all fours, and crawl around it in zig-zag fashion, breathing a prayer every time they reach one side or the other of the track, because one journey performed in this manner is believed to have as much virtue as the thirteen wanderings on foot.

When Dr. Sven Hedin was prevented from entering the unexplored region from the south, he determined to get in from the north, and, to put the authorities off the scent, set out in the direction of

GREAT POWER OF HABIT

The Importance of Habit in Religion Is Here Pointed Out.

Teach me, O Lord, the way of Thy statutes and I will keep it until the end.—Psalm exix. 33.

Our virtues are habits as much as our vices. Honor, courage, purity, punctuality, prayer and kindness are habits as much as are swearing, drunkenness and lying. When this truth is once perceived it makes a revolution in conduct. Morality with many consists in trying to correct evil habits rather than in striving to form good ones. Human life is largely automatic. We are in reality "walking bundles of habits." To each sort of impression we have an automatic ready made response.

The sort of habits we are forming is therefore of the greatest importance, and we are forming habits of some kind whether we attend to them or not. We should strive, therefore, to acquire such habits as will strengthen and

IMPROVE OUR NATURES.

This physical organism of ours, which is the clay which, by continual reiteration, is gradually shaped along lines which finally control the ordinary actions of life. Impressions made upon the nervous structure of the brain tend to repeat themselves until well traveled roads are formed along which ideas frequently passing make highways of the soul. These are habits and control the life.

Bad habits may be checked and good habits formed by making what we desire habitual in our lives. Professor James enumerates

two rules in the formation of such habits with as much determination as possible in order that the initiatory force with which a habit is launched may be as great as possible; secondly, never suffer an exception to occur until a new habit is securely rooted in the life.

The religious life, like other desirable things, should be put under the domain of habit. How can we progress religiously if we live helter-skelter in a hit or a miss fashion? Right thoughts, right emotions, right decisions in the religious life as in the daily life of business, must be made habitual. Habit should be the rule in prayer.

IN CHURCH ATTENDANCE,

in the receiving of the holy communion, in times of meditation, in acts of kindness, in deeds of service. Only so shall we become fit followers of Him who lived in habitual prayer and whose life was spent in doing good. Contemplation of the power of habit should not make anyone despair. Even in the worst cases there is hope. History is full of examples, from St. Paul down, in which the habits of a lifetime have been broken under a supreme compelling impulse. The power of the Divine Spirit is omnipotent in human affairs. The worst prodigal can reform. Behind all our efforts there is the power of God. With all His power the habits of a life time can be broken and a life of new habits begun.

REV. DEWITT L. PELTON.

THE S. S. LESSON

INTERNATIONAL LESSON,

JUNE 20.

Lesson XII.—Review Sunday. Golden Text, Acts 4: 33.

Golden Text.—What great power gave the apostles witness of the resurrection of the Lord Jesus.—Acts 4: 33.

A variety of forms of review is given here, in order that teachers may select the method best suited to the age and ability of their classes. Sometimes it will be best to unite two or more plans, or to take parts of several, or to make other adaptations of these suggestions.

I. A Progress Review.—To carry out this review, request the scholars a week in advance to go over all the lessons of the quarter and note for each of them what step in advance was taken by the church. For example, Lesson I, marks the beginning of the broadening of the church to take in the Gentiles. Lesson II, marks a strengthening of the church's faith in the power of prayer. The event of Lesson III, gave to the church its greatest leader, at the same time winning its chief persecutor. The scholars will make lists of these "forward steps" and these lists will be compared in the class, taking one lesson at a time, and thus reviewing its chief points.

II. A Geographical Review.—For this review each scholar may

Lesson V. Why was the gospel confirmed by miracles in Paul's day, and why is it not confirmed in the same way to-day?

Lesson VI. What was the secret of the effectiveness of Paul's preaching?

Lesson VII. Would Paul and Barnabas have been justified in using the homage of the people for the greater influence of the gospel?

Lesson VIII. The decision of the council was a compromise. When are compromises wise, and when foolish?

Lesson IX. Is faith possible apart from works?

Lesson X. Is it every Christian's duty to speak for Christ?

Lesson XI. Have we as great opportunities for faith as Abraham and Moses had?

VIII. A Peter-Paul Review.—This form of view would be excellent for the primary department. Let all the lessons be grouped about Peter and Paul, the two leading characters. Make it a review of Peter's life, as far back as his call to be a disciple. The best way, perhaps, is to draw on the blackboard (or on large sheets of paper) a series of frames, each to hold a "picture" of one scene in Peter's life or Paul's. This "picture" will be indicated by a few words written as the children recall the scenes, such as "Peter walking on the waves," "Peter by the fire in the courtyard," "Paul facing Flvmas," "James writing his epistle," "A procession of heroes."

was going on, he asked Madame X—to come to his private office, and there, after much haggling, persuaded her to sell her secret for the low figure of 70,000 fr.

£12,555 FOR A "WARP."

When the play was ended, and the rooms closed, the old woman explained that, after some years at the table, she noticed that the wheel had become warped. As the result, if it were started from a certain point, it almost invariably stopped at a certain point. Thus, if the croupier spun the wheel with the number 9 opposite him, the number 26 was certain to follow; if zero were opposite him, 32 would follow; and similarly with other numbers.

The defect was soon remedied, and the management considered the secret cheap at the price they paid, notwithstanding that madame and her Italian friends had cleared 300,000fr. (over \$80,000) in play.

Gamblers are well known to be superstitious, and many will trust to luck through thick and thin, and let systems go to the winds.

Quite recently there occurred an extraordinary incident, which seems to justify—or, at least, to account for—the amazing faith that some people place upon omens.

THE FLY AND THE WHEEL.

For a time the players had been suffering from a persistent run of bad luck, when a fly alighted on the number 13. Immediately there was a move among the players, and in a few moments the middle dozen—the numbers 13 to 24—was literally covered with stakes.

There was an anxious moment as the marble was sent spinning round the roulette-wheel; but presently the croupier announced the winning number—13.

Three times in succession did the number come up, and the landing of the fly cost the bank £5,000.

But, after all, the winnings of this individual or that are but exceptions. In the end, the winner is the bank. Every year something like \$7,500,000 drops into the coffers of the Casino, and of this \$5,000,000 goes to the shareholders—representing something like 70 per cent. on the original value of the shares.—London Answers.

TOPSY-TURVY TURKEY.

China has often been termed the land of topsy-turvydom; but Turkey, the land of young rebels, has surely an equally strong claim to this title. The Turk nods his head when he means "No," and shakes it when he means "Yes." He takes off his shoes, but never his fez, when he enters a mosque or a home. When he rides on a tram-car his ticket is punched at the place he gets on, instead of at the place he must get off. In order to cut a piece of wood, instead of rubbing a saw against it, he rubs it against the saw, which he holds between his legs. Until recently, salt, firearms, and education were all taboo in his country. Steam machinery and electric appliances were forbidden—the first for no given reason, the second because the word "dynamo" too closely resembled the word "dynamite." Dictionaries, too, containing the words "elder" and "brother" were self-consciously censored, because Abdul Hamid usurped the throne from his elder brother, who, report says, as we go to press, has at last come into his own.

the other of the tracks, because one journey performed in this manner is believed to have as much virtue as the thirteen wanderings on foot.

When Dr. Sven Hedin was prevented from entering the unexplored region from the south, he determined to get in from the north, and, to put the authorities off the scent, set out in the direction of Peking, with forty ponies and twelve men. After he had started, however, he found that the caravan-leader had obtained provisions for only twenty-one days, instead of for three months, as directed.

"But," said the man, "our journey will take only twenty-one days, so what's the use of carrying food we shan't want?"

Dr. Hedin did not explain; but when, subsequently, the caravan was turned west, the men were much astonished.

"Soon after this," said the doctor, "I had my worst experience."

"Travelling to the east of the Karakorum Pass, we came upon a river, which followed so erratic a course that we were compelled to cross it twenty-one times. The cold was intense, and the roads were strewn with the carcasses of ponies and sheep. In two hours' ride we counted sixty-two dead ponies."

Travelling down through the great, white loneliness of Northern Tibet, no traces of mankind were seen for several weeks; but at length, many miles to the south, they came upon an antelope which had been caught in a trap, and knew that hunters must be near.

BLACK ROUGE!

To be seen in European dress would have been to be recognized; so Dr. Sven Hedin promptly disguised himself in native costume, and blacked his face every morning with Indian ink.

At last the end came. One morning eight or ten natives came up and entered the tent of the caravan-leader. They had been sent by the authorities to examine the caravan, and were to escort all its occupants to the governor of the province, unless a written statement was given to the effect that they had nothing to do with the European who was known to have entered the country.

Dr. Hedin thought it would be too serious a cheat to give any such statement. So off he went alone to the council of chiefs, and electrified the assembly by calmly announcing: "I'm the man you are looking for."

He says it was a perfectly delicious feeling to be caught. He was tired to death of being a prisoner in his own tent, as he had been for the past two and a half months, and was particularly glad to be able to wash once more.

VICTORY AT LAST.

But he resolutely declined to return the way he had come, and explained that there was a law in his own country that no one should walk in his own footprints.

"The Tibetans," says Dr. Hedin, "found this quite a reasonable law, and I was finally permitted to take one of the courses I wanted to take, provided I was escorted by ten soldiers on horseback."

TRUE.

Every man may have his price, but one thing is sure, there are a whole lot of men who aren't worth it.

There are only 770,000 natives in all of Siberia.

The event of Lesson III. gave to the church its greatest leader, at the same time winning its chief persecutor. The scholars will make lists of these "forward steps" and these lists will be compared in the class, taking one lesson at a time, and thus reviewing its chief points.

II. A Geographical Review.—For this review each scholar may make an outline map showing the various countries and places that were the scenes of the quarter's lessons. Let each lesson be located with a figure. When a lesson involves more than one place, repeat the figure at each locality. Then let the scholar make a list of the places, by names and number, and write opposite each a brief statement of the principal lesson to be learned from the event that occurred there. For example: "Jerusalem: the first church council, teaching the value of frank and brotherly discussion of differences."

III. A Characterizations Review.—This review will take up the various persons that have entered into our quarter's lessons. Each scholar will be asked to write brief characterizations of all these persons. These will be read and compared in the class, one character at a time. They should be quite brief, often hardly more than a sentence. For example: "John Mark, a man of good impulses but weak determination; he made one great failure, but he also made a great recovery."

V. A Central-Text Review.—Ask the scholars to go over the lessons at home and select for each of them the verse that they think best embodies the spirit and thought of the lesson. Tell them in every case to use the entire lesson, and not merely the verses that are printed in the quarterlies and lesson-leaves. For instance, for Lesson I. some may prefer v. 15; others, v. 28 or 34 or v. 35 or v. 45. The discussion of these different choices in the class, and the fixing on a final choice, will constitute a thoughtful review.

VI. A Christian-Life Review.—Each lesson of the quarter has some strong teaching on the conduct of life. It will make an inspiring review if you set the scholars to forming lists, at home, of these teachings, at least one for every lesson, and then compare the results in the class. For example, the Christian-life teaching of Lesson V., Paul in Cyprus, would be considered by some to be the duty of missionary activity; by others, the folly of opposing Christian work; by others, the blindness of the soul, like Elymas's physical blindness, which comes upon all that set themselves in opposition to the truths of the gospel.

VII. A Problems Review.—This would be a good form for the review to take in adult classes. Let the teacher draw up a list of problems connected with the various lessons, perhaps one for each lesson, and preferably the problems that arose in the class discussions and were not satisfactorily settled at the time. Read the list to the class slowly, calling for volunteers to assume the responsibility of leading the class, on the next Sunday, in the discussion of these problems. Here is a suggested list:

Lesson I. Should a Christian ever associate himself with non-Christians?

Lesson II. Why are not all God's saints delivered from their prisons?

Lesson III. What really converted Saul?

Lesson IV. Why are not all our modern churches as vigorous as that at Antioch?

be made of a few chosen scenes, as the children recall the scenes, such as "Peter walking on the waves," "Peter by the fire in the courtyard," "Paul facing Elymas," "James writing his epistle," "A procession of heroes."

EVERYBODY TO FLY

Aerial Passenger Service Begins Next Spring.

The managing director of the Zeppelin Airship Construction Company, Herr Colsmann, in a lecture at Strasburg, Germany, on Count Zeppelin's future plans, stated that the Count intended to establish a number of airship lines for the regular conveyance of passengers between different towns. Count Zeppelin had already been in communication with various municipalities, and had received promises of support from some of the most important towns in Germany.

The Town Council of Cologne, for instance, is willing to invest £25,000 in the new company for the inauguration of a line of airships which will establish aerial communication between Cologne and other important centres of population. The municipality of Duesseldorf is also willing to subscribe a substantial sum towards the capital of the new company.

In some cases regular lines of airships will be established, while in other cases pleasure cruises will take place at regular intervals.

Herr Colsmann stated that 300 days per year are suitable for aerial voyages. The Zeppelin airships which will be used for this purpose will carry a crew of six, including the engineer, and will be capable of conveying twenty passengers. It is intended that each voyage shall last about seven hours, except in the case of longer distance cruises from certain fixed towns to other towns.

Two airships for the conveyance of passengers will be completed by the early Spring of next year, and two more will be ready by May.

The first regular line of airships will be established between Duesseldorf and Lucerne, with Cologne, Bonn, Mayence, Frankfurt-on-Main, Karlsruhe, Stuttgart, and one or two other towns, as calling stations. Other lines of airships will be established to connect other towns with stations on the direct route between Duesseldorf and Lucerne.

Herr Colsmann added that the German War Office has promised a subvention in support of the line connecting Duesseldorf with Lucerne in view of the military advantages of establishing aerial communication in this part of Germany.

Herr Colsmann concluded by stating that fares for aerial passengers would be somewhat expensive at first, owing to the heavy cost of the upkeep of the airships. The costs would, however, naturally diminish in proportion to the general development of aerial navigation, so that in course of time aerial voyages would no longer be a pastime for the wealthy, but an ordinary means of communication, at any rate for the middle classes.

SUFFICIENT.

Husband—"You never kiss me except when you want some money."

Wife—"Well, ain't that often enough?"

RUINED BY DISSIPATION

FAVORITE DRUGS OF FAMOUS AUTHORS.

Great Geniuses Who Ended Their Lives Through Fondness for Drugs and Drink.

Erratic indeed are the ways of genius—ways which have often resulted in pitiful endings, particularly in the case of men whose works are to be found amongst the world's standard literature. Take the case of Edgar Allan Poe, for instance. Poe was the son of a man of loose habits, and those habits seem to have descended from father to son. Before he reached the age of thirty the intemperance of the famous poet, critic, and romancer had cost him several lucrative appointments; and to his fondness for brandy—for that was the intoxicant for which he had the greatest weakness—he added a passion for opium.

In fairness to Poe's memory, however, it should be added that he was intemperate only at intervals. He strove hard to break himself of the drink and drug habit, but periods of sobriety were interspersed with fits of reckless indulgence and months of poverty.

TEN GLASSES OF LAUDANUM.

Poe reminds one very much of Thomas de Quincey, whose devotion to opium contributed in no small degree to his notorious eccentricity and dreaminess. He had acquired the habit first in 1804, when he resorted to laudanum to cure an attack of neuralgia, and to such an extent did it grow upon him that he was known to take at times as much as 12,000 drops, or about ten wine-glasses, a day. He was constantly struggling to reduce this appalling quantity, and managed after a while to keep himself within moderate bounds, with occasional opium debauches. Amongst De Quincey's eccentricities, by the way, it might be mentioned that he was haunted by an idea that he was being pursued by his various and no doubt much-tried landladies.

Another man whose works are to be found amongst the classics, and who contracted the habit of eating opium, was Samuel Taylor Coleridge, the poet and philosopher, who tried so many avocations before he discovered his forte. In his early youth he apprenticed himself to a cobbler; then he tried to become a surgeon; and about eighteen years before his death, even after his writings had secured for him world-wide fame, he actually conceived the idea of becoming a Unitarian minister. Afterwards he worked as a journalist for the 'Morning Post,' and ultimately returned to his old love, poetry and philosophy.

THE "KENDAL BLACK DROP."

It was when Coleridge was about thirty that he came under the influence of what was henceforward to be the curse of his life. His health had never been robust; rheumatism and neuralgia had tortured him; and, by becoming his own doctor, he had recourse to the anodyne of opium. Little by little the habit grew, and the "Kendal black drop" at length enslaved him. It injured his constitution and dulled his imagination; it enfeebled his

COUNTERFEIT COINS.

Forged Coins Which are Worth as Much as the Genuine.

The unusual occurrence of a counterfeit coin bringing far more than the value it was originally intended to represent by its makers took place recently, when a curious Spanish doubloon of Charles IV. of Spain, dated 1801, was sold for \$60 at a sale of old coins at the Collectors' Club in New York.

The coin was of excellent workmanship, and there was really no striking difference between it and the genuine. But instead of being struck in gold it was composed of platinum of the purest quality, which had been gilded.

The intrinsic value of the Spanish doubloon in gold is just over \$15. The platinum counterfeit weighs 420 gr., which, at the prevailing market rate, would give this piece an intrinsic value of about \$17.50.

Platinum was a favorite metal with counterfeiters some years ago, when its intrinsic value was about \$6.25 or \$7.50 an ounce. Many spurious ten-dollar and twenty-dollar United States gold pieces were turned out, chiefly composed of this metal. The coins of Great Britain were also tampered with in the same manner.

Spanish coins have been much counterfeited, perhaps more than the coins of any other country. Even at the present time Spain is redeeming counterfeit five-peseta pieces. These coins were made by private persons and were equal to the regular Government coins in point of fineness and weight, the manufacturers being satisfied with the seigniorage or difference between the face value of the coin and its value in bullion silver.

So difficult are these illegal coins to distinguish from the genuine that the Government has authorized their redemption at bullion value. It is said that but little distinction has been made in Spain between the regular issues and the counterfeits, the two issues being accepted freely everywhere, and it is declared that it is not at all unlikely that a fair proportion of the 600,000,000 five-peseta pieces held in reserve by the Bank of Spain is made up of the counterfeit coin.

Some years ago when silver had a much higher value than at present a counterfeit Mexican dollar came into the possession of the United States assayers at the Philadelphia mint. They assayed the coin and found it to be worth intrinsically about \$1.50. It seems that the mine from which the counterfeiters got their metal produced silver that was very strong in gold. Thus the forgers lost money by making counterfeits.

ROYAL WAR COLLECTION.

Future Historic Treasure Locked in Marlborough Strong Room.

The plate-room at Marlborough house contains one of the most valuable collections of treasures, got together by King Edward, in all England. It is an underground room, lighted with electricity. The walls are lined with bookcases filled with rare volumes of incalculable value. In the centre are large iron safes packed with magnificent gold and silver plate. Here are two giant silver pilgrim bottles presented by Alexander III. of Russia to King Edward, and a priceless solid gold embossed shield which he re-

THE WIVES OF AUTHORS

MOST OF THEM LED VERY UNHAPPY LIVES.

The Wife of Robert Browning, Who Married Happily, Was an Exception.

The domestic life of many famous authors of the past points to the fact that married happiness and literary work do not always go hand in hand. Jane Welsh, for instance, who married Carlyle, scarcely knew the meaning of matrimonial felicity. Her heart had been given before her marriage to Edward Irving; but the gifted orator was engaged to a Miss Martin, and was held to his vow. Jane Welsh therefore married Carlyle, and three lives were thus irreparably injured. And when the famous author lived the life of a recluse for six years in Ecclefechan, his wife confessed that to her it was the "bitterness of death." In fact, the hardships of those six years permanently injured her health, and her misery was further increased by reason of Carlyle's irritability and bad temper.

THE BYRON ILL-UNION.

One of the most unfortunate unions in the annals of literature was that of Lord Byron, who married Miss Millbank, only daughter and heiress of Sir Ralph Millbank, a wealthy baronet. They lived together for just twelve months, and then, after the birth of a child, Lady Byron visited her father and refused to return to her husband. Next month a formal deed of separation was signed. The true causes will never be known, although it is certain that there was extreme incompatibility of temper with distressing waywardness and violence on his side, and on her side a hopeless inability, or rather a haughty and perverse disinclination, to understand or sympathize with him.

Alexandre Dumas made an unhappy union, too, with Ida Ferrier, an actress, while Charles Dickens and his wife agreed to live apart some years after their marriage.

MET AT A BALL.

In 1811 Walter Savage Landor met a young lady at a ball, and, with his usual impetuosity, determined there and then to marry her. What is more, he did so. It is not surprising that the pair lived an unhappy life, and there were constant bickerings and temporary separations.

Shelley's affairs of the heart are almost too well known to need special mention. He married the sister of a school-fellow without being really in love. He separated from his wife and ultimately married a second time, after his first wife had committed suicide by drowning in Hyde Park.

And talking of the affairs of the heart of Shelley, it might be mentioned that perhaps the only pure and sincere affection that ever graced the stormy life of Byron was his boy love for the beautiful Mary Chaworth, who, curiously enough, was the daughter of a man who had been killed in a duel by Byron's grand-uncle.

POE'S CHILD-WIFE.

On the other hand, of course, the lives of famous authors of the past

THE ADMIRAL AND THE BEY.

Diplomatic Story in Which a Lion and a Pair of Pistols Figure.

A show of force is often the best kind of diplomacy. A writer in a Paris newspaper tells a story of the French Admiral Dupetit-Thouars, who had been entrusted with the mission of exacting reparation from an African bey who had insulted a French Consul. As Dupetit-Thouars's demands were supported by the forceful argument of loaded cannon the bey acknowledged that he had been too hasty and proffered profuse apologies. He even invited the Admiral to his table and had a sumptuous repast prepared for his guest. The Consul warned the Admiral to be on his guard.

"The bey is inclined to be malicious," said he, "and when he strokes his beard and smiles you may be sure that he is concocting some mischief."

"We shall see," was Dupetit-Thouars's reply.

He reached the bey's palace in good time. Profuse compliments and salutations were exchanged. All at once the Admiral's foot met some soft, hairy substance lying on the carpet under the table. He bent down and saw a huge lion showing his formidable teeth. The bey smiled and stroked his beard.

Dupetit-Thouars did not wince, but called his dragoman.

"My pistols," was all he said.

The servant saluted, retired and brought back a pair of pistols on a silver tray. The Admiral took them and placed them on the table before him, but the bey, still smiling, continued to stroke his patriarchal beard.

"Tell the commander," he said to the dragoman, "that if those pistols are for the purpose of blowing out my lion's brains they are quite insufficient and perfectly useless."

Then, like a skilled fencer countering his opponent's thrust after the bey's ironical advice had been translated, Dupetit-Thouars replied:

"Tell his Highness that my pistols are not there to kill his lion but to blow his own brains out at the first movement of this objectionable carpet."

Gravely but a little pale the man interpreted. The smile died away on the bey's lips and he no longer stroked his beard.

"My lion," he said, "is too well trained even to scratch one of my guests, but since he is not wanted he shall be sent away."

At a word from the bey the lion slowly and heavily left the room, like an obedient dog.

MURDERESS TO LECTURE

COUNTESS WHO KILLED HUSBAND OFFERED CHANCE

Trial of Woman, Brother and Other Accomplices was a Sensational One.

A well known Italian impressario has made a tempting offer to the Countess Bonmartini to deliver a series of lectures in Italy and abroad. She has not decided yet whether or not she will accept the offer. The Countess has just been released after serving a term in prison for the murder of her hus-

be the curse of his life. His health had never been robust; rheumatism and neuralgia had tortured him; and, by becoming his own doctor, he had recourse to the anodyne of opium. Little by little the habit grew, and the "Kendal black drop" at length enslaved him. It injured his constitution and dulled his imagination; it enfeebled his will and went far to destroy his sense of truth and honor. Few things are so pathetic as his own lament over the deterioration of his nature, in his "Dejection, an Ode."

Thomas Shadwell, a dramatic writer of some note in the seventeenth century, died through an overdose of laudanum, while Walter Savage Landor was said to be addicted to the use of cocaine. Lord Byron's extreme restlessness led him at times to seek relief for shattered nerves in doses of morphia, and Sheridan indulged in the same habit.

KILLED BY COFFEE DRINKING

Richard Savage, who claimed to be the illegitimate child of Lord Rivers and Countess Macclesfield, ruined himself by dissipation, after producing works which have placed him amongst minor English poets, while Dryden's eccentricity took the form of having himself bled at frequent intervals and eating raw meat. The latter, he said, strengthened his imagination.

Both Dumas and Balzac showed no inclination to pass the wine-bottle. On the other hand, Voltaire drank huge quantities of coffee when engaged in writing. As a matter of fact, over-indulgence in that beverage during a protracted literary effort was the real cause of his death. Schiller also drank coffee "to thaw the frost out of his wits," but he fancied imbibing the infusion while seated with his feet in hot water. This, he believed, stimulated his imagination in sluggish moods, and he refreshed it during work by copious draughts from a flask of Rhenish wine.—London Tit-Bits.

BATTLE OF GIPSIES.

Terrible Encounter Between Rival Bands in Spain.

At Burgo-de-Osma, in Spain, two gipsy tribes have been established for many years. Intense hatred always existed between them, and a general conflict has been long expected.

Recently the two heads of both tribes met casually and insults were exchanged, ending in a duel with knives. The members of the respective tribes soon heard the news, and appeared on the scene armed with knives, daggers, and guns, the latter chiefly old muzzle-loaders.

A general fight ensued, maintained with great ferocity and courage on both sides. Even the women and children, armed with knives, fought each other viciously. In all about 200 persons—adult and juvenile—took part in the battle, and so stubborn was it that there was a likelihood of the bands exterminating each other.

A strong force of Civil Guards approached unnoticed and opened fire. Two volleys were discharged into the mass of struggling humanity, and the gipsies fled in all directions, hotly pursued. About 50 of them were captured, and the remainder escaped to the mountains. Nine were left on the field killed, and 23 wounded, many dangerously.

room, lighted with electricity. The walls are lined with bookcases filled with rare volumes of incalculable value. In the centre are large iron safes packed with magnificent gold and silver plate. Here are two giant silver pilgrim bottles presented by Alexander III. of Russia to King Edward, and a priceless solid gold embossed shield which he received from a number of Indian princes. Another most interesting collection of the King's consists of relics gathered together from every war in which British soldiers have taken part since the accession of Queen Victoria. One of the mementoes of the South African war, and one which the late Queen greatly appreciate, is a cushion worked by a hospital nurse with scraps of the khaki clothes of Ladysmith's wounded heroes. It is a wonderful bit of work, beautifully put together, with worked portraits of Lord Roberts, General Baden-Powell, Sir Redvers Buller, General French and others. The colonies are represented by mounted men in their various uniforms. This collection of war relics will in time be of great historic value. It is very highly prized by his Majesty.

THE WRONG SEASON.

'Twas only a pin—rust and bent,
Placed on a chair by Willie Dent.

On the teacher's face there was a frown
As he made a bluff at sitting down.

Willie whispered: "I know one thing—
There's sure to be an early spring."

But the teacher saw—and a surprise
Was due for a kid of Willie's size.

For the teacher got into the game
And Willie for a week walked lame.

Instead of spring, for Willie Dent
It proved the winter of discontent.

KITE SWIMS UNDER WATER.

A strange kite has been devised by a Swedish engineer, which is made to swim under water. It is constructed of canvas adjusted to a light but strong metal frame, and in shape is not dissimilar to the aerial kite, except that it is made in two sections, the lower and smaller one depending from the upper, with which it is connected by a sort of coupling. The object of the engineer is to provide ships with an ever-ready automatic guard, or watch, that will give instant alarm if the vessel enters shoal waters, and is approaching a spot where the depth is not sufficient for safety.

A CLEVER COOK.

Mrs. Nurich was in the jewelry store.

"Here are some new souvenir spoons we have just got in," said the clerk, placing a tray for her inspection.

"Oh, ain't those lovely!" she exclaimed. "I must have some of those! Our cook makes such lovely souvenir!"

DIDN'T WANT MUCH.

Old Lady—"I want an umbrella for about 50 cents, young man."

Clerk—"Yes, ma'am. Have you any particular choice?"

Old Lady—"Oh, I'm not particular—just so it has a silk cover and a solid silver handle."

graced the stormy life of Byron was his boy love for the beautiful Mary Chaworth, who, curiously enough, was the daughter of a man who had been killed in a duel by Byron's grand-uncle.

POE'S CHILD-WIFE.

On the other hand, of course, the lives of famous authors of the past contain some beautiful stories of domestic felicity. Perhaps the most notable is that of Robert Browning, who, sixty-two years ago, married Elizabeth Barrett, perhaps the greatest poetess the world has ever seen. The frail health of Mrs. Browning necessitated residence abroad, and they settled at Florence, where for fifteen years they lived in perfect and happy union. Browning himself tended her frail health with untiring and loving care.

There does not seem to be much doubt, either, that the death of his wife led Poe to indulge in excesses which he otherwise might not have done, although Mrs. Poe ended her life in misery and chagrin.

Poe married his cousin, Virginia Clemm, in 1835, when he was twenty-six and she but fourteen years of age. She was a girl of matchless beauty and loveliness, and, according to one biographer, possessed a temper and disposition of surpassing sweetness. Poe was passionately devoted to her, but he could not rid himself of the drink, demon, and ultimately his child-wife died twelve years after the marriage.—London Tit-Bits.

A FARMER'S UTOPIA.

Cattle Fatten on Nutritious Grasses Whole Year Round.

New Zealand is rich in agriculture, and its temperate climate enables stock to forage on green vegetation the year round. Enormous crops per acre are raised of wheat, oats, barley, turnips, and mangles. About 3,500,000 carcasses of frozen mutton and lamb are shipped annually, and the value exceeds \$15,000,000. There are over 20,000,000 sheep grazing in New Zealand, which fattens almost entirely on the nutritious grasses. When other food is necessary to hasten their market condition, turnips or mangles are given them. These grow enormously, both as to size and quantity, turnips oftentimes growing from 40 to 60 tons to the acre, and mangles 90 to 100 tons. The Kauri gum industry is an important one. The gum is found in the North Island in the vicinity of Auckland, beneath the surface, from a few inches to several feet. It is used in making varnish—the finest in the world—and its export value exceeds \$5,000,000 annually. Three-fifths of the product is used in America.

TO STOP A RUNAWAY HORSE.

Policemen will tell you the best method of stopping runaway horses. You will notice that a policeman never approaches the galloping animal from the opposite direction, or at right angles. When he sees a runaway horse coming towards him, he starts running in the same direction as the horse, looking back now and then as the runaway overtakes him. Soon the animal dashes alongside him, and, although he may not be travelling as fast as the horse, he is able to shoot out his hands and grasp the reins, and, still running, gradually brings the beast under control.

tional One.

A well known Italian impressario has made a tempting offer to the Countess Bonmartini to deliver a series of lectures in Italy and abroad. She has not decided yet whether or not she will accept the offer. The Countess has just been released after serving a term in prison for the murder of her husband.

The murder was committed in Bologna in 1904. In the dock with the Countess when the trial began at Turin were Tulio Murri, the Countess' brother, who afterward confessed to the actual murder; Dr. Carlo Secchi, the Countess' lover, with whom she formed the plan for the killing of the Count; Dr. Pio Naldi, who was a tool of Murri's, and a maid named Bonetti, who fetched and carried for the conspirators.

A SENSATIONAL TRIAL.

The trial was sensational. Nearly 400 witnesses were called, including a cardinal, a bishop, two generals, several Senators, the grand master of the Italian Masons, four famous experts on the nervous diseases of women, and sixty medical experts. The grand master of the Masons was called to testify that when Murri, who was a Mason, was in danger of arrest some of the murderer's relatives approached the grand master and begged him to screen Murri. He indignantly refused.

Among the letters written to her brother by the Countess were some containing phrases like these: "Who will deliver me from this imbecile? I still stand in need, and now more than ever, of love; of being loved."

After a trial that lasted months a verdict of guilty was brought in, and the following sentences were imposed: Tulio Murri and Dr. Naldi, thirty years each; the Countess and Dr. Secchi, ten years, and Bonetti, seven years.

"MATUSHKA VOLGA."

Melody of Sorrow and Unrest Heard in Prison and Palace.

There is an air so popular in Russia that it is even more familiar than their national anthem to the people of that great mysterious empire. I have heard it in all parts of the Czar's dominions, from the Baltic Sea to Bering Strait and from Archangel to the Caspian; in the glittering palaces of Petersburg and in foul prison dens of Siberia, says the Travel.

It is a simple melody in the minor key, suggestive, like most Slav music, of sorrow and unrest, and it is called "Matushka," or "Mother Volga," as for some cryptic reason every Russian, be he noble or Nihilist, is taught from childhood to regard this great river in the light of a maternal relative. Yet the river is full of sad associations, for convicts formerly travelled a portion of the journey to Siberia along its broad, sluggish stream.

I can never forget the haunting sweetness of "Matushka Volga" as I heard it sung on a prison barge one quiet summer evening by a party of fettered political banished to the great lone land of exile. For "Mother Volga" was their last link with home and the loved ones they might never meet again.

Fortunately the condemned are now sent into Asia by the Trans-Siberian Railway and the unhappy exile is spared at least one bitter parting—that from his well beloved "Mother Volga."

THE GREATEST BREWERY

INTERESTING ROMANCE OF THE BASS FAMILY.

Burton, England, Boasts the Largest Brewery Industry in the World.

An absorbing romance of the business world is recalled by the recent death of Lord Burton, the head of the famous firm of Bass, of Burton, England. At the present time the yearly output of this brewery is close upon a couple of million barrels, which yield an annual turnover of over \$30,000,000 and afford employment to over 3,000 men, says London Tit-Bits. A better idea of the huge business done by Bass and Co. is obtained, perhaps, from the fact that 700 trucks are loaded in the works every day with barrels of beer, and the firm pay close upon \$10,000 every twenty-four hours to the Government for beer duties alone.

And yet this great concern was started in 1777 by a carrier, the great-grandfather of the Lord Burton who has just died. What is more curious still is the fact that the prosperity of the firm was practically brought about by a shipwreck. Mr. William Baas, the founder, lived in the little village of Burton. One day someone started a brewery in the village and made so much money out of it that the carrier thought he might as well try to do the same thing. Accordingly, he became a brewer, but for many years his trade was limited to foreign parts. He found it cheaper to send his beer to Russia and India by water than by wagon to London.

LIVERPOOL ASKED FOR MORE

One day, however, a vessel which carried 300 hogsheads of the famous ale was wrecked in the Irish Sea. Much of the ale was salvaged, and was afterwards sold in Liverpool. The Liverpool buyers liked it, and asked for more, and from this small beginning grew up a big trade in the North of England, which finally extended throughout the entire country and ultimately all over the world.

As showing how a vast industry like the famous Burton brewery affects other interests, it might be mentioned that the land required for the supply of sufficient barley for Bass and Co. would exceed 80,000 acres, while 5,000 acres more would be required to grow the hops. As a matter of fact, 85,000 tons of raw material are used by Bass and Co. every year, and one of the features of the storage buildings are huge cold chambers which will hold 20,000 pockets of hops.

A PRIVATE RAILWAY.

To facilitate operations in the gigantic premises at Burton the company has a network of seventeen miles of full-gauge railway lines. The works traffic employs 120 railway trucks and eleven locomotives; in addition, there is a special saloon carriage, which is employed to convey passengers around the premises.

A large quantity of Bass is not bottled, but an increasing quantity of bottled Bass is being supplied for household use. Every year Bass and Co. send out over 350,000,000 labels to its bottling customers throughout the world.

TEACHING A HORSE TO JUMP.

It May be Done by Coaxing, Lunging or Driving.

There are three methods of teaching a horse to leap—coaxing, lunging and driving. In the coaxing method the young horse is turned into a small paddock having a low hedge or hurdle across the centre. In plain view of the pupil a rider on a veteran jumper should take him over this hurdle several times.

The trainer then goes to the opposite side with a measure of corn or oats and calls the horse, shaking up the grain and pouring it with his hand back and forth in the receptacle. The boundary will soon be cleared, and when a few mouthfuls have been eaten the station of the instructor should be at the other side of the hurdle and the lesson repeated. If this be done daily the hurdle may be gradually heightened.

The habit of jumping is thus acquired without those risks which attend a novel performance when a heavy burden oppresses the strength and whip and spur distract the attention. The horse's body, says Country Life in America, is not partially disabled by the imposition of a heavy load before the powers are taxed to the utmost and his capabilities are unfettered.

The second method is termed lunging. A long rein or cord is attached to the bit and the animal is exercised in a circle in which a hurdle has been placed or a shallow ditch dug. A long lashed whip, used only to keep him in motion, or lightly applied at the proper moment, will keep him up to his work. Soon the horse will enter into the spirit of the occasion, and by unmistakable signs will manifest his enthusiastic enjoyment of the exercise.

The third method, driving, is exactly what its name implies. At first the obstruction should be slight. Any open space will answer the purpose, an earth or sod surface of tanbark being preferable. Long reins, a straight bar or snaffle bit, a long whip and patience and perseverance are required.

All things considered, the driving method is the quickest and surest way of teaching the horse to leap. When he has become somewhat proficient, having thoroughly learned what is required of him, the saddle may be called into requisition and the practical lessons begun.

Almost any young horse can be taught to leap. Of course his proficiency will depend on the care bestowed on his training and on his general characteristics of wind, limb and nerve. An ordinary cob or Morgan will attain the proficiency of an Irish hunter, but any horse that is used for a saddler will be of far greater value to his owner if he can be taken occasionally for a cross-country ride and put over ditches and low obstructions.

DANCING AND FIGHTING.

In Montenegro They Have Their Own Way of Doing Each.

The national dance of Montenegro is the kolo, somewhat similar to the horo of Bulgaria. Both sexes take part, crossing hands and forming an unjoined circle. The music they supply themselves, each end of the horn alternately singing a verse in honor of the Prince and his warlike deeds.

WHY WAR IS OUT OF DATE

A FAMOUS INVENTOR GIVES HIS REASONS.

Flying Machines Will Make War so Ghastly That we Shall Have no More War.

It is only a few years ago since those who were devoting their strenuous attention to solving, once and for all, the conquest of the air, were regarded somewhat in the light of "harmless lunatics."

But within the past eighteen months such important discoveries have been made in the art of flying that there is now no manner of doubt at all that, before very long, aerial flight over both long and short distances will be of the most common occurrence, writes Sir Hiram Maxim, in Pearson's Weekly.

There are scientists, however, who consider that the aeroplane will never be of much practical use, except for sporting and adventurous purposes, but such is not my opinion—indeed, I hold totally opposite views.

The cleverest draughtsmen and scientists in the world are now devoting their attention to the invention of a machine that will be able to do eighty miles an hour—at this high speed the machine could be reduced in size, and as such machines are now possible, and as there are men in existence who can make them, I am strongly of the opinion that, within the next twelve months, we shall have them.

In fact, you will see that I am correct in predicting that this year we shall have a machine larger than that of the Wrights.

THE NEW AEROPLANE.

In fact, will travel faster than that of the Wright machine, it will have a perfectly made motor of from 80 to 100 horse-power, it will be able to carry half a ton, it will be able to remain up for three hours at the time, and will travel at the rate of quite fifty miles an hour, while, in power, it will cost no more than two-thirds as much as a motor-car.

"What will be the effect of this discovery?"

Well, in the first place, the effect on the nations will be that war will be made so terrible, so deadly, so ghastly in its results that we shall have no more war, for with flying machines, no matter how great and powerful your nation may be, it will always be open to attack.

Thus, under cover of darkness and clouds, an enemy will be able to destroy a city, no matter how carefully it may be protected, for attack from the air will never be able to be resisted.

True, the fact, that while the enemy is destroying your cities at the same time, maybe, you are destroying his, is an unarguable one, but it does not make any country's position in any way pleasanter or more secure.

"What about projectiles?" Well, to all intents and purposes, they do not enter very largely into the matter as, although projectiles may be fired by the hundred thousand, they are far more likely to do damage to themselves than to the enemy and thus, in ten years' time, I have the greatest confidence in predicting that the three great European Powers will be able to say, beyond all manner of doubt,

LADIES OF OLDEN TIME

IN THE DAYS WHEN KNIGHTS WERE BOLD.

Man Never So Entirely Under the Thumb of Woman as at the Present Time.

It is generally supposed that the age when steel-clad gentlemen tilted with long spears in honor of their Dulcineas was the golden age of ladies; but on looking closely into the household annals of the days of chivalry, we discover that the "queens of love and beauty" for whom so many midrifts were transcribed and caputs cloven, worked rather harder than modern domestics.

SOMETIMES, NOT ALWAYS.

Now and then they sat in state in galleries hung with 'broidered tapestry, and saw cavaliers wearing their scarves and mittens let daylight into other cavaliers who disputed the potency of their charms; but those gratifying spectacles were luxuries too expensive and dangerous to be common, and the ordinary routine of a "lady's" life in the chivalric era was at once monotonous and laborious.

The stately countess of the olden time spun and carded and wove as industriously as any of her hand-maidens, serve out bread to the poor on "loaf days" at the castle gate; shaped and helped to make her husband's and children clothing, and her own (for in those days tailors and dressmakers were few and far between); supervised the larder and the dairy; carried the ponderous keys of the establishment, and in short, played to perfection the careful house wife in the stronghold of her lord, while he rode about the country with curial axe at his saddle box, and a long, ashen skewer at his stirrup-leather, in a chronic state of wolfishness and ready to do battle for any cause, or no cause at all, with whomsoever it might or might not concern.

NOT SO TO-DAY.

In this delightful modern era of Fine Ladyism, a fashionable woman does not perform half the amount of useful labor in a year that a high-born dame of mediaeval times accomplished every month of her life.

Instead of skeins of flax she spins pretty yarns; her carding is done with bits of painted pasteboard; and if she weaves at all, it is meshes for eligible young men—on her own account if single, for the benefit of her daughters if a matron.

She has no objection to the poor being fed from her kitchen, perhaps; but as to serving out bread to them with her own delicate hands, after the manner of the fair "bread divider of the olden time," she couldn't think of it.

If her husband should wait for even the lightest of his garments until she found leisure to make them, the chances are that he would go shirtless to his dying day.

SEWING TABOOED.

She seldom sews. Sewing spoils the tips of her fingers.

In point of fact, the aristocratic dames and demoiselles of old were more drudges and dowdies as compared with the female patricians of this our day and generation. Nay, even our housemaids and

way trucks and even locomotives; in addition, there is a special saloon carriage, which is employed to convey passengers around the premises.

A large quantity of Bass is not bottled, but an increasing quantity of bottled Bass is being supplied for household use. Every year Bass and Co. send out over 350,000,000 labels to its bottling customers throughout the world.

A SELF-CONTAINED FIRM.

In addition to brewing beer, practically every article used by the firm is made on the premises, from rivets to the coppers, which cost \$1,250 each, and from tin-cans to the wooden shovels, of which there are thousands in stock. One of the most interesting departments is the steam cooperage department. In this wonderful building solid oak and hoop-iron are fed in and come out as finished casks. A large number of casks are required in the business; in fact, a stock of 414,000 casks is kept, while thousands are made to carry on the export trade.

BASS THE BOUNTIFUL.

The Bass's have always been a family of philanthropists, and, as an illustration of the generosity and kind-heartedness of the late Lord Burton towards his employees, it might be mentioned that every year they are given a free trip to the seaside, each person receiving, in addition to full wages, a sum of money and a ticket for free admission to all the exhibitions and places of amusement in the town visited.

SOMETHING LIKE SHOOTING.

Remarkable Shots For a Humane Object.

The champion marksman of the world has been discovered at last. He is Arthur Douglas, a hitherto unknown American, who has leaped into prominence through an exhibition of shooting that had for its object a humane act.

Douglas has always been skilful with the rifle. He hunted moose in its fastnesses, and followed the deer and wary bear through Southern Canada; but he is a modest, retiring man, and few knew of his skill until a few mornings ago.

A white dove that had freed itself from a snare became entangled in a telephone wire through a piece of string that was hanging to one of its legs. The bird vainly fluttered for freedom. There were no ladders to be found, and since there seemed to be no other way to reach it the men who had gathered in the street made preparations to shoot the bird and free it thus of its misery.

When the gun was produced, however, no one volunteered to shoot. Then Douglas came down the village street. He took careful aim, and, without removing the pipe from his mouth, fired. The dove shook its wings, free once more, for Douglas hit the white string which held the dove's leg to the telephone wire.

Then something happened that changed the joy of the onlookers to sorrow, for the dove, hovering on the wire, became entangled a second time.

Without a word to anyone, Douglas slowly raised the rifle, squinted along the barrel, and fired.

Great was the wonder of all who watched to see him repeat the first shot, for once more he succeeded in freeing the dove.

In Montenegro They Have Their Own Way of Doing Each.

The national dance of Montenegro is the kolo, somewhat similar to the horo of Bulgaria. Both sexes take part, crossing hands and forming an unjoined circle. The music they supply themselves, each end of the horn alternately singing a verse in honor of the Prince and his warlike deeds.

The kolo is always danced at any great national festival, and the effect of the sonorous voices and swaying ring is very fine. Then there is another dance performed by four or five, usually youths, to the accompaniment of a fiddle, the leader setting a lot of intricate quick steps which the rest imitate at once. It is really a sort of jig and makes the spectator's head swim if he watches it for long.

"I never saw any dances in northern Albania," says a writer in *The Wide World*, "though certain Slav artists love to depict wonderful sword dances, with beautiful maidens swaying gracefully after the style of nautch girls. A casual observer who has seen the Albanians come into Montenegrin markets or to their great weekly gathering in the bazaar of Scutari could never picture these stern men dancing or at play.

"They never smile and they look the life they lead, each clan ever ready for war with its neighbor and absolutely pitiless in the vendetta. When fighting the Turks the Montenegrins evince a heroism and utter fearlessness that is remarkable. The strongest men carry bombs, or rather hand grenades—things the Turkish soldier particularly abominates.

"I was told once how a certain man whom I knew well saved his hand from destruction. They were fairly cornered, and the Turks closing in, when the bomb thrower stood up amid the hail of bullets, lit the fuse with his cigarette and rushed toward the soldiers, who, seeing his intention, promptly made tracks.

"It was, of course, lucky that the Mohammedan soldier, who does not much mind being sent to Paradise with a bullet, thinks his chance of eternal bliss very doubtful if he is blown up with dynamite. The nerve required to be a bomb thrower is worthy of a little reflection. He must absolutely expose himself, and as the fuse is very short the ignition must be coolly considered.

"If premature it means the destruction of himself and comrades, and when it is fairly alight the bomb must be thrown with mathematical exactitude. In other words, the man must leave his cover and charge an overwhelming force alone and not throw till he is close up to it."

FINGER PRINT SIGNATURE.

Finger-print identification has been extended to commercial uses by the Postal Savings Bank of the Philippines at Manila. This Bank has recently issued a series of stamp deposit cards, on which are spaces for stamps of different values to be affixed. When the depositor has stamps to the value of one peso on the card it is exchanged at the bank for a deposit-book showing the amount to his credit. Opposite the lines for the owner's signature and address is a square ruled off for the reception of his thumb-print; so that, even if illiterate, depositors may readily be identified.

more secure.

"What about projectiles?" Well, to all intents and purposes, they do not enter very largely into the matter as, although projectiles may be fired by the hundred thousand, they are far more likely to do damage to themselves than to the enemy and thus, in ten years' time, I have the greatest confidence in predicting that the three great European Powers will be able to say, beyond all manner of doubt, "There shall be no more war."

WILL CARRY MAILS.

The Flying Machine, it must be understood, however, will never be able to carry passengers and freight in large quantities, for it is essentially a military instrument, though, to be sure, it will very shortly be largely used for sport and discovery while, when the weather is bad, before long, you will see that Cross Channel mails will be carried by aeroplane; an instrument which, by the by, will be of extraordinary value as a rescuer of the shipwrecked mariner.

We must now prepare ourselves to recognize that what electricity was to the last century aerial navigation will be to this.

And on that account I repeat again that, in ten years' time, there will be no war.

It is not long to look forward to and when war is ended once and for all perhaps those who now read these lines will recall my confident prophecy.

BE GUARANTEED GENUINE.

Nothing will add more to your power than the consciousness of being absolutely sincere—genuine. If your life is a perpetual lie, if you know you are not what you pretend to be, you cannot be strong. There is a restraint, a perpetual fight against the truth, going on within you, a struggle which saps your energy and warps your conduct. If there is a mote in your eye you cannot look the world squarely in the face. Your vision is not clear. Everybody sees, too, that there is a cloudiness, a haze, about your character, and it raises an interrogation-point wherever you go. Don't pretend to be that which you are not, or not to be that which you are. Deceit is weakening, sham is powerless; only the genuine are strong and worth while.

HOLLAND'S FREE FARMERS.

In Holland there are few able-bodied paupers. There is a tract of public land containing 5,000 acres, which is divided into six model farms, and to one of these is sent the poor person applying for public relief. If he voluntarily serves till he learns agriculture, he is allowed to rent a small farm for himself, and be what is called a free farmer. Every pauper who is thus reclaimed to honest regular industry is so much gain to the State. There is also a forced labor colony, where beggars and vagrants are sent and made to do farm and other work whether they like it or not.

COUNTRIES REPRESENTED.

Canada, Denmark, France, Germany, England, Russia, Sweden and the United States were in 1905 represented among the twelve expeditions which were struggling toward the north pole. Eight leaders were veterans—Peary and Cook of the United States, Bernier, of Canada, Erichsen and Rasmussen of Denmark, Charcot of France, Shackleton of England and Geer of Sweden.

until she found leisure to make them, the chances are that he would go shirtless to his dying day.

SEWING TABOOED.

She seldom sews. Sewing spoils the tips of her fingers.

In point of fact, the aristocratic dames and demoiselles of old were mere drudges and dowdies as compared with the female patricians of this our day and generation.

Nay, even our housemaids and cooks have more leisure and take things more easily than did the duchesses and countesses of the Iron Age.

Modern chivalry accords to ladies all the privileges they ought to desire, and such liberties as the "tyrant sex" does not voluntarily concede they generally manage to take.

Never at any former period in the history of man was he so entirely under the thumb of woman as he is now.

And now the ladies are not satisfied, but like *Oliver Twist*, clamor for more!

WHAT IS THE CAUSE?

Do Earth Tides Throw Over Factory Chimneys.

Beyond waking the entire neighborhood, and blocking the railway line for several hours, the huge chimney, three hundred feet high, which fell so unaccountably near Glasgow, recently, did no particular damage.

Such, however, has not always been the case with other similar occurrences in the past. These tall structures have a knack of collapsing without a moment's warning, and frequently with the most frightful results to life and limb. For example, at Cleckheaton, Yorkshire, in 1892, a mill chimney, that was deemed to be as solid and safe as any in England, suddenly toppled over and killed fifteen people. A similar mishap near Lyons, France, lately, equally inexplicable, resulted in a score of deaths. In the Pennsylvania anthracite region, not long since, a colliery chimney, that had been examined and pronounced perfectly stable only a short while previously, fell across the mouth of a shaft, with the result that thirty-three miners working below were imprisoned and suffocated.

Even more dreadful results followed the mysterious collapse of the New Lands Mills chimney at Bradford, England, during Christmas week, 1882. No expense had been spared in its construction. The materials used were admittedly the best that money could buy. Yet it came down like a child's house of cards; falling, a thousand tons of dead weight, right athwart the crowded factory buildings.

More than 250 wounded were extricated from the ruins, together with 54 dead bodies. It was the worst catastrophe Bradford had ever known, and no pains were spared to elucidate the cause of it. But in vain.

Now, however, in view of the recent discovery of earth tides, engineers are beginning to see a light. Investigations, carried out with scientific instruments of an extreme delicacy, have shown that the earth's crust, so far from being immobile, as had always been supposed, rises and falls over eight inches once daily. May not this movement, it is asked, be responsible for the collapse of these slender, hollow shafts?

HOLIDAY TIME.

VAN LUVEN BROS.,
Moscow, Ont.

The Utica Globe, of June 5th, has the following to say of a former Napaneean: John W. Schryver, of 23 South Meadow street, Watertown, has just returned from Columbus, Ohio, where he attended as a delegate from Watertown Lodge, No. 480, B. R. T., the ninth biennial session of the Brotherhood of Railway Trainmen. There were 812 lodges represented, all save one in the United States and Canada, and the representative from that one was taken ill and not able to attend the session after arriving in Columbus. During the convention there were more than 7,000 visitors to Columbus interested in the affairs of the trainmen. Gov. Harmon, of Ohio, addressed the delegates and met with hearty applause. The order has a membership of 105,000 and the local lodge, of which Mr. Schryver is master, has a membership of 110. Since the order commenced to pay insurance it has paid out over \$18,000,000 on account of deaths and accidents. The next meeting will be held in Harrisburg. Mr. Schryver is also a member of Onongatonga Tribe of Red Men: Watertown Aerie of Eagles: Cape Vincent Lodge, A. F. & A. M., and Cape Vincent Chapter, R. A. M. He formerly resided at Cape Vincent, running on the Cape Vincent branch. Now his run is from Watertown to Syracuse.

If you wish to put paint on your kitchen floor that will dry hard quickly, wear well, and have a varnish gloss, use the "Prism Brand." There is nothing better in the market. The Medical Hall - Fred L. Hooper, agent, Napanee.

Lennox and Addington Fire Insurance Company.

Change in the Office of the Lennox and Addington Mutual Fire Insurance Company.

Mr. M. C. Bogart, who has been intimately connected with and served the Company so acceptably for a long period, having decided to make a trip to Europe this summer and expects to be away for some time, has very much to the regret of the Directors and policyholders tendered his resignation as Secretary. Mr. F. C. Bogart has also resigned the office of Treasurer. While the Directors are sorry to lose such efficient officers they considered it very necessary in the interests of the Company to keep the office open as usual for the accommodation of the policy holders and others who may have business with the company, therefore under the circumstances they could not do otherwise than accept the resignations.

The Directors have therefore combined the two offices of Secretary and Treasurer and appointed Mr. Manly Jones to the position.

The street entrance to the office will be the same as heretofore and policy holders and others having business with the company, on ascending the stairs, will take the right hand door to the office, where they will find Mr. Jones, who will extend to them the same courtesy and attention as has been done heretofore.

T. ASHTON AMEY, President.

JUNE BRIDES.

McAFEE—GROOMS.

At the residence of the bride's parents, Mr. and Mrs. Z. A. Grooms, on Tuesday, their daughter, Miss Zeila was united in marriage to Mr. Lorne McAfee, of Toronto. The bridesmaid was Miss McAfee, of Toronto, sister of the groom, and the groomsmen, Mr. Roy Grooms, brother of the bride. Four little ribbon girls and one little flower girl were also in attendance. The bride's costume was of white satin, with veil and white roses and she carried a large bouquet of pink roses. The winsome bride was given away by her father and the ceremony was performed by Rev. G. W. McColl, under a large horseshoe of white roses. About seventy guests were present and following the ceremony all partook of a splendid wedding dinner. The groom's present to his bride was a beautiful gold watch. Many beautiful presents were received by the bride. The happy couple left for Kingston about 3.30 in an auto in a shower of rice.

GIBBARD—CRYDERMAN.

The beautiful residence of Mr. W. T. Gibbard was the scene of a June wedding on Wednesday morning, when Mr. Gibbard's eldest daughter, Miss Lillian Blanchie, became the bride of Mr. Manley Cryderman, of Edmonton, son of Mr. Michael Cryderman, of Bowmanville. The ceremony was performed in the spacious drawing room of the home by Rev. W. H. Ensley, pastor of the Western Methodist church, in the presence of the immediate relatives of the young couple and a few of the bride's friends. The bridesmaid was the bride's sister, Miss Florence Gibbard, and the groomsmen, Mr. Will Campbell, of Kingston. The wedding march was played by Miss Hester Gibbard, youngest sister of the bride. The bride looked charming in an Empress costume of white liberty satin, trimmed with chiffon lace and hand painted medallions, also the customary bridal veil and orange blossoms and shower bouquet of roses and lily of the valley. The bridesmaid's costume was an Empress gown of pink crepe with baby Irish panel and a touch of gold cord and bouquet of pink roses. Mrs. Gibbard's costume was of grey silk voile, mauve hat and mauve orchids. After the ceremony a wedding breakfast was served by the bride's girl friends, and the happy bride and groom left for their future home in Edmonton, Alberta, where Mr. Cryderman is an employee in the civil service. A large number of gifts were received by the bride from friends and relatives in Napanee, Kingston, Brockville, Bowmanville, Toronto and Edmonton. Mr. Gibbard's gift to his daughter was a furnished home at Edmonton and a substantial cheque. The groom's gift to his bride was an Emerald drop with chain and fringe of brogue pearls, to the bridesmaid a ring with a Saskatchewan gold dust nugget in Tiffany setting, to the groomsmen a nugget tie pin and to Miss Hester Gibbard an Alligator skin music roll, with gold monogram. A number of congratulatory telegrams were received during the ceremony and breakfast. The out of town guests were Mrs. Ruse, Bowmanville, sister of the groom, Miss McConnachie, Brockville, and Mr. and Mrs. Challes, Winchester.

20-bp. FISHER'S MUSIC STORE.

Dominion Day at Napanee.

Sports have been held at the Napanee Driving Park on Dominion Day for the last 20 years, and this year the committee intend putting on a good programme. \$700 or \$800 in prizes will be given for horse races. A baseball match will be played between Kingston and Napanee, and the Napanee Amateur Athletic Association will put on some Marathon races, of different distances, open to all. The Citizen's Band of Picton will run an excursion from that town by steamer Brockville, and no doubt other boats will also run excursions.

AN HISTORICAL VOLUME.

The Lennox and Addington Historical Society announces the publication of its first volume of "Papers and Records." The volume is offered for sale at 25 cents postage 5c extra, and a limited number are available. The material reproduced in this book is very interesting to all residents of the County, past and present.

All members of the Society who pay the annual fee of one dollar for membership, or \$1.50 for family membership, for the year 1909-10 are entitled to receive this volume free. Please send your orders to

U. J. FLAVIN,

Secretary.

Napanee, Ont.

SPECIAL NOTE—The older residents will remember the "Bird's-eye view of Napanee," which was published in 1874. As this map was issued at the time the "Chronicles of Napanee," which appear in the above volume, were published in "The Bee" and shows every building in the town it is very interesting. The society has secured 34 copies of the picture which are offered for sale at \$1.00 each. The orders for it will be filled in the order in which they are received until the supply is exhausted. The picture is 18 in. by 24 in.

June Weddings.

When we think of weddings of course we immediately think of flowers. The Dale Estate Florists are making special prices for this month, in their fine assortment of Orchids. The Medical Hall—Fred L. Hooper, agent, Napanee.

Mrs. William Jacobs, aged eighty five years, was found dead at Brockville.

An association has been organized in Berlin to promote better trade relations with Canada.

Hammocks, good and durable. Keep cool and comfortable. See

BOYLE & SON.

Hon. Wm. Hart, M. P., of Kingston, it is said, has been recommended for knighthood by the Canadian Government.

The C. P. R. shops at Montreal are turning out the biggest locomotive ever built in Canada for use on the Canadian Pacific.

Wednesday Half Holiday.

The following merchants, representing the different branches of business, agree to close their respective stores every Wednesday afternoon during the month of July and the first three Wednesdays in August, said stores to close at 12.30 p. m. and to remain closed until the following morning: The Robinson Co., Graham & Vanaalstyne, F. Chinneck, Madill Bros', S. G. Hawley, F. W. Smith & Bro., Jas. O'Brien, John P. Ellison, Meagher Bros., J. J. Haines, Jas. Walters, A. Lazier, Dosee & Co., Miss Allingham, D. J. Hogan & Son, Chas. Fisher, J. L. Boyes, A. Duncan, Wilson & Bro., Miss Bruton.

Painting Barns.

Commonwealth Barn Red made by the Sherwin-Williams Co. will cover more surface, look better, and is therefore cheaper than any other kind of barn paint. The Medical Hall—Fred L. Hooper, agent. Napanee.

GET WATER POWER.

Port Hope, June 7.—The directors of the Northumberland-Durham Power Co., Limited, have just made public an announcement of considerable importance to the municipalities lying between Port Hope, Belleville, Napanee and Deseronto, to the effect that the Minister of Railways and Canals has agreed to grant a lease to the Company of the remaining portion of the Healey Falls waterpower controlled by the Federal Government. Development of the power will proceed concurrently with the construction of the Trent Valley canal which passes through the Company's property, and will also facilitate the early construction of the Cobourg, Port Hope and Havelock Electric Railway, which is awaited by the district.

MUST MOVE.

Six monuments that are in the way where I intend erecting a new workshop and show room early in the spring. They are imported granite set on granite bases. I will make a cut ten per cent on former price for March and April. I have over thirty monuments on the yard and a few more coming in May and June. Also on hand forty finished marble blocks from \$5.00 to \$80.00. All choice stock to choose from. Come early before we are rushed with spring orders.

Exactly What the Physician Orders.

When you get your prescriptions filled at Wallace's Red Cross Drug Store you not only get exactly what your physician orders, but you get the highest quality of every drug used in it. Our Prescription Department is second to none in Ontario and is always in charge of a graduate of the Ontario College of Pharmacy. Our charges are reasonable. Mail orders receive prompt attention.—T. B. Wallace, Pharm. B., The Prescription Drug-gist.

Badly Shaken Up.

Trumpeter Wells, 9th Brigade, Deseronto, was removed to the Station Hospital, Queen street, Kingston, at two o'clock Wednesday afternoon. The soldier was riding from the station to camp on one of the guns, and at the corner of Queen and Ontario streets fell off, and the carriage and the wheels passed over his legs. He was removed to the Station Hospital and upon examination it was found that no bones were broken, although he was badly shaken up.

Dominion Day at Napanee.

The Driving Park Committee have an attractive list of races and sports for July 1st, consisting of horse races, base-ball match and five mile race for amateurs. Horse races will be as follows:

No. 1—2.13 Class, Purse.....	\$200
